President Harry Pratt Judson,
University of Chicago,
Chicago.

Dear Sir:—

Mr. Charles L. Hutchinson writes me from California to send you his check for twenty-five dollars as a portion of the cost in providing a bust of Professor Chamberlin for the new Julius Rosenwald Hall.

Very truly yours,
President Harry Pratt Judson,
The University of Chicago, Chicago.

Dear Dr. Judson:

I am sending herewith my check for $25.00, my contribution toward the cost of the bronze bust of Professor Chamberlin.

Very truly yours,

Martin A. Ryerson.
May 26, 1918.

President Henry Pratt Judson,
The University of Chicago,
Chicago, Ill.

Dear Dr. Judson:

I am sending herewith my check for $250.00, my contribution toward the cost of the proposed fund of Professor Chamberlin.

Very truly yours,

[Signature]
Chicago, April 22, 1915

Dear Mr. Graves:-

Thank you very much for your favor of the 21st inst. with enclosed check for $25. I don't think that any further contribution will be needed from Mr. Rosenwald, but if circumstances warrant I shall very cheerfully let you know. Please send my cordial thanks to Mr. Rosenwald.

Very truly yours,

H.P.J. - L.

Mr. William C. Graves,
¾ Sears, Roebuck & Company, Chicago.
Office, April 25, 1918

Dear Mr. Graves:

Thank you very much for your letter.

I see the check you enclosed with your letter will be kept from Mr. Rosenwald. But if you can return me the check, I will sell it to Mr. Rosenwald.

Very truly yours,

[Signature]

Mr. William C. Graves

Secretary, Keenor & Company, Chicago
Dear Mr. Jведен,

The last time I saw Mr. Salisbury I spoke to him about the fact.

I spoke to Chamberlain and Taft. I also spoke to Taft. I

wanted it for the Commons perhaps it

was better to put it in

Roosevelt. In any

event I will gladly
join the five others. Subscribe as you suggest. I will help Mr. Felt to send for a check. If you wish more cash, I have had it to learn of the Hendee's death. He was a fine man and especially fitted to the position he occupied with us. We shall miss him indeed. Let us get a portrait of them. I am on my way home. You may expect to see me there about the twenty-first this month. Write soon to me and Mrs. Judson. Tell Mrs. Shemley.

Yours sincerely,

San Francisco April 6, 1915

[Signature]
April 9/15

Dear Dr. Jordan:

It will give me great pleasure to join with you in providing the funds for putting up the bust of Professor Chamberlain as suggested in your letter of the 3rd.

We were all greatly shocked by the news of the death of Professor Henderson. He occupied a place in the University and in the City which it will be hard to fill.

We have been touring on our way toNorthrop,
Santa Barbara and, via the coast road, to San Francisco where we came due May 12.

Our trip to San Diego and the Imperial Valley was a great success; the roads were in good condition nearly everywhere and the weather was perfect. The Valley was the first great reclamation project which I had seen at close quarters and the scenery in the mountains and on the desert-going and coming was wonderful.

Mrs. Ryerson and I send kindest regards to Mrs. Jordan and yourself and hope that you are quite well again and that Mrs. Lang has entirely recovered.

Very sincerely yours,

Howard F. Ryerson
April 17, 1915.

Dear Dr. Judson:–

I have taken up with Mr. Rosenwald your letters of April 3rd and 7th, regarding the bust of Prof. T. C. Chamberlain, and he directs me to write you that he will take great pleasure in contributing as requested and to state that he will gladly pay an additional one or two portions, if there should be any shortage in the fund. Please let him know when you desire the check and for how much, in view of his attitude as stated above.

With kind personal regards, I am

Sincerely yours,

[Address]

Secretary, etc.
President H. P. Judson,
Chairman Committee on Higher Degrees.

My dear President Judson:

I beg to report that at a conference of the representatives of the group of Earth Sciences (Geology, Paleontology, and Geography), I was directed by unanimous vote to recommend to your Committee that the degree of Sc.D. be conferred upon Ex-President John Casper Branner of Leland Stanford Jr. University, at the forthcoming Quarter-Centennial Celebration. The foremost considerations on which this recommendation is based are as follows:

1) Distinguished scientific abilities, shown in geological investigations in Brazil and Arkansas, in particular, and also in Indiana, and California.

2) Marked scholastic attainments, shown in authorship and in educational work at the University of Indiana and particularly at Stanford University.

3) Notable administrative ability, shown in the conduct of expeditions to Brazil, in the direction of the Arkansas Geological Survey, and in the administration of Stanford University.

