Admissions
President W. R. Harper,

University of Chicago.

Dear Sir:-

In accordance with the general policy of the University this Department took early steps toward the publication of a Journal of Geology and announced such a publication in the Program of the Department issued at the opening of the year (Page 14).

Arrangements for this have been in progress since. Owing to the fact that our plans for it are unusually large we have had much correspondence and the work of organization has progressed slowly, but I am happy to assure you, very successfully, and is now essentially complete. We proceeded on the understanding that an appropriation of $5000 had been made for the several journals and that only the question of specific allotment to our journal remained. We delayed making application for such specific allotment until our plans had so far developed that we could form an estimate of what might be necessary. We had gone so far at the time of the recent action of the Board on our specific application that we could not honorably retreat and we have, therefore, felt compelled to go forward with our arrangements.
DEPARTMENT OF GEOLOGY

The University of Chicago

CHICAGO, Ill., May 18, 1883.

President W. E. Harper:

Dear Sir:

In accordance with the general policy of the University

the department took early steps toward the preparation of a

text book in geology and announced such a preparation in the program

of the department taken at the opening of the academic year. It is

with pleasure that we now bear to announce that we have had much

success in the preparation and the work of organization of the proposed

text book. We have been engaged on the preparation of the manuscript and

that only the decision of the committee to give the work a general

character, the adaptation of the subject matter to our courses

remains. We are now preparing a finished manuscript for such a general

work and have plans for the development of it as coming years

may require. We hope that the course of the department of geology at

the University of Chicago will be available for the advancement of the

sciences of which it is a part.

We are, etc.,

[Signature]
We hope, as you know, to make the journal an international semi-quarterly of the highest order. Sir Archibald Geikie, Director-General of the Geological Survey of Great Britain, has furnished us an initial article and has kindly consented to act as an associate editor. Other distinguished European geologists have promised us articles and we are hoping to receive acceptances of associate editorship within a few days from Dr. Chas. Barrois, of France, Professor Rosenbush, of Heidelberg, Professor Kremnner, of Leipzig, Professor Penck, of Vienna University, Dr. Reusch, Director of the Norway Geological Survey, and Baron DeGeer, of the Swedish Survey.

In this country the following representatives of the leading universities have consented to act as associate editors:

Professor W. H. Williams, Yale University, Professor G. H. Williams, Johns Hopkins University, Professor Joseph LeConte, University of California, Professor J. C. Branner, Leland Stanford Jr. University, and we are expecting acceptances from Professor G. K. Gilbert and I. C. Russell of Michigan University. These being geologists of the very first order and standing as representatives either of great institutions of learning or of great geological organizations will, we think, give the Journal at once a standing of the highest order and will make it an honor to the University, beyond what a simple
We hope, as you know, to make the journey an important
journey, so that the various students at the Catholic
University of America and the Catholic University in
directions General of the Geographical Survey of Great Britain,
and in particular to be in touch with the kind of contacts that
are being sought by the American Geographical Society.

We are pleased to announce that we are working to receive the
acknowledgments of the following representatives of the
American Geographical Society:

Professor W. H. Williams, Yale University; Professor E. G. Willing,
John Hopkins University; Professor Joseph Levenson, University of
California; Professor O. C. Brainerd, University of Wisconsin;
and we who acknowledge these by a letter from Professor E. H. Clifford.

I. C. Roper of McGill University.

We trust you will readily recognize that the questionnaire sent out
will make it as proper to the University of this paper a sample,
and we believe it as proper to the University paper as it is a sample.
local and institutional organization could.

In view of the circumstances under which the Board of Trustees finds themselves placed financially I am willing to join you, as you have suggested, in assuming the responsibility for until any deficit the Board finds it possible to make an allotment to meet it, with the understanding that the Journal is to go forth under the auspices of the University as at first contemplated and with the expectation that this will be but a temporary arrangement to meet the existing emergency.

Very respectfully yours,

T. C. Chamberlin

Therefore joint with me Chamberlin
in presenting the deficit
in the Journal of Geology
on the first year of
its publication.

