A As the Sunshine City.

Q Where in Florida is located the U. S. Navy's Training School for aviators?
A Pensacola.

Q What Florida town is known as the watermelon seed center of the world?
A Monticello.
FLORIDA WELCOMES YOU

PLANT CITY
AMERICA'S WINTER STRAWBERRY CAPITAL

Located in a rich farming area of Hillsborough County, Florida, Plant City has a substantial foundation deep-rooted in fertile soil.

This attractive city is the center of the winter strawberry industry of America. On acre after acre the white blossoms of strawberry plants are transformed by Florida's warm, winter sun into luscious, blood-red berries... a treat for the nation's table that millions seek from Plant City and Florida when no other section can supply the demand.

Strawberries alone bring to Plant City growers a return of more than $2,000,000 a year. Growers sell at buying platforms for spot cash. In the 1933-34 season, Plant City shipped 22,412,513 pints of winter-grown strawberries to northern markets.

Many other farm crops are raised on the proven lands in the Plant City district. If you plan a farm in the Southland, visit Plant City.

You will find the city itself as delightful a place to live as you could desire — modern and progressive, with friendly neighboring cities for it is only a few minutes’ drive over splendid paved highways to Ringling’s Art Museum at Sarasota; the Bok Singing Tower at Lake Wales; the world's largest and most beautiful spring at Ocala, and the beautiful city of Tampa is only twenty-three miles to the west. The United States Weather Bureau says that the yearly average temperature in and around Plant City is 72 degrees.
