Monday morning

Dear President Harper,

I am much obliged for your note written just before you went to New York and I feel confident that you are doing everything in your power on the matter. The medical undertaking is enormous I know; I appreciate its magnitude fully and do not want it unduly hurried on any account — least of all on mine. Miss Halley and I will however still cling to the hope for a day or two that we may still be

Yours very faithfully,

Lovelys J. Baker.
Trout Lake, Wis. Sept 3, 1901

My dear President Harper,

I shall not be discouraged even if things proceed more more slowly than we might wish. We will work away and I have confidence that under your leadership all will come right. There is a light in the dark too, much comfort in the familiar motto of the University.

Yours very faithfully,

[Name]
The letter is not legible due to handwriting and other markings.
January 12th, 1903.

My dear Dr. Barker:-

I have not overlooked the matter of your vacation credit, and shall be glad to take it up with you at an early date. Dr. Billings will speak with you about looking into the Baptist Hospital. They have made a proposition to us to come into the same relationship as that which is sustained by the Presbyterian Hospital. Will you kindly take the matter in hand?

Yours very truly,
January 27th, 1903

My dear President Harper:

I feel that I must write you and express my gratification and that of the members of the Biological group with whom I am immediately associated for the appropriation which has been made through your efforts, towards the extension of the biological library. With this $20,000.00 a very large number of most important books can be added. The completion of the journal sets will be of special value to research workers. I think that if you and the Board of Trustees knew how much this appropriation is appreciated by the more advanced investigators in the biological departments, you would have no
January 8th, 1909

My dear Dr. Harper:

Please accept my thanks for your letter of January 7th and the kind words which it contains.

With much appreciation, I remain yours very truly,
My dear President Harper:

I feel that I must write you and express my own gratification and that of the members of the Biological group with whom I am immediately associated for the appropriation which has been made through your efforts, towards the extension of the biological library. With this $20,000.00 a very large number of most important books can be added. The completion of the journal sets will be of special value to research workers. I think that if you and the Board of Trustees knew how much this appropriation is appreciated by the more advanced investigators in the biological departments, you would have no doubt at all that the step was well advised.

Yours very faithfully,

My dear Dr. Barker:—

I am writing to say that I did not overlook the suggestion which I made sometime ago to bring you into touch with Mr. Rockefeller during his visit with us on his return home. I found that he had only two hours to spend with us on Thursday and this he wished to devote to the buildings. He expressed himself very strongly on the medical matters, and I am hoping that he will be ready to take them up very soon. If there had been any chance at all I should have arranged for you to have had a little talk with him. It is possible that I may ask you to accompany me in a visit to New York City when you may be able to take these matters up.

I trust that you are getting some rest. I confess that the last time I saw you I was a little anxious because you looked so tired.

Yours very truly,
April 1883.

My dear Dr. Barker:

I am willing to say that I did not overlook the

suggestion which I made sometime ago to plant you into

with your Rockefeller country. The article with me on the return home.

I found that we had only two rooms to sleep with me on the train and

the idea was to devote to the publication. I hope that you will not

very strongly on the subject matter and I am hoping that you will

go ready to take them up at once. I have had seen any change

at all. I have been working on them a little. I believe that I may say you to recommend me at

with pride. It is the only way to get you to see if I cannot see to bring these matters up.

I trust that you are getting some rest. I continue that the last

time I saw you I was a little mistaken because you looked so tired.

Yours very truly,
April 28th, 1903.

Dear President Harper,

I think the floor space estimated is about right. Hygiene and Buchanan are not adequately represented.

My dear Dr. Barker:

I had a talk with the architect yesterday in reference to the medical buildings. He is working on them in connection with some work done on the Harvard buildings. Within a short time he will be able to give us the results of his work. He thinks that he will be able to do this within the next two weeks. I appreciate the importance of pushing the matter.

Yours very truly,

[Signature]
April 26th, 1905

My dear Dr. Perker:

I find a talk with the apple sauce necessary.

In reference to the medicat mutilations. He is working on them in connection with some work done on the heavenly mutilations. Within a short time he will go up to give us the returns of the work. He thinks that he will be able to get these within the next two weeks.

Appreciate the importance of breaking the matter.

