President Harry Pratt Judson,
The University of Chicago.

My dear President:

I am sending with this a copy of a report by Smiley of the detective bureau, containing some suggestions that seem to be pertinent.

Very truly yours,

WH:EB
Enc.
To the Management of the University of Chicago,  
134 South LaSalle Street.

In the past few years I am informed by the heads of various departments of the University of Chicago, that pilfering, petty losses and various annoyances are almost regular occurrences in and about the University buildings and grounds. Some perpetrators of these offences have been caught and punished but the greater number have never been apprehended, at least the greater number of losses have not been accounted for.

For the purpose of studying the situation and attempting to devise some plan by which these annoyances and losses may be abated, I held a conference with Mr. Fairweather, Mrs. Goodspeed, Mr. Flock and Mrs. Dudley. The various thefts, it seems are spasmodic, frequently several losses within a short period of time, then a considerable lapse of time before a repetition. The things taken from the University Buildings do not indicate the class of thief committing the offence. The instances vary, sometimes it is money, sometimes clothing, there have been thefts of blankets, shoes, coats and in fact a variety of stuff, which as stated above does not give an idea as to the thief.

Ida Noyes Hall has been a productive field for the thieves. Many of the losses have occurred between closing time Saturday night and the opening of the buildings on Monday morning, which seems to show that a thief has free access to the building and to all of the rooms therein. In some instances two and three doors have been opened with keys in order to get at the stuff taken. A watch was placed on Ida Noyes Hall, by two men being assigned there from 10:00 P.M. Saturday night, Feb. 11th, until Monday morning at 6:00 A.M., Feb. 13th. During all of these hours no one entered the building who did not have a perfect right there, so far as we are aware and nothing was missed during that period. The night watchman covers the grounds and buildings of the University as best he can. A man was assigned under a proper pretext to accompany night watchman, Geary on his rounds for four nights, beginning at about 6:00 P.M. and ending at about 4:30 A.M. The particular nights covered were Thursday, Friday, Saturday and Sunday nights, Feb. 9th to 12th inclusive. In going over the matter thoroughly with all of the men who were assigned at the University, I have reached certain conclusions, but first I want to mention the fact that the night watchman found the doors to the Rosenwald Building open in the middle of the night on various occasions. He also found the door to the temporary gymnasium open and on one of those four nights found the kitchenette in Ida Noyes Hall with the door and four windows open. Naturally the question arises who was responsible, especially in the case of the kitchenette.
To the Management of the University of Chicago

Re: Campus Security

In the past few years I am informed by the Press of various
governmental agencies of the University of Chicago, that phony
threats and harassment are rampant on campus. Some students
and faculty and visitors are being threatened and harassed. And the
recent incident involving the removal of a student from the
campus for alleged bombings of the campus buildings
seems to be the latest in a series of events that have
occurred recently.

I urge you to take whatever steps are necessary to
prevent such incidents from occurring in the future.

Sincerely,

[Signature]
Night watchman Damon declared that he had closed and locked the
windows to that particular room, which a few hours later were found
open. It is possible that he did so, but it is also possible that
he overlooked it and only thought he did do. The night watchman, so
far as thieves are concerned, might as well not be on the grounds.

Ida Noyes Hall is a building which should have special attention on
account of its valuable trophies and furnishings. There are times
when this building is absolutely without protection from one and one
half to two hours during the night. The fact that there is a night
watchman about the University would have a very slight moral effect,
if any, upon the average thief. The knowledge of his being there might
influence amateurs. Watchman Gafney covers about twice as much
territory as he should cover in order to do good work. His principal
object, and I say this without criticism, is his endeavor to pull
so many clocks at a specified time. There are many things neglected
on his rounds because he wishes to pull his clocks at the time he is
supposed to do so. Doors are not tried and windows are not examined.
Inside of Ida Noyes Hall the doors are not tried, in every case for
lack time. A building so richly furnished with articles of such
great value, should not be left unprotected one hour out of twenty-
four of each day. The University authorities are to be congratulated
because they have not lost many very valuable furnishings. I am at a
loss to understand why a band of thieves have not backed a moving van
up to Ida Noyes Hall in the middle of the night and loaded on thousands
doors worth of valuable rugs. There is absolutely nothing to
hinder their doing so.