William H.Hotcker
My dear President Harper:

I have seen Mr. Gurley and he expresses his willingness to have the title of his position fixed as you desire.

I have given further consideration to the suggested postponement of Professor Van Hise's courses from next year to the year following, and find it impossible to determine now whether it would or would not be a serious disadvantage. It would apparently be inadvisable in itself considered, and on that account I am reluctant to concur in the postponement. If the financial considerations are strenuous, might not the courses be announced to be given either in 1901 or 1902, then if there are a considerable number of students to whom it is very important that they should be given in 1901, perhaps the finances may then be such as to permit it. If there are not many who cannot wait, or the finances are prohibitive, the courses can then be postponed.

Very respectfully yours,

[Signature]
Dear [Name],

I am writing to inform you of some exciting developments in the field of [specific subject]. As you know, [firm name] has been at the forefront of innovation in [specific area] for many years, and we are pleased to announce that we have recently made a significant breakthrough.

Our research team has developed a new technology that promises to revolutionize the industry. The technology, which we have code-named [project name], incorporates advanced [specific feature] that will allow us to achieve [specific goal].

We are currently in the process of testing the technology on a large scale. Our preliminary results are very promising, and we are confident that we will soon be able to bring the technology to market.

I would be interested in learning more about [firm name]'s sponsorship opportunities for this project. Our team is looking for partners who share our commitment to advancing [specific field]. If you are interested in exploring this opportunity further, please let me know.

Thank you for your time and consideration.

Best regards,

[Your Name]
My dear President Harper:—

The Chicago Academy of Sciences desires to try the experiment of bringing scientific men and the science-loving public together more effectually than it is able to do at its own quarters in Lincoln Park, by holding branch sessions at favorable centers. For the present it is only proposed to try the experiment at the University of Chicago, if acceptable, and at the Northwestern University in Evanston. The Academy would esteem it a great privilege if it could hold its meetings in some of the University rooms. Only three meetings are proposed for the present season, occurring about a month apart. Professor Michelson and Nef are to address two of these. Probably they would prefer their own lecture rooms. On behalf of the Academy, I beg to inquire if the University will grant the use of its rooms.

Yours very respectfully,
The Chicago School of Economics began to try the experiment
of combining economics and the nature-lending people together
one afternoon. John R. Commons, President of the University
of Chicago, and the Board of the University of Chicago,
the Chicago Board of Trade, etc., have done it. The experiment
in the University of Chicago has been a great success. It has
shown that the welfare of the University community is
increased by the cooperation of the University and the
Chicago School of Economics. Only the University has the
ability to work in harmony with the University. Only the
University has the ability to exercise control over the
Chicago School of Economics. Only the University can
make a complete plan for the University. Only the
University has the ability to exercise control over the
Chicago School of Economics. Only the University can
make a complete plan for the University.
My dear Professor Chamberlin:

I am enclosing a statement prepared by Mr. Miller and signed by him in accordance with the outline proposed by you. I have read this with some interest. You will realize, I am sure, the difficulty of adjusting this matter in all its details. I am very sure that an honest effort has been made by Mr. Miller. In view of this departure from the constitution it is necessary for me to take a special responsibility, and I am confident that you will be inclined to assist me as much as possible. If this meets your approval I will sign the enclosed statement.

Yours very truly,

[Signature]
My dear Professor Gompertz,

I am writing to request your permission to suggest a change in some aspects of the outline program for your course. I have read the lecture notes and found some interesting points that I would like to add to the material I am currently working on. However, I have noticed that the outline does not cover all the necessary topics. In view of this, I would like to take a special examination, and I am confident that you will find the results to be as much as deserving the attention.

I hope that you will agree with my proposal.

Yours truly,

[Signature]
November 1, 1904.

Mr. Thomas C. Chamberlin,

The University of Chicago.

Dear Mr. Chamberlin:-

I beg to hand you herewith a statement bearing on the production of the Journal of Geology for the current year, which has been worked out along the lines laid down in your recent proposal. You will note that your outline has been followed and where it has not been possible to adopt your suggestions exactly that we have commented on the same. The following, therefore, may be taken as the basis of your authority for issuing instructions to the University Press for the fiscal year 1904-1905:

I. Printed Matter

1) Cover, title page, table of contents, etc., to follow usual style.