Yours very truly,

[Signature]
Dear President Harper,

I think the floor space estimated is about right. Hygiene and Bacteriology are not adequately represented at Breslau. Our estimate is a much better one.

After the architect has given us the general outline, I think the Committee should plan the details and submit again to the architect. There has been great delay with these plans. Could not the architect settle the general outlines at once and the Committee deal with the inside plans during the next month?

Yours faithfully,

Lowell F. Barry

[Date]
Same way now. There are certain special reasons why such a plan might be particularly advantageous if acted upon at once, among others that that firmer and the head of the Rockefeller Institute are to spend the coming year in Europe and have intimated to me that it might be to the mutual advantage of the Rockefeller East and the N.F. C. if I co-operated with them in Europe in studying plans for the development of research hospitals. If you approved I suppose I'd be glad to

UNIVERSITY CLUB
1510 WALNUT STREET
Sept 20, 1903

Dear President Harper,

As I hear that you are to be back at the University by the 20th or thereabout, I am cutting my holiday a little short in order to return and see you before the session opens. Some time ago you suggested to me that the University might ask me to spend a year (more or less) abroad as soon as the Rush million was raised. I wonder if you feel the...
arrange to go abroad in October. It would be necessary for me to return by the following September, 1904, as the World Congress of Medicine at St. Louis have made me Chairman of the Section in Anatomy and Comparative Anatomy.

It is a very great pleasure to me to tell you that there is hope that our long-wished-for realization of plans for research medicine and surgery is approaching. You have always counselled patience. I know, assuring me that all would come right in the end, and though it has sometimes seemed rather long to wait, I am sure you have been moving as fast as is wise. I do hope that at least some of the appointments in research medicine and surgery can be made now, and that the facilities for the work may readily be provided. I expect to be in Chicago Sept 19 or 20, and would appreciate it very much if you could give me the opportunity to present some ideas that are running in my mind.

I hope that your vacation has given you new stores of health and energy. Yours very faithfully,

[Signature]
My dear Dr. Barker:

Your letter of October 5th was duly received. I did not know until this (Wednesday) morning at 11 o'clock, that I should go to New York this week. It has seemed for some days that the visit would be postponed until the 19th of October. I feel quite confident that our friends in New York will not be able to consider the third of the questions suggested in your letter, but I will do what I can in the matter, and if there is anything to be said I will telegraph you. I confess I am not very hopeful in this whole matter, and I am afraid that we will gain nothing by pushing it just at this time. I need not explain to you that I appreciate on the other hand your embarrassment, but this matter is too large a matter to be hurried and cannot easily be adjusted to our wishes.

Yours very sincerely,
My dear Mr. Perkins:

Your letter of October 26th was only

received. I did not know until this morning of if

October 26th. I am sorry to go to New York this week. It seems to me

some days flat the time would be postponed until the 1st of

October. I feel quite confident that our elections in New York will

your letter, but I will do what I can in the matter, and if there is

anything to be said I will write to you. Of course I am not very

enjoying in this matter, and I am glad that we will resign

noticing the people at this time. I need not explain to

you that I appreciate on the other hand your correspondence, but

these matters are too far a matter to go further and cannot easily be

enjoyed to one's wishes.

Yours very sincerely,
The Quadrangle Club.
Chicago
Oct. 5, 1903

Dear President Kellogg

I forgot to mention to you that owing to deaths in November during recent years in both Miss Kellogg's family and mine, that month is barred as a time for marriage—hence our great anxiety to be married this month, October. If we could know by Oct. 10 or 15th at the latest he could still arrange to come at the end of the month, but of course the earlier we can know the better as in any case it
October 8th, 1909

will be a tremendous rush for my fiancée. Again if we are to go abroad, it is important to go at once, for if we postponed marriage until December, a great hole would be cut out of the winter and then would be but little time available for work. Would it be too much therefore to ask you to telegraph me from New York, should you be able to settle the following points, viz:

1. If there is a chair of research medicine of sufficient rank, to lend itself to European or American work until opportunities such as are referred to in my former letter can be provided or the Warship.

2. Whether department and at least one of these proposed hospitals be established at once as possible.

Yours very faithfully,

Oct. 19, 1903

Dear President Harbor,

I wish to thank you from the bottom of my heart for heeding me to arrange (and so quickly) for the year abroad which means so much to me for personal as well as for medical reasons. A University President might easily have seen my problem thru quite different spectacles, and it will ever be matter of gratitude with me that

The Governor's Club
Oct 6 1942

Dear President Hefter,

I hope this letter finds you well.