I find a list of fifteen different persons who hold pass keys and
master keys to Ida Noyes Hall. In some instances several of these
persons have keys to every door inside and outside of the building.
I might be wrong, but it seems to me a ridiculous situation. Never
in my experience have I found a building containing so many valuable
articles, where some responsible person did not look after the keys.
There seems to be an impression existing with the various authorities
about Ida Noyes Hall, that some one's feelings might be injured if
various ones in and out of the place were not furnished with pass keys.
I can think of no good reason why half of this number of keys should
be out standing. The watchmen, both Damon and Gafney require a key,
the Supt. of Buildings and Grounds should have a key, the "trouble
man" should have a key, Mrs. Goodspeed as a matter of courtesy should
have a key and possible the head Janitor, but why all of the others
should carry keys I am at a loss to understand. Surely they do not
visit the building at an hour when either the watchman or the Janitor
is not availble to admit them if business should call them there.
It seems that many of the keys are given to semi-officials merely
that they may come in and go out of the back and side doors in order
to make a short cut and if they feel so disposed, possibly leave the
door open behind them. One thing is certain and that is that responsibi-
ity for open doors and windows and even the responsibility for losses
can not be placed definitely so long as Tom, Dick and Harry carry keys
to this building. If a great number of these keys were recalled, the
feelings of someone might be temporarily injured but they would recover.
Night watchman D. W. Brown starts at 10 and closes and locks the
windows to that particular room. After a few moments, the man opens the
window and says, "The night watchman, so far as I know, to tell the
truth, is only passing through here, as we have no reason to think
that he is here."

I do not mind the noise or the 
night watchman, but I do mind the presence of some one and one
thing is certain, there is no one.

The next thing that caught my attention was the stove in the
night watchman's room. It was a small, black stove with a wire
covered with soot. The stove was not lighted, and the room was
completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.

I then noticed the picture frame on the wall. It was a small,
black frame with a wire cover. The frame was not lighted, and the
room was still completely dark.
If all of these keys are left outstanding and a band of thieves should rob the building of $10,000.00 worth of rugs the feelings of the faculty would be forever disturbed, even though insured the rugs could not be replaced.

The situation is one for very serious consideration. As above stated, the night watchman so far as thieves are concerned is practically useless. If thieves wished to enter any of the buildings and select valuable material, they would have to follow the watchman but for one night to determine just when and where they could work without being observed. As it is Ida Noyes Hall for instance, is without protection two or three times between 6:00 P.M. and 8:00 A.M. for one hour to two and a half hours. There is no protection whatever between his rounds during the night nor is there any between the time he discontinues at 4:30 A. M. and the time that the Janitor comes to work at about 8:00 A. M. If there were two night watchmen an arrangement could be made so that Noyes Hall would not be without protection for a minute between 6:00 P. M. and 8:00 A. M., which is of course the most dangerous time. One man could go on at the usual time at about 6:30 and end up in Noyes Hall after pulling his boxes the first time and remain there until relieved by a second watchman, who could come on duty say at 8:00 or 9:00 P.M. They could then take turns working East, West and North from Noyes Hall, pulling boxes in the various other buildings but always one of them remaining in Noyes Hall. This is only a suggestion and the details would have to be worked out. One thing which has attracted my attention for sometime past, is the fact that there are so many people with just enough authority around Ida Noyes Hall to make them of no particular value. It seems that everyone has an assistant and every assistant looks to someone else, and it is a very easy thing to pass the buck from one to another. No particular responsibility for any particular wrong doing attaches to any particular person. I am not concluding who is responsible for this condition, but it occurs to me that some individual should be absolutely and irrevocably responsible in and about Ida Noyes Hall, so that when anything goes wrong you could put your finger on that particular person and find out why.

Respectfully submitted,

F. H. Smiley.
The Excursion is one of the most exciting events to be held in the community. As planned, the night will feature a variety of attractions and entertainment. We have arranged for several stations to be set up around the area, each with its own unique features and activities. At 6:00 pm, the Welcome Committee will be on hand to greet everyone and provide information about the evening's events. After the Welcome, the crowd is expected to grow rapidly. The main attraction of the evening will be the fireworks display, scheduled to begin at 8:00 pm. The fireworks are expected to be one of the most spectacular shows ever seen in the area. It is recommended that everyone arrive early to secure a good spot for a clear view of the fireworks. There will be no refunds for tickets once the show begins. In addition to the fireworks, there will be live music and entertainment throughout the night. The evening will conclude with a grand finale at 10:00 pm, followed by a special guest appearance. It is important to note that this is a family-friendly event, and children under the age of 12 must be accompanied by an adult. This event is sponsored by the local community center, and all proceeds will go towards supporting community programs. Thank you for joining us, and we hope you have a wonderful evening.