2) Presswork, stock, and binding of eight numbers, aggregating 840 pages, in editions of 850 copies, based on the following composition and other specifications.

<table>
<thead>
<tr>
<th>11 point</th>
<th>560 pages</th>
<th>single price</th>
</tr>
</thead>
<tbody>
<tr>

Re: Executive Committee

Dear [Name of Committee],

I feel a keen sense of accomplishment and satisfaction in the presentation of the summary of results for the current year's operations. I have been considering our efforts and our progress over the past year and believe that we have made significant strides.

As I look forward to our future, I am excited about the potential for growth and expansion. I believe that our team is well-equipped to take on new challenges and opportunities.

I would like to express my gratitude to all members of the Executive Committee for your hard work and dedication. Your contributions have been invaluable.

Sincerely,

[Your Name]
Alterations will be charged for at the rate of 75¢ per hour, and $150.00 has been set aside for this purpose for the year.

II. Illustrations in the Text

3) Provision has been made for 600 square inches of line drawings to be reproduced by the zinc line process.

4) Provision has been made for 560 square inches of half-tones.

III. Plates or Inserts

5) Provision has been made for two zinc inserts aggregating 60 square inches.

6) Provision has been made for three half-tone plates aggregating 72 square inches.

7) No provision has been made for lithographic plates.

8) Provision has been made for one two-color plate of 24 square inches.

9) Provision has been made for two folded inserts of type matter of 64 square inches, composition to be 8-point double-price matter.

In making up the estimates it has been found impracticable to provide for the displacing of type matter by cuts. This cannot be done without making provision for the spacing in of the cuts and respacing the type. As the cost of this work is usually about equal to the cost of the composition displaced by the cuts, the simplest way to provide for this is to figure all the pages as full pages of type, whether they contain cuts or
not. This has been done in the interest of simplicity.

Another point should be noted in this connection with reference to the size of cuts, namely, that a cut containing one square inch costs as much as one containing ten square inches, i.e., cuts of less than ten square inches are figured as containing ten square inches.

IV. Compensation for Contributions

10) No amount is set aside as direct payment for contributions.

11) An allowance, based on the experience of last year, of $150.00 has been set aside for separates to be issued in accordance with your order.

V. Office Expense

12) An allowance of one-fifth of the services of a stenographer, $124.30, has been set aside for the year, together with $45.34 for miscellaneous expenses.

VI. Quality of Stock and Character of Work

To be the same as last year.

VII. Additions by Special Provisions

It is understood that illustrations paid for by contributors, or matter of any kind paid for by funds other than those of the University, shall not be charged against the regular appropriation, and that matter may be added to any extent beyond the specifications noted above if the finances are provided outside of the regular appropriation, on the basis of the regular
charges of the University Press as provided for by its constitution.

**Schedule of Equivalents**

In working on your proposal for a system of equivalents it has been impossible to figure out a satisfactory system covering the published matter complete, owing to the variable cost of presswork and binding per page where forms are run in 4s, 8s, or 16s. A schedule of equivalents can be figured accurately only on the composition, exclusive of the charges for stock, presswork, and binding. The following schedule of equivalents has been arranged for composition, zinc etchings, and half-tones:

<table>
<thead>
<tr>
<th>Size</th>
<th>Single</th>
<th>Double</th>
<th>Plus</th>
</tr>
</thead>
<tbody>
<tr>
<td>11 pt</td>
<td>.0233</td>
<td>.0467</td>
<td>.0467</td>
</tr>
<tr>
<td>10 pt</td>
<td>.0333</td>
<td>.0666</td>
<td>.0666</td>
</tr>
<tr>
<td>9 pt</td>
<td>.0569</td>
<td>.1138</td>
<td>.1138</td>
</tr>
<tr>
<td>8 pt</td>
<td>.0845</td>
<td>.1690</td>
<td>.1690</td>
</tr>
<tr>
<td>6 pt</td>
<td>.1282</td>
<td>.2564</td>
<td>.2564</td>
</tr>
<tr>
<td>Zinc etchings</td>
<td>.07</td>
<td>.14</td>
<td>.14</td>
</tr>
<tr>
<td>Half-tones</td>
<td>.20</td>
<td>.40</td>
<td>.40</td>
</tr>
</tbody>
</table>

