January 29th, 1901.

The International Correspondence Schools,
Scranton, Pennsylvania,

Gentlemen:

My attention is called to the fact that an endorsement of mine concerning correspondence work is being published in connection with your advertisements, evidently with the intention of influencing others. I wish to inform you that my statement was made concerning correspondence work with which I am entirely familiar, which is conducted at great cost to the University. No correspondence work can be good work, in my opinion, which is conducted merely for the fees paid. It is impossible, in my opinion, to do work of a satisfactory character unless a much larger sum of money is employed for instruction than is furnished by the fees of the students. The statement which you make is therefore misleading, and I desire to ask that it hereafter be discontinued in advertisements.

I remain

Very truly yours,

W. R. Harper
The International Correspondence School

September 2nd, 1931

Gentlemen:

My attention has just been drawn to the fact that an advertisement of mine concerning correspondence work is being published in connection with your school. I am associated with the International Correspondence School, which is an entirely different institution from the one to which I am attached. I feel that my work can be of service to your subscribers, and I have therefore written to you to inquire if you would be willing to include my advertisement in your current issue.

I remain

Very truly yours,

W. R. Harper
Dec. 3rd, 1901.

Home Correspondence School, Mr. T. P. Kiser, Manager,

Indianapolis, Ind.

My dear Sir:

I have before me a letter with your signature under date of November fourth, which contains the following paragraph:

"President Harper of Chicago says, 'Students who come to us after a year of such work are better prepared than those who have taken it with us in the classroom'."

I wish to call your attention to the fact that this is entirely misleading. My statement was made with reference to correspondence work which was directly under my own control, with the exact nature of which I was familiar and concerning the absolute quality of which I was informed. Your use of this paragraph leads those who receive the letter to think that I am referring to the work performed by the Home Correspondence School. Of this institution I know nothing. I am very sure of one thing and that is that an institution organized for money making cannot give satisfactory instruction by correspondence. Good work by correspondence costs far more than people can pay for.

I beg you therefore to cease using my name in any connection whatever with the work of the Home Correspondence School.

Yours very truly,
Dec. 24th, 1941

Home Correspondence School

Mr. T. G. Keeler
Manager

Indianapolis, Ind.

My dear Sir:

I have pleasure in a letter with your signature today.

I am enclosing the following report:

"Practical Report of Chicago School's Fulguration who come to us after a year of work and were placed with us in the office room."

If you would like to have this report for your own files, please let me know.

I wish to call your attention to the fact that I am actively employed in the same office. My advancement was made with reference to correspondence work which was staffed under my own control with the support of

I wish to inform you that I have been selected and connected with the staff of the Office of Information. Your use of this method for those in the same position of the

I have你在 correspondent report. If the information I have written is not as complete as I have already incorporated into the

I am very sure of one thing and that is that an institution organized for work in correspondence will

Good work on correspondence cases for more than people can do and

I am very grateful to receive and

Yours very truly,
Now in its eighth year, is a College or University on the Correspondence plan, i.e., instruction is exclusively by mail.

The several Schools or Departments are as follows:

**PREPARATORY**

Preparation for admission to Colleges (resident), West Point and Annapolis Academies, the Consular Service, and preparation for U. S. Civil Service Examinations.

**ACADEMIC**

- Science
- English
- Journalism
- Engineering
- Bookkeeping
- Shorthand
- Law
- Illustrating

The Faculty is composed of experienced Specialists, representatives of all the leading Universities, Colleges, and Technical Schools of the United States, from the University of Maine to the University of California.

Thousands of students.

Students in All Parts of the World.
Prospectus and Advance Circular

Correspondence

OF THE

Technical University.

