

# TELEREGISTER

**ELECTRIC  
STOCK QUOTATION  
BOARDS**

Teleregister Dial Service places at your finger tips the full range of every stock listed on the New York Stock Exchange.

A distinctive Pedestal of modern design matches the Display Unit.

The Main or Auxiliary Teleregister for board rooms, Exchange Halls or private offices may be had in any size to meet individual requirements.

A Dial Service Display Unit has the same large, clear figures as a Main Teleregister.

Executive Teleregisters display last prices. These units operate from a Main board.

This Junior Teleregister combines Dial Service with a continuous display of last prices of 20 stocks independently of any Main Teleregister.

The Junior may be equipped with additional 25-stock display panels if increased capacity is desired. Extension Display Units and extension Dials are available with Teleregister Dial Service.