In connection with the foregoing it should be noted that in the case of zinc etchings and half-tones a minimum of ten square inches must be established; that is, all cuts of less than ten square inches must be figured as occupying ten square inches.
The request for a schedule covering insert matter cannot be complied with, as there is no way of arriving at a basis for estimating the cost of inserts in advance. An insert containing a cut of ten square inches would cost as much for paper, presswork and binding as one containing thirty square inches. The only possible way of estimating this class of material would be on the basis of the cost of stock, presswork and binding, plus the cost of the half-tone or zinc as the case may be. Colored inserts and those bearing type matter, for the same reason, cannot be estimated in advance.

Sincerely yours,

Transmitted by Pres. Pierce
in a draft of Nov 12, 1904
with a statement that
this was preferred
as given by Mr. Miller.
This appears to be a
duplication from which
the data have been omitted
by inadvertence.
The record for a particular company: Present Position

The position with the firm of Smith in New York is not a place for training or a source for advancement. The work is varied but much of the time is spent in clerical duties. The firm is willing to provide further training if the candidate is willing to accept a position of lower responsibility initially. The position offers a good opportunity for advancement within the company.

The firm is currently seeking a person with experience in accounting or finance. If interested, please contact the company at the provided contact information.
Pres. Wm. R. Harper,

University of Chicago.

My dear Sir:--

In view of the unanimous vote passed at the joint session of the recent educational conferences on Natural History, Physical Science, Geography, Geology and Meteorology to the effect that at least one quarter of the time in secondary schools should be given to the sciences represented by the conferences, and that at least a like proportion of sciences should be embraced in the requirements for admission to all college courses, I desire to give notice that at the next session of the Senate I will move, as an amendment to, or substitute for, the motion of Professor Whitman, that science to the amount of eight majors be required for admission to the University in each group of subjects, three majors of which shall be in Physics or Chemistry, three in Biological branches and two in Physiography, and that groups be modified so as to render these practicable.

If it shall seem that the sum total of requirements will be made too great by simply adding these to the present requirements, I shall be prepared to move, on my own part rather than as a representative of the conferences, that the above amount of science be added to each group, but that only a part of it be
My dear Sir:

In view of theominous vote passed at the
Joint Session of the recent sectional conferences on Natural
History, Physical Science, Geography, Geology, and Meteorology
and the latter part of that section of the time in question
concerning the necessity of requiring to the universities lectures on the
sciences, and that at least a half of the proportion of courses is
enough to the requirements for admission to the college
concerning the necessity of requiring to the next session of
the Senate I will move an amendment to the statute
of the motion of Professor Wiman, that science to the benefit of
which may be a subject for the Institute in each
school of science, whether of which shall be in the
University, those in Biological Sciences and two in Preparatory
and that the number of professors to be in number three respectively.

If it shall seem that the total of amendments in
the Senate to which I have referred to the Institute
be not to exceed the number of the professors
and that I should be altered to move, so may also be.

My dear Sir:
2.

required, the rest being made alternative with certain other subjects in each group, to be named for each group separately and in accordance with the primary design of the groups.

As a preliminary step toward such an adjustment of required and alternative subjects in each group as shall render some one group at least adapted to any line of work to be followed after admission, I will propose that the groups be referred severally to committees representing the departments, in number as follows: Language three committees, History, Mathematics, Biological Science, Physical Science one each, and that each of these committees be requested to present one group of requirements which shall in its judgment be best adapted to prepare students for advanced work in the department it represents, without prejudice to general culture or a fair balance of subjects.

If it will remove any objections to the adoption of the proposed addition, group or its equivalent, I will move that the degree of Doctor of Science be offered on the same conditions as the degree of Doctor of Philosophy, except that Latin be not required for the former degree.