4) Noble personal qualities and a lofty ethical spirit, shown particularly in a courageous and successful antagonism to a dangerous conspiracy to promote deception relative to natural resources affecting wide interests and arousing perilous opposition.

I append herewith a statement giving more fully the grounds on which the recommendation is based, as well as biographical data relative to the candidate.

Very truly yours,

[Signature]
THE UNIVERSITY OF CHICAGO

Department of Physics

Professor T. A. Jacobi

Professor, Section on Nuclear Physics

My dear Professor Jacobi,

I am pleased to report that the transfer to the University of

the group of Nuclear Physics (Theoretical, Experimental, and Dosimetry)

will be completed within the next three months, and that the

Committee is working on the details of the arrangements for

the transfer.

I am also informed that the Nuclear Physics Group at

the University of Chicago will be transferred to the

Department of Physics under the direction of Professor T. A. Jacobi.

This transfer is expected to take place in the near future.

Sincerely yours,

[Signature]

Dr. A. H. Compton

Dean of the Graduate School

- Author numerous reports and articles on geology in Pennsylvania

For Brazilian use.
2) Special comments:

Dr. Branner is perhaps the foremost authority on the Geology of Brazil. He gained marked distinction by his conduct of the Geological Survey of Arkansas, scientifically, administratively, and ethically. He was compelled to face perilous opposition by reason of his exposure of an insidious fraud promoted by a powerful and skilful conspiracy which was acute enough to support its deceitful representations of the value of certain natural resources by skilfully adulterating the chemical reagents of reputable and honest assayers whom they employed to further their ends. The special financial interests of the conspirators were masked behind much wider and perfectly legitimate interests and so gained the general sympathies of the people to such an extent that the exposure developed a perilous issue which nothing but the highest courage and the most admirable skill were adequate to meet successfully. Dr. Branner's standing as a geologist of marked ability and sound judgment is indicated by his recent choice as a member of the Commission of the National Academy of Sciences appointed to examine the slides of the Panama Canal, and advise the President of the United States officially. Dr. Branner's administration of Leland Stanford University gave eminent satisfaction to the Trustees, the Faculty, the students, and the community; it would have been extended by the Trustees gladly had not Dr. Branner specifically provided, when he undertook the position, for release at a definite date, which, however, was somewhat postponed at the urgent request of the Trustees.

Beside the noble exhibit of personal qualities so conspicuously displayed in the administration of the Arkansas Survey, I have personal knowledge of instances of acute moral intuitions not known to the public.

Very truly yours.

[Signature]
Dear [Name],

I understand your concerns regarding the representation of the views of the Department of Geography at the recent conference. I assure you that the views of the Department have been adequately represented.

I appreciate your dedication to the defense of our department, and I assure you that your efforts will not go unnoticed.

Best regards,

[Your Name]
President H. P. Judson,
Chairman Committee on Higher Degrees.

My dear President Judson:

At a conference of the representatives of the Earth Sciences relative to the granting of higher degrees, a cordial wish that the degree of Sc.D. might be conferred upon Professor John Mason Clarke, State Geologist and Paleontologist, and Director of the State Museum and Scientific Division of the Educational Department of the State of New York, was expressed, and I was instructed at my discretion to present his name, in addition to that of Dr. Branner, if it seemed possible or probable that the Committee might deem it wise to confer a second degree on a representative of the Earth Sciences. In this case the attainments are distinctly paleontological and so as much biological as geological. I beg therefore to lay the matter before you in an entirely tentative way, with the understanding that this is as much addressed to you personally and presidentially as in the capacity of Chairman and that you will exercise your discretion in presenting or withholding.

Dr. Clarke is eminent as a special student of the evolution and migrations of the Paleozoic faunas, particularly those of the Devonian age. He is perhaps the world's most eminent student of Devonian life. At the same time, he is a broad student of the classification of ancient faunas and formations. At the same time, he is intimately concerned in the exhibition and educational use of geological and paleontological material.
Dear President [Name],

I am writing to express my concern regarding the recent developments in the Graduate School of Business. As a long-time faculty member, I have observed a concerning trend in the graduate program's enrollment numbers.

Enrollment figures have been declining over the past few years, and I believe this is due to several factors. First, the program's reputation has suffered due to recent controversies surrounding faculty members and administration. Second, tuition costs have increased significantly, making the program less accessible to potential students. Third, the competition from other top business schools has intensified, leading to a decrease in the number of applications.

