THE WELLCOME RESEARCH INSTITUTION (THE WELLCOME FOUNDATION LTD.)

THE WELLCOME RESEARCH INSTITUTION embraces the following Research Laboratories and Museums. The main activities of each are given beneath its title:

THE BUREAU OF SCIENTIFIC RESEARCH. Founded 1913.
The study and investigation of medical problems, more particularly in their relation to tropical medicine and hygiene.

THE ENTOMOLOGICAL FIELD LABORATORIES. Founded 1920.
Researches into the life-history and habits of noxious insect pests, such as mosquitoes, etc.

THE PHYSIOLOGICAL RESEARCH LABORATORIES. Founded 1894.
Therapeutic investigations in Bacteriology, Physiology, Pharmacology, Serology and Veterinary Medicine.

THE CHEMICAL RESEARCH LABORATORIES. Founded 1896.
Chemical investigations and researches, particularly in connection with organic, organo-metallic and synthetic medicaments.

THE HISTORICAL MEDICAL MUSEUM. Founded 1913.
Illustrates the evolution and practice of medicine, surgery and allied sciences throughout the world from prehistoric times.

THE MUSEUM OF MEDICAL SCIENCE. Founded 1914.
Presents a new system of visual teaching and a general survey of human disease from every aspect.
