A CENTURY OF PROGRESS

MASONITE PRESENTS THIS INTERESTING HOME

A FEW feet to the north stands the replica of Fort Dearborn, the last word in housing in the middle west a century ago. Here in Masonite Home is a truly modern home. It is Masonite insulated to reduce heat losses in winter and to shut out the intense heat of the summer sun. Being insulated it may be and is air conditioned and is economically heated by gas.

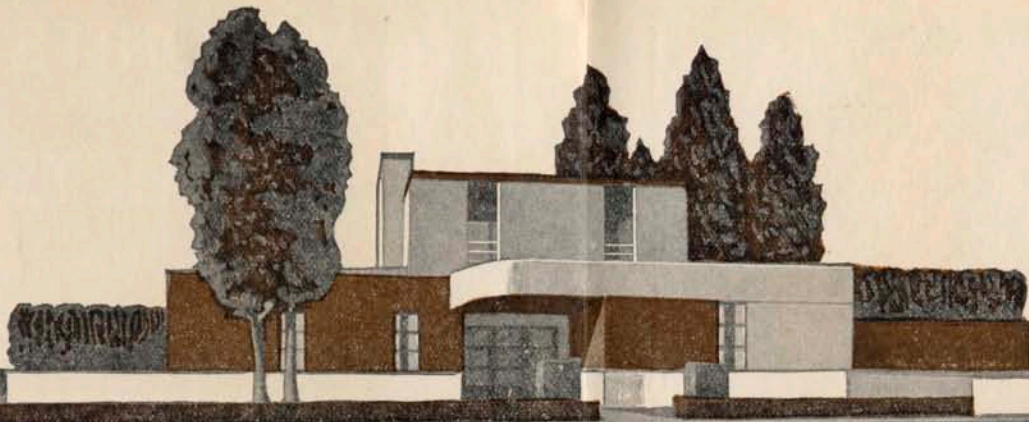

Its Masonite Presdwood exterior was erected last summer, left bare and unprotected through the winter. It was unaffected by the freezing mist and spray from the lake. Its smooth coat of paint, applied in May will not chip, crack nor blister.

Interior walls are insulated. Some left natural, others plastered; some trimmed with Quartrboard and Presd-

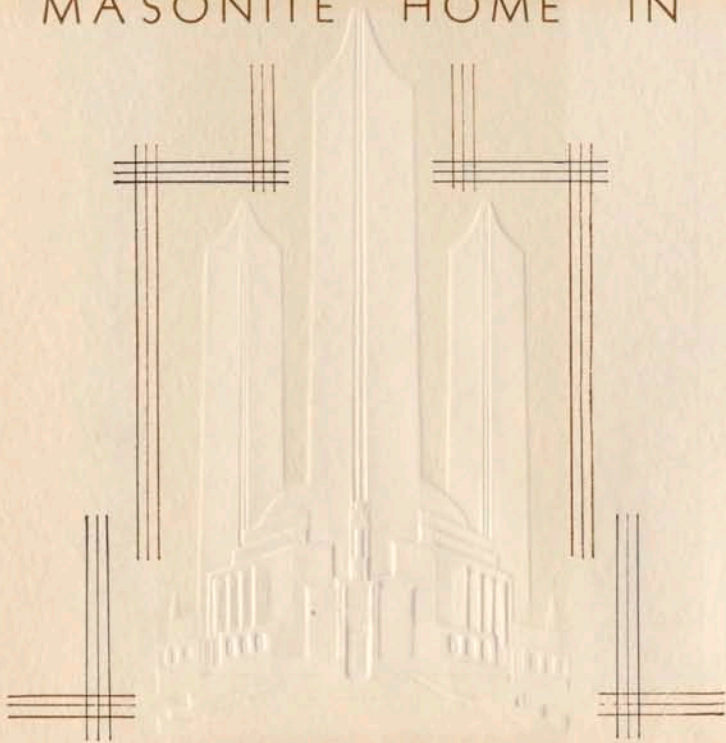

wood, others covered with Wallpaper or wood veneer. Masonite Temprtile in bathroom and kitchen. Floors covered with Masonite Cushioned Flooring—beautiful—resilient—enduring.

Masonite Corporation makes no pre-fabricated, sectional or ready-cut houses. It advocates no particular type or style of architecture, nor does it advocate any particular building material—wood, brick, stucco, stone, glass or metal—over any other material. In this home we only demonstrate the use of our own materials—Masonite products—and point out the desirability of using them in all homes.

As interesting as this little home is, however, the story of the uses of Masonite products throughout A Century of Progress is of even greater interest.

MASONITE HOME IN A CENTURY OF PROGRESS

At a Thousand Places ■ ■ ■

IT REQUIRES A Century of Progress in which millions of feet of Masonite products are used at a thousand places to reflect the broad utility of these boards. Their uses present startling contrasts. To check them continents must be spanned, centuries must be bridged.

These modern wood boards found a place in the ancient and magnificent Temple of Jehol, near which, above the heads of the crowd, is a loud speaker with a Masonite Presdwood sound chamber—one of forty-five such speakers distributed throughout the grounds. Buddha who smiled at the hopes and fears, the praises and pleadings of generations and dynasties of Chinese, smiles on, undisturbed by the strident radio.

You and fifty millions of your fellows will walk over acres of Presdwood floors in the Hall of Science. the

Electrical Building. You'll dance happily, with no exertion on Presdwood floors in the Dance Ship. You'll lunch and dine in the beautiful Mueller Pabst and Schlitz Garden restaurants, built of Presdwood with interiors finished with Masonite Insulation, Masonite Quartrboard and Presdwood.

Fruit drinks served you by Orange Crush and Citrus Fruits, Inc., will be served from one of the more than one hundred booths they have built of Presdwood. Every admission ticket to A Century of Progress is sold from a booth built of Presdwood.

Tiny bits of humanity in the Infant Incubators, whose lives must be guarded so carefully, are housed in a building made almost entirely of Masonite Products. It is insulated, of course, outside wall of painted Presdwood, interior walls of Presdwood scored and left natural. Floors are covered with Masonite Cushioned Flooring.

The sea wall around the lagoon is Tempered Presdwood, painted green and nailed to rough wood piles. It may be depended upon to resist pounding of furious waves from the wind-swept lake. The electric fountains out in the lagoon are sheathed with Presdwood.

And so on and on—in the reading room of the Time and Fortune building, the Nash display, every official sign out on the grounds, numerals and marks on the great Havoline Oil company thermometer, contributing to the enchantment of the Enchanted Island, in the exhibits of foreign lands—Holland, Sweden, in the exhibits of the United States, states of Mississippi, Ohio, in Walgreen's, in the exhibit of American Telephone and Telegraph, National Cash Register and Burroughs Adding Machine Companies—everywhere you turn is Masonite Presdwood, Insulation, Quartrboard, Temprtile, Flooring—in a thousand places in A Century of Progress.
