HILD

EFFICIENT ECONOMY is the "BUY WORD" for HILD FLOOR MACHINES

FLOOR MACHINES at A CENTURY OF PROGRESS
The Hild Floor Machine Co. have prepared a very interesting display of its guaranteed floor maintenance products at 4 Century of Progress.

Four different sets of Hild floor machines are on display: also shown, liquid and paste waxes, seals and other floor treatments.

In order that the visitor may see all a glance to floors in their natural state as well as scientifically treated to withstand traffic, small panels of the following floors are on display. Wood floors consisting of Maple, Oak, Pine and Poplar. Porous tile, terrazzo, cement, cork tile, asphalt tile, rubber tile, and battleship linoleum. In the center of each of these floors, a bottle containing the Hild Guaranteed Treatment with which the floor was treated is also shown.

A continuous moving picture projected on a screen at the rear of the booth shows the Hild floor machine in operation. Here the resurfacing of a wood floor is clearly displayed, old varnish is scrubbed off, the floor sanded, then sealed, waxed and polished. A linoleum floor is also scrubbed clean, the dirty water removed with the Hild floor pan and wringer, liquid wax applied and polished.

To prove the ease by which the Hild floor machine is operated, a seven year old boy in one of the stores is shown operating the Hild. Only six minutes is required for the visitor to watch the complete procedure picture show, and it is easy to remember that Beautiful floors are "easy to have and easy to keep!" the Hild Way.

**CALL IN A HILD FLOOR ENGINEER**

At no charge to you the Hild Floor Machine Co. will send a floor engineer to inspect your floors at your home or place of business. He is experienced, he knows their maintenance, he can suggest the best method for renewing them and their subsequent maintenance. He can prove that he is correct in his method by actually cleaning a small portion of your floor.

**THE MOST EFFICIENT FLOOR MACHINE**

With these seven attachments and a Hild Floor Machine, you can tackle every type of floor finishing job, efficiently, economically and speedily. All attachments receive 100 revolutions a minute and go right up to huckaboos. Each can be easily and quickly attached to the quiet running Hild floor machine.

In operation the two rubber tipped wheels at rear of machine are swung around and up so as to allow the entire weight of the Hild floor machine to rest upon the attachments used which insure thorough and efficient work being done in the shortest possible time.

There are four sizes of Hild floor machines, 11 inch; 13 inch; 15 inch and 18 inch barthum diameter which is your assurance that a "first rate" size is available for your requirements. Finished in Chromonized plate and polished aluminum.

**SEEING IS BELIEVING**

Several thousands of our customers who purchased a Hild Floor Machine did so after trying it on their own floors and could see its superiority over other methods. We welcome an opportunity to inspect your floors and advise you as to the cleaning and maintenance methods best suited to your particular kind of floor. Invite the Hild Man to call today. No obligation.

**HILD GUARANTEED FLOOR TREATMENTS**

**FOR MAKING FLOORS BEAUTIFUL AND EASY TO KEEP BEAUTIFUL.**

Hild Floor Treatments offer advantages that nothing practical heretofore so efficient building superintendent can afford to overlook.

A few of the more important are as follows:

1. **Low Cost.** Hild Floor Treatments are economical and easy to apply. A little goes a long way.

2. **No Fumes.** Smells and other fumes subject to wear can be touched up or simply repolished as needed. No "ever lapsing" will there.

3. **No Reducing.** Once the old varnish has been removed and the floor treated the Hild way, it will never have to be refinished again. All you do is apply new treatment when and where needed.

4. **Suntan.** The Hild treated floor, through electrical attraction, keeps products out of the air. Dusting and other cleaning is greatly simplified.

5. **Easy to Keep Clean.** By filling the pores of the floor, Hild Treatments seal the surface against the penetration of dirt. Instead of being ground into the floor, the dirt stays on the surface where it can readily be swept away.

6. **Horizontally.** Hild Floor Treatments when properly applied are never slippery.

Hild Floor Treatments are the perfect finishing touch that enhances the natural color and beauty of the floor.

7. **VERTICAL WATER TANK**

Capacity for Blank Model A, C, D, DB, and J.

Storage Tank to keep solution in tank for long periods of time when water is not available.

**WATER TANK**

To scrub large areas of floors speedily clean in the shortest time, the use of the Hild Water Tank to hold soap and water is a desirable convenience and its purchase recommended. Two types of water tanks are illustrated, Horizontal and Vertical types, either one can be attached to the Hild Floor Machine in 1 minute, or less.

A large screened opening at top of tank permits rapid filling from hose or pull. The flow of water from tank to floor is controlled by a finger touch on 3-inch red which connects to a resealable brass kinked tube at bottom of tank.

HOW to Make Your Floors Give You MORE for LESS MONEY

It's being done every day. Floors are being made beautiful, lustrous . . . far more attractive than ever before . . . while maintenance costs are going down . . . in many instances as much as 50% . . . by the modern, scientific method of treating and polishing with the Hild Floor Machine. Frequent scrubbing is entirely eliminated. Floors last five times as long.

Cut down your labor costs, speed up your work with a Hild Floor Machine. There are seven different services with only one machine.

The Hild safety switch (developed in 1929) makes the Hild guaranteed floor machine foolproof. Stops machine instantly when operator releases hold on handle.

Free test makes good on any floor. Ask for a free trial. Learn exactly how much time and money the Hild can save for you.

There's a speedy Hild floor machine of "just the Right Size" to improve the appearance of your floors.

A "HILD" Maintenance Engineer will be pleased to inspect your floors and advise you as to the correct cleaning and maintenance methods best suited to your particular type of floor.

Have him show you the machine that scrubs, waxes, polishes, grinds, refinishes and sandpapers . . . all with record-breaking speed because the entire weight is over head.

Easy to operate. The Hild is self-propelling. It practically runs itself with only the effortless guidance of the operator.

It takes pressure (weight) to scrub, wax, steel wool, polish or refinish floors thoroughly and efficiently. For that reason the entire weight of the "Hild" rests upon the attachment used.