I urge you to take immediate action to address these issues. We need to rebrand the program to attract more students. This could include ofereating more online courses, increasing financial aid, and collaborating with local businesses to provide internships and job opportunities. Additionally, we should consider lowering tuition costs to make the program more affordable.

I am confident that with your leadership, we can turn this situation around. Thank you for considering my concerns.

Sincerely,
[Your Name]
Dr. Clarke is, I feel, without question master of elegant diction, both in speech and in script, beyond anyone of his profession in America at least. He is par excellence a literary expert in scientific expression. If it should seem wise to add Dr. Clarke to the list honored, the recognition will be bestowed with eminent fitness. I append biographical data.

Very truly yours,
De Clarke to I feel without discussion matter of eternal gie
from part to speech and to script, paving synopses of the profession
in America as usual. He to be excellent a literary expert in
scientific expression. It is worth seeing this to end the Clarke to
the last ounce the recognition will be presented with support

Very truly yours,

[Signature]
BIOGRAPHICAL DATA RELATIVE TO DR. JOHN MASON CLARKE

PHYSICAL DATA RELATING TO DR. JOHN MASON CLARKE

President H. P. Judson,
Faculty Exchange.

My dear President Judson:

I should be glad to receive your criticism of the enclosed rather crude plan suggested by the recently threatened strike. Only the essential features are worth serious consideration, as better details and modus operandi can doubtless be devised. The essential points of the scheme you will catch at once as being:

1. The specific determination and declaration of the vested interests of the public in the utilities to which it has contributed values, and its legal claim to protection by a receivership as in the case of other interests in jeopardy.

2. The forestalling of lockouts, strikes and other concerted interruptions of the service of public utilities by the established device of a receivership, thus at the same time forestalling the suggested taking over of these properties by unusual means.

3. The elimination of the refractory elements, whether officers or employees, who decline public service under a governmental officer in time of public peril.

4. The adjudication of the questions at issue by a governmental commission and the conduct of the business by a governmental officer under such adjudication for such time as the case may seem to require, provided the contending parties do not themselves reach an agreement within a reasonable time.
My dear President:

I am writing to propose your attention to the following:

1. The establishment of a special committee to examine the current state of the University's finances and propose recommendations for future budgeting and financial planning.
2. The appointment of a new dean for the College of Arts and Sciences, with a focus on promoting interdisciplinary research.
3. The implementation of a comprehensive sustainability plan that includes measures to reduce carbon emissions and promote environmentally friendly practices.
4. The development of a new course on ethics and social responsibility, to be offered in the fall semester.
5. The extension of the library hours beyond the current 9am to 9pm, to accommodate the needs of night owl students.

I appreciate your consideration of these proposals and look forward to discussing them further at our next meeting.

Sincerely,

[Signature]
The scheme contemplates other enactments for the settlement of such issues by arbitration or otherwise, but it is thought that these should stand by themselves and the receivership be merely a remedy for an emergency standing on its own grounds.

I shall greatly appreciate your comments, if you can spare the time from your multitude of duties.

Very truly yours,

[Signature]
The scope of the project's objectives for the settlement of each issue of appropriation or opposition, but it is clear that these should stand on the same scale and the recognition of works as a remedy for an erroneous statement on the can Bundes.

I greatly appreciate your comments. If you can provide

the time from your schedule.

Very truly yours,

[Signature]

A TENTATIVE PLAN FOR DEALING WITH LOCKOUTS, STRIKES, AND OTHER CONCERTED ACTIONS BY OFFICERS OR EMPLOYEES OF RAILROADS AND OTHER PUBLIC UTILITIES

Proposed Legislation

[To be enacted (1) by the general Government so far as its jurisdiction extends, and (2) by the several states within their jurisdiction. If practicable the legislation of the general Government should be made precedent over that of the states when both have jurisdiction.]

1. Enactments that shall define and establish the vested interests of the general Government and the states as contributors to such public utilities and hence as partners in interest in their administration and in their benefits. The claim to such vested interest is founded on (1) the granting of the power of condemnation of private and public property for the right of way or for terminal facilities, (2) the granting of the continued privilege of crossing public highways and of taking precedence in such crossing involving the delay of public traffic on such highways, (3) the granting of lands or other subsidies, and (4) other special privileges, each and all of which constitute valuable assets granted to the utility corporations in consideration of public service to be rendered by such corporations.