An effort was made to get in touch with Mr. Flook as per his request, so that I might discuss with him the general conditions existing at the University Buildings and Grounds, but I did not succeed in reaching him until today, at which time it was agreed that I should call at the general offices of the University, 134 South LaSalle Street at 1:45 P.M. This I did and went over a diagram of the Buildings and Grounds with Mr. Flook and made suggestions for the betterment of the watch service.

In my several nights with Officer Gafney I found him to be a very conscientious, hard worker. The work, however, mapped out for him to do can not properly be done by one man. About all Mr. Gafney can do is to travel rapidly from post to post without regard to detail and without being able to observe much unless it comes directly in his path. The protection afforded Noyes Hall by his presence is of little value, as there is so much time during the night that the Hall has no protection whatever. This could be remedied by having two or three watchmen to divide up the time during the night and arrange the beats so that one man would at all times be in Ida Noyes Hall. All of the outside doors, as well as the inside doors could then be tried several times during the night and it would be impossible for intruders to gain entrance without being observed. From my conversation with Gafney and others about the buildings and grounds, I am of the opinion that persons stealing stuff from Ida Noyes Hall or other buildings are familiar with the watchmen's beat and figure so as to miss him, which is an easy matter.

After finishing my conference with Mr. Flook and giving him such information as I possessed I returned to the office and discontinued.

Continuing upon this case I reported for duty at 6:00 P. M. at the Press Building and in company with Special Officer Gafney patrolled the grounds and buildings until 4:20 A. M.

The Newman Clock system is installed through the buildings and grounds and Officer Gafney’s duty is to pull nine clocks on the first and fourth rounds, all of these being in the basements and main floors. On the second and third rounds the officers duty is to pull eleven clocks on each round, all of these clocks are on the second and third and fourth floors, making a total of forty clocks pulled during his time on duty. Under the present system, clocks are pulled first round 6:05 P. M. to 7:30 P. M. Second round 9:00 P.M. to 10:30 P. M. Third round 11:00 A. M. to 2:30 A. M. and the fourth round 3:00 A. M. to 4:20 A. M., leaving some parts of the post without Police protection one and a half hours at a time and no protection from 4:20 A. M. until the day janitors come on duty. A few doors and windows were found open during the night, but this seems to be not uncommon. I discontinued at 4:30 A. M.

Inv. M. M. T.

Again taking up this work I reported for duty at 6:00 P. M. at the Press Building, 58th and Ellis Ave. and in company with Officer Gafney pulled boxes and paroled the grounds and buildings until 4:20 A. M.

In making the rounds we found the kitchenette of Ida Noyes Hall open at 1:20 A. M. with all lights burning and on entering we found four outside windows open. The interior was, so far as I could observe, O. K. This kitchenette had undoubtedly been used by some of the dancers during the evening and then left open with the lights burning. Officer Damon is supposed to remain in this Building until the dancers depart at 11:30 P. M. or later and see that all windows and doors are closed before he leaves the building. We also found the door of the main entrance to Rosenwald Building open on two occasions. This door will not close unless considerable force is used. We also found that the same condition exists in the south door of the temporary Gymnasium. The door will not close unless particular attention is paid to the same. The doors mentioned are used by students, janitors, etc., and remain open until discovered by the watchman, which in some instances may mean two hours later.

We saw no one prowling around the grounds and no suspicious actions during the night.

Re: University of Chicago.
Inv. M. M. T.

Continuing upon this case I reported for duty with Special Officer Gafney at 6:00 P. M. and traveled post with him until 4:20 A. M.

In going through the buildings we occasionally found students working as late as 1:00 A. M. Officer Gafney would speak to them and in some instances take their names and then go on, the students claiming that they had examinations and were preparing for the same. We also found doors open and janitors passing to and fro until 12:30 A. M. The same routine of clock pulling was observed as on the previous night.

