

As soon as I hear, which
cannot be for 10 or 12 days,
I will communicate with
you. I am particularly
obliged for the very interesting
& valuable fact about the
hornless female of Bos, &
about the canine teeth of Sus.
I shall be very glad to receive
the paper which you kindly
promise to send me, & for the
paper just rec'd on - Myodes -

I read some time ago with
much interest your memoir

on the extinct species of
Quadrupedia.

Believe me

dear Sir

your very faithfully

Charles Darwin