2. Enactments providing that the Department of Justice, or a commission or other body appointed for the purpose, shall investigate the history of all railroads and other public utilities and
A TREATISE PLAN FOR DEALING WITH INCOMPETENT STRIKE
AND OTHER COORDINATED ACTIONS BY OFFICERS OR WORKMEN
OF RAILROADS AND OTHER PUBLIC UTILITIES

Proposed Legislation

To be enacted (1) by the General Government as far as the
intermittent strike' and (2) by the several states within their
jurisdiction. I propose for the legislation of the General Gov-
ernment to make provision for the states when the states
have jurisdiction.

I. Restorations that shall go into and shall acquire the property
acquired by both the General Government and the states as contribu-
tors may, however, be restored by both the General Government and the
states as contributors. The claim to much needed
administration and in their penalties.

The claim to much needed
administration and in their penalties.

II. The General Government's right to interfere with the
power of the General Government to regulate anything in the
administration and in their penalties.

The claim to much needed
administration and in their penalties.

A. The General Government's right to interfere with the
power of the General Government to regulate anything in the
administration and in their penalties.

The claim to much needed
administration and in their penalties.

B. The General Government's right to interfere with the
power of the General Government to regulate anything in the
administration and in their penalties.

Chicago, October 11, 1916

Dear Mr. Chamberlin:

Thanks for yours of the 10th inst. with enclosed plan. I shall examine it with care, and shall be glad to comment on it later.

Very truly yours,

H.P.J. - L.

Mr. T. C. Chamberlin
The University of Chicago
Dear Mr. Chambers:

Thank you for your note of the 10th instant. I am well acquainted with your case and
shall do what I can to commence an it letter.

Very truly yours,

H.L.J. - R.

Mr. T.O. Chambers
The University of Chicago
Chicago, October 10, 1916

My dear Mr. Chamberlin:

I have read with much interest your suggested plan with regard to public utilities. It seems to me worthy of very serious attention. As you say, the details can be worked out in a variety of ways. The fundamental principles, however, are sound. These public utilities are matters which primarily concern the public, and for the reasons which you give the public has a right to their control. This right extends not merely to the corporations concerned but to all the employees of those corporations. All alike owe a duty to the public which should have precedence of their immediate personal interests. I trust that you will give due publicity to your suggestions.

Very truly yours,

H.P.J. - L.

Mr. T. C. Chamberlin
The University of Chicago
October 16, 1914

My dear Mr. Compartment:

I have read with much interest your recent plan with regard to the Dipple Millers. As you seem to me worthy of very serious attention, if the cellulose can be worked out in a variety of ways, the gentleman, nevertheless, however, however the removable principle, however, the essence of the Dipple Millers, the measure under which you are giving the Dipple Millers a right to their contract, this right to their contract to the corporation and any to all the employees of some corporation. All alike owe a duty to the Dipple which would have precedence or their immediate precedence. I trust that you will give the Dipple to your satisfaction.

Very truly yours,

[Signature]

Mr. T. C. Compartment
The University of Chicago

President H. P. Judson,
The University of Chicago.

My dear President Judson:

I beg to send you, under separate cover, a copy of the "Symposium on the Age and Relations of the Fossil Human Remains found at Vero, Florida," which we have made the opening contribution of our next volume. By advancing the date of the issuance of this paper and making it a special feature, we are endeavoring to direct attention to the policy of the Journal in guarding as scrupulously as practicable the matter that is admitted to its pages, while incidentally inviting attention to the crowded state of its columns and the urgency with which authors seek it as a medium of publication. These features are touched in the editorial note opening the symposium as the mere incidents, but they were definite purposes in advancing the date of issuance of the symposium.

The question raised in the symposium has already attracted wide attention and there was a definite drift toward what we believe to be an erroneous conclusion, and this was causing regret in other quarters where the best interests of our profession are serious objects of endeavor. The checking of this trend and the turning of that into more wholesome lines was, of course, the chief end in view in organizing the symposium and in giving the public the results before the subject was discussed at the holiday meetings of the scientific societies.

Very truly yours,

[Signature]
Dear Mr. Chamberlain,

I am writing to express my concern regarding the current state of affairs in the University of Chicago. As you are aware, our institution has been facing numerous challenges over the past few months. The recent events have caused significant stress among both faculty and students.

I believe it is imperative that we address these issues promptly. I have requested a meeting with the Board of Trustees to discuss the matter in detail. I hope that you will be able to allocate the necessary time for this discussion.

I also wish to express my support for the ongoing efforts of our administration to resolve these challenges. I am confident that with the right leadership and cooperation, we can overcome these difficulties.

Please let me know if you have any specific concerns or suggestions. I am open to all feedback and look forward to working together for the betterment of our institution.

Thank you for your attention to this matter.

Sincerely,

[Signature]