I have been in touch with several people regarding the availability of the facilities and resources necessary to host the Governor's Club meeting this weekend. It seems that all arrangements are in place, except for a few logistical issues that need to be addressed. I believe we can overcome these challenges and have a successful event.

Please let me know if you have any concerns or if there is anything else I can assist with.

Sincerely,

[Name]

[Signature]
My dear President Higher,

I was whisked off here at short notice to give testimony as an "expert epidemiologist" in the Chicago Drainage Canal Case. As I go directly from here to Baltimore I shall not see you to say goodbye; this, I tried to do so before coming here.

Goodbye for a year and let us say again how grateful I am for your kindness in facilitating this trip.

Yours very faithfully,

Lewellys F. Border.
Dear [Name],

I am writing to extend my heartfelt congratulations on your recent achievement. I am truly impressed by your dedication and hard work, and I have no doubt that you will continue to excel in your future endeavors.

Your accomplishments are a testament to your talent and determination. I am confident that you will continue to make a significant impact in your chosen field.

Please accept my sincere congratulations and best wishes for your continued success.

Sincerely,

[Your Name]
October 22nd, 1903.

My dear Dr. Barker:

I am happy to say that the trustees voted Tuesday afternoon to grant you six months leave of absence from April first upon a basis of two-thirds salary, with the understanding that you were to devote yourself during this period in the interests of the University to work of collecting data for the future development of medical work and medical buildings in connection with the University.

No action was taken in reference to the extra fund. This is something which will be considered later.

Yours very truly,
Mr. General, Dr. Parish:

I am happy to report that the Finance Board,

To whom I referred your letter of January 1 of this year,

Ille, now a part of the University of the State of New York, has agreed to continue its support of the University to work on educational problems in connection with the University.

We have been in close touch in reference to the state funds. This is something which will go toward the future.

Yours very truly,
You may escape from the
hands of the ever-ready
surgeons. I think you know
how anxious any apprehension
regarding your health makes
many of us, and how glad we
should all be if you could see
your way clear to moderate a
title to the velocity of that pace
which is your wont
with hearty greetings and very best
wishes for a steady restoration to health.

Y our most faithful,

Levallyr T. Bostor

Bayrischer Vereinsbahn
Munchen.
Feb. 28, 1904

My dear President Harper,

A letter from home brings
me the disturbing news that
you are suffering from an
attack of appendicitis. It was
accompanied by the cheerful
report that the attack was
mild so I am hoping that
March 10th, 1904.

Dr. L. F. Barker,

My dear Dr. Barker:

I am on my back in the Presbyterian hospital trying to recover from an operation for appendicitis. The case was a somewhat complicated one and consequently I am not recovering as rapidly as I had hoped.

I have your note of February 21st. The matter of the fund in addition to the two-thirds salary from April 1st will be arranged. I do not know of any fund from the McCormick Institute. I recall that something was mentioned, but this was a responsibility which did not rest with me, and so nothing concerning it has come to my mind.

I hope that you are having a good time. Pardon the brevity of this letter.

Yours very truly,

W. R. Harper
Dr. P. B. Becket

C/o Commercial & Exchange, London, E.C.

My dear Mr. Becket,

I am on my back in the Strand.

The portrait of the President I am not now in receipt of. It will be forwarded to you shortly.

I have your note of receipt of the Statute of the Union. You may style it a Statutory Notice.

I do not know of any record of the pecuniary matter. I expect it to complete our correspondence but it will come to my notice.

I hope that you are having a good time. Persian and Turkey.

Yours very truly,

W. R. Harper
Munich,
Feb. 21st, 1904

My dear President Harper,

Letters and papers from Chicago have kept me more or less in touch with happenings there. I was glad to know that the new Gymnasium has been opened. My wife and I had a delightful two weeks in Spain and another good two weeks in Sicily.