Friday night there was a dance in Ida Noyes Hall, third floor. The second floor of the building, at the east end I am told is sometimes used for dances. Officer Damon is detailed to this building and Gafney and I had no means of knowing what time the dancers left. We found the building clear on our third round. Officer Gafney keeps close lookout for open windows and doors or lights in the building, but as stated in yesterday's report, he has no time to try all doors and windows, many of which should be tried several times each night. I understand also that the doors inside of Ida Noyes Hall are supposed to be tried but the limited time does not allow the night watchman to try these doors. Nothing of importance occurred during the night.

Chicago, Illinois.
Feb. 9th, 1922.

1233 D
Re-University of Chicago.
Inv. M. M. T.

For the purpose of familiarizing myself with the protection afforded by the watchman service at the University of Chicago and to learn the actual conditions existing there from 6:00 o'clock in the evening until 6:00 A. M. the next morning, I went to the University in company with Manager S. and first made a survey of the buildings and grounds. I then called at the residence of Mr. Flook, 1307 E. 60th Street and arranged with him that I was to travel post with Special Officer Gafney, the night watchman.

I joined Gafney at the Press Building, 58th and Ellis at 6:00 P. M., at which time Gafney registers in. Starting from that point we went first to the Rosenwald Building, where two boxes are pulled, one in the basement and one on the 4th floor. We continued on to the Walker Building, where a box was pulled in the basement and one on the third floor, then to the Ladies Dormitory where one box was pulled on the main floor. Our next stop was at the garage in the rear of the President's house, where a box was pulled and we then proceeded to Ida Noyes Hall where three boxes were pulled, one in the basement, one on the second floor at the east end and one on the third floor at the west end of the building. We next went to the Kimbark Building where a box was pulled in the basement and one on the fourth floor. From here we went to the temporary Gymnasium, where one box was pulled on the main floor. Our next call was at the Blaine Building where three boxes were pulled, one in the basement, one in the west end and one in the east end of the building. We next went to Belfield Hall where there is a box in the basement and two on the third floor. We finished the first round at the Lexington Building where one box was pulled, at about 7:30 P. M. On the first round all boxes in the basements and on the first floors were pulled but not the ones above the first floor.

At 9:00 P. M. on round #2 we pulled all boxes on floors above the main going through the buildings the same as on the first round and finish- at the Ladies Dormitory, by closing four doors in the basement.

Round #3 was started at 1:00 A. M. and was the same as round #1, finishing at 2:30 A. M. Round #4 was the same as round #1. We started at 3:00 A. M. and finished at about 4:20 A. M.

There is so much ground to cover that it is impossible to try all doors and windows and make the round on time as scheduled. We discontinued at about 4:30 A. M., which from my understanding leaves the buildings unprotected from that time until perhaps 8:00 A. M. when the Janitors arrive.

Chicago Tribune

The University at Chicago.

The campus is a testament to the university's commitment to excellence and innovation. The buildings are a marvel of engineering and architecture, designed to inspire and challenge students to reach for greatness. The library is a haven for knowledge, with shelves upon shelves of books and resources. The classrooms are state-of-the-art, equipped with the latest technology to enhance the learning experience.

I have visited the university several times and have always been impressed by the dedication of the faculty and students. The campus is a vibrant community,充满了 energy and creativity. It is a place where ideas are born and dreams are realized.

The university is not just a educational institution, but also a cultural hub. It is home to a diverse community of students and faculty from all over the world, bringing together different perspectives and ideas. The university is committed to fostering an environment of inclusivity and respect, where everyone is welcome and valued.

I have no doubt that the university will continue to thrive and prosper, providing a world-class education to generations to come. It is a true testament to the power of knowledge and the possibilities it holds for the future.
March 1, 1922.

My dear Mr. Heckman:

I have examined the report from the Detective Bureau, and I confess I am somewhat alarmed at the situation. It seems to me that we must make more adequate provision for the watchmen care of Ida Noyes Hall.

Very truly yours,

President.

Mr. Wallace Heckman,
City Office.

[Handwritten note: HPJ:AMc]
My friend, K. Newman,

I have examined the report from the Detective Bureau, and I confess I am
somewhat alarmed at the situation. It seems to me that we must make more adequate pro-
action on the warrant case of the woman

Yours very truly,

President

Mr. Wallace Newman
Office Office
