Operation of Roller Chairs in Buildings

a. Roller chairs will be permitted to operate in buildings at such times as the buildings are open to the public and when, in the opinion of the Assistant to the General Manager in charge of General Services, the pedestrian traffic in the buildings is not too congested to permit the operation of the roller chairs.

b. Prohibited areas through which roller chairs will not be permitted to operate, may be established in any building by the Assistant to the General Manager in charge of General Services upon the recommendation of exhibitors, concessionaires, or representatives of A Century of Progress in charge of the buildings concerned.

c. In case of a special event occurring in any building which would greatly increase the number of visitors in that building, notice will be given as far in advance as possible, that the wheel chairs will not be permitted in such building during such event.

d. Roller chairs will be operated only in single file while in buildings or on connecting bridges. They will be kept moving with the flow of traffic at a speed approximating that of normal pedestrian movement.

e. Turns will be made with caution and at points of least congestion in a manner to avoid interference with the pedestrian movement.
f. The operation of single roller chairs is prohibited in aisles or passageways less than 12 feet in width and the operation of double roller chairs is prohibited in aisles or passageways less than 15 feet in width.

g. During inclement weather, particularly at times of sudden rains, the chairs will be kept away from exits and doorways and avoid interference with the movement of pedestrians.

h. The Guides on duty in the buildings will see that these regulations are properly enforced.

2. Operation of Jinrikishas in Buildings

Jinrikishas shall be operated in buildings under the regulations governing the operation of roller chairs, with the exception that these vehicles will not be permitted to operate in any building after 12 o'clock noon.