Since the beginning of the year, we have been quietly settled down here in Munich. I am working every day at the Medical Klinik with Prof. Dr. Müller. He is an excellent man, and has a first rate institute for internal medicine. It is a
chances for beginning \textit{research medicine} at
the university are good. For this autumn, Bandley
writes me that Mr. Murphy has paid the
university a visit and that he took a
deep interest in the research work going
on. — I get the last of news from the
laboratory; everything seems to be going as
it should.

Has the matter of the fund in addition to my
\$5 salary from April 1st or 1st been arranged?
I mention it, in case it by any chance had
escaped your memory. I have heard nothing
yet as to any fund also from the Leidler Insti-
tute. It was a great pleasure to me to
learn that Zipes has been headed to the
extent of \$100 by the Institute. He is a very
superior man and deserves recognition. His work
on the 'lethality of Catherine' is being talked
of all over Germany. It would be a fitting
recognition on the part of the University if he could
be given an Assistant Professorship. What would you
think of it?

Dr. Billings wrote me fully of his second semester.
Obviously Bevan and McCarty increased just in
time to save his life. I hope to may now be
restored to good health.

Both Hoppen and Nader of the Rockefeller Institute are
here in Germany. They are working along lines similar
to these I am following. My wife is well and 
writing the
remembrance to you. Very faithfully yours,

\textit{Revels}.

\textit{Yours},

\textit{H. N. Revels}.
pleasure to be really doing the work to which I have so long looked forward. The semester closes here early in March. In the end of March I shall go to Vienna and study the medical hospitals and conditions there, and then go to Berlin for the Summer Semester. Later I hope to be able to go to Paris for a time as the new hospital there in connection with the Pasteur Institute has been especially designed for the study of contagious diseases and is said to be a model of its kind. Helen has written me of the progress the McCormick Institute is making. I hope that our
It was very good of you to write me from the Presbyterian Hospital, but I fear that you did more as a convalescent patient than your surgeon would have approved of. I am glad to learn that you are again quite well and it will be a satisfaction to know that the processes veriuniformis can give no further trouble.

My work in Munich was very profitable to me and I learned much which I believe will be of use to me in Chicago. The weeks and holidays between the Summer semester gave me the opportunity of doing several things among those of visiting the New General Hospital in Würzberg (visited now by all intending to construct new hospitals), the Katharinen Hospital in Vienna, a fine new hospital with 32 wards for infectious diseases of children, the Austrian serum institute, I attended the Congress of Minero Medizin in Leipzig and the Congress of Anatomie in Jena.
My wife and I are now settled down in Berlin and I am again at regular work. Krane is the best man in internal medicine here, and Emil Fischer's laboratory is a model of organization. Flexner and I have tables side by side and we are profiting much by our experiences here.

The Institute for Clinical and Experimental Pathological Physiology in Austria are most interesting. I wish to talk to you about them when I return.

Bensley writes me most cheerfully from the laboratory and I am delighted that things have gone so well. I regret much to hear from several sources that Stewart has not been altogether happy. I suppose it is hard for one who has been anything in a small medical school to come to a large place and find that he must work as a member of a group. Perhaps all is going well with him by now; I hope so. You will have heard of the death of his and of that of Vauyn and of that of Duc de Laulau. Three strong men gone. I hope to see Metten here soon. My wife and I said both good and so I have to be at the Congress in St. Louis.

Yours very faithfully, 
Leavells F. Boste.
President Judson,
Chicago, Ill.

My dear President Judson:

I am delighted to see by the newspapers that the great gift for medicine has at last come to you. This is something that the friends of the University have looked forward to for many years, and I rejoice with you in the prospects of the future of medicine at Chicago.

With best greetings, I am,

Yours faithfully,

[Signature]
President Lincoln,

Chicago, Ill.

My dear President Lincoln:

I am delighted to hear of the Congress's action. I understand that the great gift of the Freedmen's Bureau is its ability to do something about the problem of the Union. I have looked forward to your support and I recognize that you have contributed to the Union's success in maintaining its existence.

With best wishes,

[Signature]

Yours very faithfully,
Chicago, November 25, 1916

My dear Professor Barker:

Thank you very much for your kind note of the 23d inst. We are certainly interested in what we hope will be of great benefit to the medical profession throughout the country.

With cordial regards, I am,

Very truly yours,

H.P.J. - L.

Dr. Lewellys F. Barker
1035 N. Calvert St.
Baltimore, Maryland
