SEE CHICAGO and A CENTURY OF PROGRESS EXPOSITION

USE CHICAGO SURFACE LINES
As a suitable celebration of the centennial anniversary of the incorporation of Chicago, A Century of Progress International Exposition depicts the great strides of civilization during this period. From a little cluster of rude cabins surrounding a log fort, Chicago has grown to a great metropolis of 3,500,000 inhabitants. Within an overnight ride of this commercial capital 67 per cent of the population of the United States reside.

At the beginning of this century man was groping to learn the fundamentals of the laws of nature. These forces have been mastered and in these 100 years more progress has been made in science, invention and the general extension of human knowledge than in any other similar period in the history of the world.

A Century of Progress International Exposition tells this marvelous story graphically by its exhibits.

The moment the visitor enters the gates of the Exposition he finds himself in a veritable fairyland conjured up by twentieth century magic. The buildings themselves are unique in architecture and eloquent of the modern age. Extending along the beautiful lake front and covering man-made islands, these buildings house a living encyclopedia of human achievement. Physics, chemistry, mathematics, biology, geology, medical sciences, mechanics, agriculture, social science, home and industrial arts, anthropology—in fact, every branch of science and industry is presented through the participation of the leading civilized nations of the world.

The Exposition buildings are a daring departure in architectural form, utilizing color on planes and surfaces in ways hardly imagined before. Electric illumination is used profusely to create magic effects at night. In striking contrast, nestling among the ultra-modern structures are old Fort Dearborn, the wigwam in which Abraham Lincoln was nominated, Lincoln's cabin and other relics of pioneer days. Also there is the golden pavilion of Jehol, a reproduction of China's finest Lama temple.

The Exposition grounds are readily accessible to street car patrons as will be seen by the small map in this book. Ample facilities will be provided by the Surface Lines on all routes serving the Fair entrances.
Principal points of interest in Chicago, classified under appropriate headings alphabetically arranged, are listed below. Directions for reaching them by the Chicago Surface Lines pressure starting from the "Loopy" district. Numbers in parentheses refer to locations on the city map. Any section of the city can be reached conveniently on the Chicago Surface Lines without changing cars as the passenger is traveling in the same general direction.
