...
Recall anything that I have spoken to in reference to it.

2. Have you talked with Mr. Leavitt in regard to this matter?

Mrs. S.:

2. Have you talked with Stephen A. Reed in regard to this Whipping?

Mrs. S.:

2. Never in your life?

Mrs. S. [Silent, I will recall that, as far as I spoke to Stephen Reed in reference to this case, that not in reference to the whipping of what did you say to Stephen Reed in regard to this case. State your conversation with him, when it was and where?

I asked him how he was getting along with the affair, whether it was going to be serious to him or not. I didn't say anything about the whipping, how many times did you converse
with him in regard to this matter?

Only once.

When was that?

Well, I can't recall the exact date. I think it was the day before yesterday. I was going down town in the evening and he was just coming out of his house to come up here.

Are you sure was that in that conversation you said nothing in any way to convey to him the meaning that there had been men whipped or hanged or slipped or shipped in anything of this kind in this forest?

No sir, I did not.

Or that you knew something which you might tell?

No sir.
Je m'engage à vous rappeler...

P.S. Je m'engage à vous rappeler...

[Date]
examination in that case?

Yes sir.

2. Conducted by whom, and who was present?

It was conducted by Doctor Dougall, and myself, and Dr. 

Heid was present, and Doctor

Driggs was present, and States 

Attorney Henderson was present, 

and yourself Commissioner A. M. 

James and Major McClellan 

were present part of the time.

Having that post mortem ex-

amination, did you discover any 

bruises or marks on the body 

of this complainant?

Yes sir.

2. Describe to the Board of Com- 

missi:iners, as near as you can, 

what you saw?

Well, they were superficial marks 

I noticed one especially that

my attention was drawn to on 

the thigh. That showed a mark 

just exactly the middle of this 

strap, and it was well defined.
At the time we did not know what had made it, but on subsequent finding that strap, we very reasonably came to the conclusion. I think, that it was made with the strap, and there were some marks on the buttocks.

1. Have you ever seen that before, if so, state when?

0. That was produced at the time of the inquest.

2. What was the testimony in regard to that strap— that it had ever been used upon the person of this complainant?

Yes sir, that it was the one that Mr. Reed said he used.

2. What is your profession?

I am physician and surgeon.

2. How long have you been a physician and surgeon?

Four years.

2. What, in your opinion, are the marks on marks that you saw before
intel has a bit more control. He reasons how to buy parts, but the planning process is
still uncertain. He analyzes the risks and decides to proceed with caution.

He orders parts and assembles the smaller machine. The larger machine is more challenging,
and he struggles with the assembly process. He takes his time, ensuring everything is perfect.

In the end, he成功完成两个项目。
the person of this Conciet? I shall, have pretty sure that one of them was made with this strip, the one I speak of on his thigh. The other marks were not defined, they were not just of a certain width but seemed to be more exarnination upon the thigh, and I think there was some higher reference his back.

2. When did you first discover these marks?

I think I discovered them when we went to make the post-mortem examination. I did not notice them when I first saw the deceased Conciet because his clothes were on him at that time; when he was first stripped I saw these marks. It was on the morning that the inquest began.

I have, if you have any knowledge of the existence of this strip, and that it had been used upon another.

convict, would you have come to any conclusion at that time as to what had caused this mark on the arm? What do you now your opinion, as a physician?

If I had known of the existence of this strap, and knew that it had been used, I think I should have been of the opinion that it was jammed by the strap. I thought at the time that it was caused by something worn about it being pressed by her flogging me some previous times, but I didn't think very much of it at the time. It was thought of very little, in fact, but thinking over it after wards, and I remember that Mr. Flowerd at the time took out his rule, and measured the width of the mark on his thigh. It was so plain that he could measure the width