The success of the Institute for Home Study of Electricity has been so satisfactory that it is to be the nucleus for an institution of vastly wider scope, and very much larger as a business and educational undertaking. All the details have not been arranged, but the following facts are for the public: The institution will be known as The Correspondence Technical University. The location will either be in New York or Chicago, probably the former city. Courses in nine branches of engineering will be given, and perhaps additions will be made as the work develops. Each course will be in charge of a teacher known throughout the country by his work and his fitness to conduct the branch of engineering he is at the head of. It has been and will be the aim to secure the best men available, independent of the financial requirements of such a policy. The prices will be based on the cost of instruction, i.e., taking care of the work of the individual student, and will take account only of the interest on the investment required to prepare all the courses which are not now written and printed. While the terms given on next page are subject to a revision when the regular catalogue is printed they will be very near these figures.

One of the methods of work will be co-operation with all other educational institutions, especially the public schools, and with the manufacturing and engineering institutions of the country. That system will be original, vast and effective. About the first of September some two hundred thousand of these circulars will be mailed, followed soon after by the catalogue of the University. We advise every person contemplating making any arrangements for study, and all so situated as to be benefited by a thorough technical course, to correspond with us. Until the University headquarters are established all mail should be directed in care of The Scientific Machinist Co., Cleveland, Ohio.
THE COURSES.

All courses include Mathematics and Mechanical Drawing.

Mechanical Engineering, ............................................. $35.00
Electrical Engineering, including Mechanical Engineering, ..... 45.00
The manner in which Electrical Apparatus is used, and how procured, which is greatly to the advantage of the student, is explained in the catalogue.
Mining Engineering, ............................................. 35.00
Steam and Power Engineering, with special attention to
Engine and Boiler Construction, .................................. 25.00
Bridge Engineering, .................................................. 35.00
Railroad Engineering, .............................................. 35.00
Civil Engineering, ................................................... 35.00
Architectural Engineering, ......................................... 35.00
For Electrical Railway Operatives and Electrical Workers, ....... 20.00

The tuition is payable in advance or by installments. When paid in advance 10 per cent is deducted. The first installment is $5, and the balance payable by installments convenient to the student, but not less than $3 at once, the entire amount to be paid within one year. The club rates will be very liberal and the system will make it very easy for students to reduce the amount of their scholarship by procuring others, or assisting our agents.

Free Scholarship Fund.

There will be appropriated a fund for free scholarships to be awarded bright, deserving persons, and to teach those now studying in connection with other institutions who decide to register with us. Special attention will be paid to such students. If brains and means can produce better courses than are now in existence, we expect to have the very best. Everyone studying in another similar institution will be started in free in order that he may compare our printed matter and system with those of the institution he is registered with. The aim will be to enable him to make a change without sacrificing or duplicating what he has paid. Every such student should go carefully with his course until he receives the catalogue of this University. In all but a few of its courses the text of the first part will be ready in September, while some will be complete.

The Correspondence Technical University.
THE COURSE

In order to make the student understand the fundamentals of electronics, the following courses will be taken:

1. Fundamental Electronics
2. Electrical Engineering
3. Magnetic Engineering
4. Steam and Power Engineering
5. Electrician Training
6. Heating and Cooling
7. Electrical Engineering
8. Refrigeration Engineering
9. Electrical Engineering
10. Artificial Intelligence

For students interested in pursuing a career in electronics or in related fields, this course will be beneficial. The course will be taught by experienced instructors and will cover the latest technologies and practices in the field. Students will have the opportunity to work on projects that involve the application of electronics in various industries. The course is designed to provide a comprehensive understanding of the fundamentals of electronics and prepare students for a successful career in this field.
Dr. Harper,

Prest. The University of Chicago,

Chicago, Ill.,

Dear Sir: The inclosed circular outlines the plan of The Correspondence Technical University. The engineers who will have charge of the courses have not all been selected and other important matters are yet to be settled, among them the Presidency. Having just decided to locate in Chicago, we ask you to accept that office. Of course you would not commit yourself without knowing all about it. I called at your office a few days ago, in your absence, and will call again in the course of ten days and acquaint you with every detail if agreeable to you.

Perhaps it is needless to say that your advanced and well known position respecting correspondence instruction encourages the hope that we may be able to make some arrangement by which you will be identified with The Correspondence Technical University, in some way.

