Tuesday morning, July 4th, the University will hold a brief Independence Day service in Mandel Hall at nine o'clock. We are to have Mr. Willett for the Faculty, the President of the University of South Dakota for the Northwest, and we should like to hear from you for the South. If you can speak of the recent industrial development in your section of the country or the trend of education of the South at the present time, you will have subjects that are of very timely interest. Do not think that this address is formidable. It is not; it need not be elaborate. The meeting is one which will serve to bring us together and give us a better idea of our common problems as they are affected by
