In the early days of this country, po-
dered by the beauty of nature and the grandeur of the rolling hills, the humble homes of the early settlers were simple and unpretentious. The first gardens were cultivated for practical purposes, to provide food and medicine. As society evolved, gardens became more Formal, with paths, lawns, and ornamental plants. The design of the garden was often inspired by the architecture of the house, creating a harmony between nature and man-made structures.

Marble was introduced into the garden landscape by the builders of the Old World. The use of marble in garden design was not only for its durability and beauty but also for its ability to reflect light and create a sense of grandeur. The use of marble in fountain basins, statues, and benches added an element of elegance and refinement to the garden setting.

In the 19th century, the use of marble in garden design became more widespread. The use of marble in statues, fountains, and garden seats became a hallmark of formal gardens. The use of marble was not limited to sculptures but also extended to the construction of garden paths, steps, and benches.

Marble is known for its durability and beauty. It is a material that has been used in garden design for centuries. The use of marble in garden design is not only for its aesthetic value but also for its practicality. Marble is resistant to weathering and can withstand the wear and tear of garden use. The use of marble in garden design is not just a matter of aesthetics but also a matter of practicality.

The use of marble in garden design has been a tradition for many years. The use of marble in garden design is not just a matter of aesthetics but also a matter of practicality. The use of marble in garden design is a testament to the beauty and durability of this material.

Sentinels of the Season

"Brightness and beauty are always in season when marble comes into the garden."