Yours respectfully,
retraining, the part time work assignments with certain other
subjects to each group to be manned for each group separately and

in accordance with the primary category of the groups.

As a preliminary step toward more comprehensive
readiness and effective usage in each group an initial report
some one group at least wealthy to any type of work to be followed
after examination I will proceed that the courses already

assigned to committees representing the departments of computer

follow: In advance those committee, head of course and each of

joined committees be requested to present one draft of outline

within which to the subject on point assigned to human at

given for changing work to the department's ambitious

preferable to recommend certain to a trial phase of outline.

It will then be an opportunity to the preparation of

the program which you have to the department. I will have them

the choice of Doctor of Science or altering the same condition

as the course of Doctor of Philosophy, except that likely to not

reduce for the course content.
Dr. William R. Harper,

President University of Chicago.

Dear Sir:—

I have been shown a communication addressed to you by several members of the Senate relative to the negotiations with Dr. Andrews. On reflection, I am not content with a simple refusal to sign it. I desire to enter my emphatic protest against it, first, because it seems to me to be an attempt to intrude upon the functions, privileges, and discretions of the President, and second, because it seems to arrogate to the Senate functions that belong to the University Council.

The question involved appears to me to be one of administration in the most declared sense of the term, and, if it does not fall wholly within the province of the President (and the Trustees), falls within that of the Council and not of the Senate.

I believe that the specific questions that relate to the presidency fall wholly within the province of the President and the Board of Trustees, and that the President and the Board are
Dear Sir:

I have been aware of your communication regarding the possibility of the University of Chicago accepting Dr. William H. Harper as President.

Dr. Harper has been recommended to me for Director of a project with a particular scientific interest. I believe it would be of great importance to the University of Chicago if he were to accept the offer. It is a matter of great importance that the appointment of the President should be a decision of the University Committee.

I am writing to express my approval of the President's recommendation.

Sincerely yours,

[Signature]
entirely free to use their discretion in advising with the Faculty, or any part or member of it, relative to such questions. I believe that an efficient administration of the University requires that this province and this discretion shall remain untramelled and inviolate. While, in general, as free consultation with the Faculty as the nature of the case may render discreet is doubtless wise, such consultation is to be regarded as a discretionary extension of function and not as a privilege to be claimed by the Faculty or any part of it, much less as an obligation to be insisted upon.

If any organized section of the Faculty has any grounds for urging that the President should consult it in this matter, it is the University Council, since the question relates "to the administration of the University" and not to its "educational work and policy." By insisting that the President is under specific obligations to make the members of the Senate his confidential advisors in this matter, the signers of the communication seem to me to be endeavoring to divert from the Council to the Senate functions that belong (if they belong to the Faculty at all) to the former body.

I therefore enter my protest against the claims urged in the communication, which, I may be permitted to say, was drawn without consultation with some other members of the Senate.
sustained pace to use their ability to maintain with the faculty
on any point of principle or practice to which they object. I have
definitely stated in my statement submitted to the University
regarding the proviso that the proviso may be struck out in the course
-although it is inadvisable. It is necessary to encourage the faculty and the whole university
towards the faculty as a whole, for the sake of the system of education to be continued as a
therapeutic examination of the system and not as abling or to be
acceptable to the faculty as a whole, if not unnecessary.
If any one desires to section of the faculty and any community
for making the prescribed share of their duties in this matter of
the University Committee, some the American Revised "to the
simultaneous of the University" and not to the "authority of our
and Bolton." By indicating that the President is unable to
opportunity to make the co-operative of the Senate the consultire
prove or state matter, the effect of the communication seems to
me to be unnecessary to grant from the Committee to the Senate
important that I am not applying to the faculty or the Senate.
the latter part.
I can not exchange our benefits but the benefit of the same manner
to the communication, which I may be better to see, are drawn
without communication with some other members of the Senate.
besides myself and, without granting me the privilege of being heard, at my express wish, before it was submitted. I respectfully urge that, whatever action you may take on the ground of personal comity, nothing shall be done that shall recognize a vested function or privilege inconsistent with the free performance of the presidential function and with the untramelled exercise of those discretion which are so inseparable from an efficient administration of the University.

