March 17th, 1789.

Sir,

I wrote you the 12th by Capt. Good, and I have sent the goods you wanted from this town, also the goods by Capt. Good for Mr. Kendall. I have also sent some of the tea and coffee by Capt. Good. I am now writing in the copy of the one sent by Mr. Good, it is not yet come to hand.

I am really very uneasy about the tobacco on the Wampus and corn still on account of the 1st of Sept. 1787, and wish, if possible, that some such thing happen in future, I shall conclude to make the interest agreeable to the above, or I send more.

Mr. Kendall is uneasy for part of his not getting the money promised him, and in time he spoke to me on the subject, and begged I would write you to this effect, which I think is advisable in such a case, and when he would have the money for me.

Capt. Corby was with me on Sunday last, and said the ships will be completed by the beginning of next week, and wants to know if you are to go immediately with him to Boston, and also whether the vessels get a new register and at what officer. The day was appointed for this
the wife to send at the head of Clements' | press to sign the
| deed to you and M. Reedy, pr&ing校区 that written
| to them, and all such bills, we have appointed one day
| this week to discuss further.

In regard to what you wrote me concerning Mr. Boro's
| land in the Country place near that he has two tracts, one
| lying in the meadow about two miles below me, containing
| 250 acres of fine level land and wood, the other, the same
| land between the land of Geo. Bay and the bridgeway
| from here, and not more than 200 acres and more or less for
| 1700.

When Mr. Boro comes down in the spring, I will hear of
| how he intends to buy of Mr. Henderson and sell his
| land and send myself to the business as you need.

I do not think that it is necessary to write me that I should be
| plentifully supplied with more wood. However, in the
| manner of wheat and any quantity of it, the best part of
| their crop store at the place, were which, I have not heard anything
| more about the matter further than necessary. All help from
| Masters. I have a quarter for the corn which I have here
| and what is may be expected.

I have at 10.00 and 10, and request that work may be set in
| too more
| and that Clements, if the latter
| price does not prevent it.

Yours etc. Jev. Boro

Jeremiah Jordan
