

CHICAGO , Aug. 19, 1908.

My dear President Judson:-

I have received Mr. Salisbury's statement concerning the scholarships in medicine together with his suggestion of another draft. I much prefer the statement as I drew it with such modifications as are essential.

I would say that the special purpose of these scholarships is to put emphasis on research. It is the research spirit which we are seeking to encourage and I believe that the teachers in the scientific branches in the several colleges will be very glad indeed of the assistance which this inducement will give them in persuading their men to undertake some investigation. I should like to have the heading remain therefore as in the original draft.

As to the affiliation of the University with Rush, I phrased it in that way because the medical courses at the University have no legal standing except by virtue of the affiliation with Rush. I had always thought that affiliation meant cooperation and that the University is affiliated with the several institutions like Rush quite as much as they are affiliated with the University. I know the other form of statement is the usual one, but it does not seem to me to belittle the University to put the statement the other way if there is any reason for it.

My dear President Jackson:-

I have received Mr. Salisbury's

statement concerning the arrangements in medicine together

with his suggestion of another draft. I much prefer the state-

ment as I drew it with such modifications as are essential.

I would say that the special purpose of these arrange-

ments is to put emphasis on research. It is the research spirit

it which we are seeking to encourage and I believe that the

teachers in the scientific branches in the several colleges

will be very glad indeed of the assistance which this inces-

sive will give them in persuading their men to undertake some

investigation. I should like to have the heading remain

therefore as in the original draft.

As to the affiliation of the University with Rush, I

expressed it in that way because the medical courses at the Uni-

versity have no legal standing except by virtue of the affilii-

ation with Rush. I had always thought that affiliation meant

cooperation and that the University is affiliated with the

several institutions like Rush quite as much as they are af-

iliated with the University. I know the other form of state-

ment is the usual one, but it does not seem to me to be better

the University to put the statement the other way if there is

any reason for it.

CHICAGO

As to the amount to be offered, inasmuch as the tuition for the medical courses is \$60, I believe it would appear small in the University to offer for such work as this anything other than the tuition. I should much prefer to have two scholarships at \$180 each than three at \$120 each. I believe the best plan, however, for the first year would be to offer the first prize good for three quarters, \$180, and a second good for two quarters, and a third good for one quarter.

I should like very much to talk this matter over with you and I will seek an interview on Thursday when you are again in the city.

Yours very truly,

John M. Dodson

Dean.

CHICAGO

As to the amount to be offered, inasmuch as the tuition for the medical course is \$500, I believe it would appear small in the University to offer for such work as this anything other than the tuition. I should much prefer to have two scholarships at \$150 each than three at \$120 each. I believe the best plan, however, for the first year would be to offer the first prize good for three quarters, \$180, and a second good for two quarters, and a third good for one quarter. I should like very much to talk this matter over with you and I will seek an interview on Thursday when you are again in the city.

Yours very truly,

John M. Bohannon
Dean

CHICAGO November 11, 1902.

My dear President Harper:-

I have your note of the 6th inst. in reference to the conflict between the laboratory hours and Chapel and Division Lectures. I agree with you that this is a very important matter and I think our schedule will have to be shortened in order to arrange matters. At this time every first year student is employed on scheduled work seven and one-half hours for four days of each week and six and one-half hours the remaining day. This leaves only one hour that could possibly be applied to Division and Chapel Lectures and it is practically impossible to divide this into two half hours and arrange the time when the Students Assembly usually meets.

The question is now in the hands of the Committee on Student Affairs of which Dr. Barker is chairman. I think it should be made a principal item of business at the next meeting of the Board of Medical Affairs.

Yours very truly,

John M. Dodson