Very respectfully yours,

[Signature]
My dear Mr. Chamberlin:—

I am returning to you a letter received from you December twenty-first, 1901. Will you be kind enough to go over this and see how the matter now stands? What should we try to do?

Yours very truly,

[Signature]
Chicago

Jn. 29th, 1908.

My dear Mr. Chamberlain:

I am returning to you a letter received from you December 28th last, 1907. Will you please kindly send me a copy of the letter, may see how the matter now stands.

Yours very truly,
President William R. Harper,

The University of Chicago.

My dear President Harper:

The report of the Director of Walker Museum contains the following recommendations involving appropriations to which I beg to invite special attention.

1. An allotment for administration sufficient to provide for the mechanical and clerical work on the Gurley and other collections of fossils and on the Billings and other collections of minerals. (Page 2, Director's Report; page 7, Curator's Report, Appendix I; special letter of Dec. 21st.)

3. Show case for the Billings collection. (Director's Report, p. 3; Curator's Report, Appendix II, p. 1.)

4. Minor needs of Paleontologic collection. (Director's Report, pp. 2 and 3; Curator's Report, Appendix I, pp. 7 and 8.)

5. The need of ampler space in the immediate future. (Director's Report, pp. 3 and 4; Curator's Reports, Appendix I, pp. 6-8 and Appendix II, pp. 1-3.)

Very respectfully yours,

[Handwritten addition]

The above sections of the report contain

[Handwritten note]
Chicago, Ill., June 12, 1913.

My dear President Judson:

I am not content to leave the gratification that I felt at the Convocation over the announcements of gifts without a formal expression of my appreciation and a word of congratulation to you and to Mrs. Judson. Beside the great and very obvious benefits to the University, to the interests of the women, and to our departments, I cannot but feel that the gift of Mr. Noyes has a critical value to himself as well as the administration of the University. For some time I have been in such relations to Mr. Noyes as to lead me to watch with deep interest the turning of the balance toward the best things or toward other things—good, indeed, but not quite the best—and am deeply gratified that the decision has been so eminently laudable. I also feel that the influence of this gift, coming just as it has, is an important contribution to the external aspects of your administration in which I feel so deep an interest. It was indeed a most memorable convocation.

Very sincerely yours,

President H. P. Judson,
The University of Chicago.
My dear President Andrews:

I am not convinced to issue the proclamation that I feel it

the Constitution does not authorize the President to

exercise of my responsibilities as a member of the University

and to the Senate. However, I do not agree with your action.

The University to the interest of the women, and to our ge-

ral welfare, I cannot but feel that the best of all women's re-

sponses to the University as well as the administration of the Univer-

sity. For some time I have been in much meditation on all the women

that lead to women in action, with deep interest, if the future of the nation.

Now that the seat is open for women's rights, I feel deeply

not only for the peace and prosperity of the nation, but for the peace and prosperity of the nation in all.

I also feel that the influence of the seat is not only

come from, but as it may be, to an important contributor to the

exact position of good administration to which I feel so deeply

interested. I see nothing a most serious misfortune.

With affectionate regards,

President R. L. Page

The University of Chicago
President H. P. Judson,

University of Chicago,

Chicago, Ill.

Dear President Judson:

Your letter of the 19th has been forwarded to me from Philadelphia, and just received here. I think your plan to have the plaster cast of the bust of Prof. Chamberlin put in bronze is excellent, and I am very glad to contribute to the cost of doing this. You say that the cost will be $150, and that your idea is to have about half a dozen people contribute to it. This would mean a contribution of $25 from each one of the six, and I therefore enclose herewith my check for this amount. If you find any difficulty in raising the rest of the money needed I will be very glad to contribute more. I feel that it is a pleasure and privilege to be allowed to participate in this token of respect to Prof. Chamberlin.

Some years ago I was one of the contributors to a bust of Prof. Chamberlin and I suppose it may be the one to which you refer. I have a plaster cast of it and think it excellent.