Very Respectfully Yours,

F. D. Leslie
Dear Mr. Parker,

The University of Chicago, Ill.

I am writing to express my interest in the position of the Dean of the College of Engineering at the University of Illinois. I have been studying your website and am very impressed with the academic programs you offer. I believe that my background in engineering and my experience in management would make me a strong candidate for this position.

I have a Bachelor's degree in Electrical Engineering from the University of California, Berkeley, and a Master's degree in Business Administration from the University of Chicago. I have worked for several years in the private sector, where I have held various management positions. I am confident that my experience and skills would be valuable to the College of Engineering.

I am available for an interview at your earliest convenience. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

[Signature]
March 14th, 1901.

Mr. Elmer G. Furbush,
1310 Wolfram Street, Chicago.

My dear Sir:

I regret to say that we do not know anything with reference to the work of the International Correspondence School.

Very truly yours,

W. R. Harper
Mr. Fifer & Turpentine

1370 Willow Street, Chicago

My dear Sir:

I regret to say that we go not know

with reference to the work of the Inter-

national Correspondence Society.

Very truly yours,

W.R. Harton
Wolfram St.

Chicago Ill., Mar 13, 1901.

University of Chicago,

Chicago, Ill.

Dear Sir:

I am contemplating taking a course in Electrical Engineering with the International Correspondence School of Scranton, Pa. Will you kindly inform me if you
I know of this school, and if so, is it reliable? If you can give me this information I shall feel deeply grateful, for I would not like to throw away time and money on instruction that would not be of benefit and me.

Very respectfully,

Elmer G. Furbush.

1310 Wolfram St.
May 5th, 1902.

Mr. J. L. Long,

Abilene, Kansas.

Dear Sir:

We have no means of judging the worth of the Inter-National Correspondence Schools of Scranton, Pennsylvania. We do not receive the credits of that institution at the University without further examination. I take pleasure in sending you a circular of our correspondence work and hope that you may find something interesting in it.

Very truly yours,

W. R. Harper
Dear Sir,

We have no means of judging the worth of the Inter-National Correspondence Society or the Inter-University Correspondence Society. We do not recognize these organizations as authoritative or of any significance to the University of any other institution. I take pleasure in saying that you should have some interest in the work of the University.

Yours faithfully,

W.R. Hague
Abilene, Kans., May 3, 1902.

President Harper,
University of Chicago,
Chicago, Ill.

Dear Sir:

I desire information in regard to the standing of the "International Correspondence Schools" of Scranton, Pa., as an educational institution. Do you receive the credits of the above school in your University without further examination? Kindly send me a catalogue of the correspondence department in your school.

Thanking you for any information you may give, I beg to be

Yours very truly,

J. L. Song.
October 28, 1902.

Mr. Stewart, Inspector
Post Office Department, Chicago.

My Dear Sir:

We wish to call your attention to the American Correspondence School for Nurses, having headquarters at #167 Dearborn St., Chicago. This school advertises to train women to become nurses through correspondence study and to give a diploma in six months. The school may be all right, but the particular feature I wish to call your attention to is the unauthorized use of President Harper's name in connection with the advertisement. The result is that we have received letters from all parts of the country, asking for our circular; the impression being that this is part of the University.

Yours truly,

F. W. Shepardon
Secretary to the President
October 28, 1903

Mr. Stewart, Inspector
Post Office Department, Chippewa

My Dear Sir:

We wish to call your attention to the American Correspondence School for Nurses, having head quarters at 707 N. Dearborn St., Chicago. This school guarantees to train women to become nurses through correspondence study and to give a diploma in six months. The course may be continued, but the party treat the course. I wish to call your attention to the management of Dean McArthur, scholar and in connection with the management of the school. I have received letters from all parts of the country seeking for our attention, and I impress upon you the fact that

Yours truly,

F. W. Sturgeon
Secretary to the President