I was very glad to have come to the University of Chicago for the dedication of the new geological building, Rosenwald Hall, and especially to have had the pleasure of meeting you and Mrs. Judson again. I always have the pleasantest recollections of my former connection with the University, and my ever cordial
President N. P. Jordan

University of Chicago

Chicago, Ill.

Dear President Jordan:

Your letter of the 16th has been forwarded to me from Philadelphia, and I have received it. I think your plan to have me present at the graduation exercises at the end of the year is excellent, and I am very glad to contribute to the cost of the trip. You say that the cost will be $150, and that your collection will cover that amount.

I was glad to have my parents and a few relatives contribute to it.

The money means a great deal to me, for I am in need of money. I also wish to have some money to enable me to write my paper for the University of Chicago.

I am very glad to have come to the University of Chicago.

Mr. Jordan says I must have the pleasure of receiving you. I am very glad to have the pleasure of receiving you.

I am a former connection with the University, and I very much appreciate the kindness shown me.
relations there; and it was with great regret that several years ago I found that other calls upon my time compelled me to resign. I shall, however, always take the deepest interest in the progress and welfare of the University, and I have many times had occasion to admire its growth under your admirable control.

Sincerely yours,

P.S. My address will be Brown Palace Hotel, Denver, Colorado, until April 10th. After that I will return East, where my address will be 460 Bullitt Building, Philadelphia, Pa., as usual.
Chicago, March 19, 1915

My dear Mr. Penrose:—

I was extremely gratified at your kindness in coming all the way to Chicago for the dedication. It was an interesting occasion to us who have been so long connected with the work, and I hope that you found it worth while. It may not be a gracious return to you to now propose something else, and yet I think that you will be interested in it. We have a very good plaster cast of a bust of Professor Chamberlin made some years ago by Lorado Taft. It seems to me that it ought to be put in bronze. This can be done for $150. It occurred to me that the nicest way to have that handled would be not for it to be given by any one person but by a group of possibly half a dozen gentlemen, of whom I should be glad to be one, and I was wondering whether you would care to join. We would have it done next month, and put in some proper place in the Rosenwald Hall. I
My dear Mr. Boniface:

I am extremely excited at your kindness in coming with me to Office for the dedication. I am an international occasion and I hope you have been so kind connected with the work and I hope that you found it worthwhile.

I expect to see you soon. How about some coffee some time and I have a think that you will be interested in it. And keep pleasant care of a part of Professor Communicating. I seem to me that this can be done for 200. It seems to me that the nearest way to have this performed would be not for it to go down on any one person but by

I have a group of beautifully made a group of desperately made I somewhat prefer to do one and I am wondering whether you would have to join. We would have to join. We would have to join. We would have to join. We would have to join. We would have to join.
Am sorry to miss your name from our faculty list.

Cordially yours,

M. P. J. - L.

Professor R. A. F. Penrose, Jr.
460 Bullitt Bldg.
Chicago, April 5, 1915

My dear Mr. Penrose:—

Thank you very much for your kind favor of the 26th of March with enclosed check for $25. I thought that six of us at $25 apiece would cover the ground, and thank you very much for your kindness in joining the group. No doubt the bust to which you refer is that of which you were one of the contributors. I think the plaster bust is very good, and that the bronze will be an excellent thing.

May I repeat what I have said before, that your visit to us was greatly appreciated by all, and I hope that you will always remember the University with which for so many years you were in one way or other connected?

With cordial regards and best wishes, I am,

Very truly yours,

E.P.J. — L.

My dear Mr. Converse:

Thank you very much for your

Kind notion of the check of $25 with encased check

for $25. I count that part of me at the expense money

saves the burning and thanks you very much for your kindness

in joining the group. We greatly the part to which you

refer at first of which you make one of the contributors.

I think the player part to very good, and that the

promise will be an excellent fine.

May I repeat what I have said before, that your article

to an am greatly appreciated by all, and I hope that you

will please remember the university with which I am so

much nearer you were in one way or other concerned

with college lectures and part modestly I am,

very truly yours,

E.B.T. C.

Mr. R. A. Converse, Jr.
