My dear President Harper,

You can never know how blessed has been the min-
istration of your friendship in these long and many-
months. Like a sunburst amid the uncertain clouds,
now and then, a brief letter full of your own char-
acteristic hopefulness has left its beam of light
across my path. I thank you, beloved friend.

Only such a soul as yours, so absolute-
ly trusted by my own, that painful, happy night at Aus-
tra, may fully understand the agony of this affliction;
but it has been hard to read and be told continually
of my sin of overwork and that this illness has been
its consequence. But it has been better that
even dear friends were thinking so—you know that
my heart was given by a sorrow the beginning of
which I outlined to you that night. The end, I
hope, has now come, but it has been indescribably
sad.

You know also how I long to work as I told
you. I feel yet hopeful that my desire and yours
may be realized. Until I see you, I can say nothing
for I know nothing. I have something to put into...
The lives of students which this divine culture has made clearer to me and I dream to cast these seeds which fairly burn with harvests into the waiting soil.

Your grateful friend.  Dear President Harper,

Pres. William R. Harper,
University of Chicago, City.
My Dear Friend;--

I have just written a letter to Mr. Ferd Peck, with reference to the continuing of Prof. Swing's work at Central Music Hall, in which letter I have said that it seems to me the duty of Prof. Swing's friends to raise the money for the Swing Memorial Chapel, and I had hoped that this would be accomplished very speedily; and, as I said to Professor Small, who delighted my people yesterday, I hoped that the University in some way would see its way clear to give such a man as Professor Small, or some one with popular gifts, an opportunity to do a great work at Central Music Hall each Sunday evening.

I wrote you more than a week ago, asking for the privilege of meeting you at lunch on Friday, but I have received no answer to that letter. I wanted to speak to you then with reference to this work. If it could be nothing else, it would be immensely favorable as a University Extension work, the lectures being of such a sort as would have a high moral aim and insulate lessons of spirituality. No man can work in Central Music Hall as I did for one winter, and meet the thousand and more of young men and women, without feeling that it is the supreme opportunity of our city and our day.

Will you lunch with me tomorrow, Tuesday, at the Union League Club at one o'clock? I cannot rest until I feel that the work of the theatres, the saloons, and other worse places is at least properly met by such a healthful and inspiring feature of our city life, as would be a grand University Extension work at Central Music Hall. I wish you would wire me if you can lunch with me tomorrow. It is possible that we may be able to see some gentleman there who will move in this matter.

Faithfully yours,

My Dear Professor:

I have just written a letter to Mr. George Park, attendance's of the continuation of the work at the Central Museum. I hope you will see fit to accept it. I have heard that it seems to be the custom of the City of Chicago to raise money for the Park, even to pay for the necessary expenses of the same, and so I am inclined to think that it would be worth while to write to the Scientific American and to some other newspaper to give an account of such a man as Professor Hare, or some other. With your kind permission I hope to give an account of some of the works of some of the men and women who are assisting in the various activities of the Central Museum. I have had the pleasure of meeting you at the Union yesterday, and I hope to see you again.

December 18, 1895.

My Dear President Harper,--

This morning I find myself hardly able to
talk above a whisper, and I have not even got that far along yet.
I send you two of Field's characteristic things. The one relating
to the holy friars and their temptations had to do with Rev. Dr.
Frank Briston and another clergyman in this city. The fact is,
that we were running afool of one another constantly in our search
for rare books, and oftentimes it was a race between us to some
distant country town where we might find some hidden treasure in
the line of books. I do not think that either of us meant to be
forgetful of the Golden Rule, but I am sure that when a nugget
appeared to one of these holy men, he did not feel himself called
upon to report its existence to the other. Bristol is a wonderful
book-finder, and it kept the other man pretty busy in these parts
to get anything valuable, or to even keep what he had.

I wish I were able to write you at length, and I am
sorely disappointed that I shall not be able to read tonight.

Faithfully yours,

F.W. GUNSAULUS.
This morning I find myself marveling to
come across a little "Le Prince des Péquins"... I have not seen you for a long time... I hope you have been well. I was recently in Chicago and I met several old friends. I hope you have not missed them.

Thank you for your kind words. It is always nice to receive a compliment. I hope you are doing well.

My Dear Friend,—  

I talked last night at the Armour Mission, and had what the brethren used to call "liberty of utterance," but it wound up with a back-ache and a headache today which sent me to my physician, and the vacuum-cups were placed on my spine this forenoon. I am continuing to grow strong, but I am sure I must avoid all mental excitement for a few days. I very much desire to speak Sunday afternoon, May 1st, and it is my intention so to do. I think you are safe in making the announcement.  

I long to see you and talk over the matter of a summer school at Lake Geneva. There is certainly a large demand for such an enterprise. I do not see why your people should not use the observatory and everything else up there for such purposes. 

Faithfully yours,
I trust that you will share "Airmore" with the boys of your community. I have always been interested in the social and educational programs of the Institute and I believe that "Airmore" can contribute greatly to these activities.

I look forward to seeing you and talking over the future of "Airmore". It is my understanding that you are planning to expand the facilities and that this would be a great advantage for the students and faculty. I hope that you will succeed in raising the necessary funds for this purpose.

I am confident that "Airmore" will continue to be a center of learning and progress for the young men of our community. I wish you every success in your endeavor.

Yours sincerely,

My Dear Dr. Harper,—

If I were not so lame, I would go out to the University and ask the privilege of seeing you; but this last shower has gotten into my very bones, and I am going to ask you when we can meet for a little time at some point near here, in the forenoon.

I am sorry to think that the forces are arrayed against us. My Dear Friend,—

I write you with very much discouragement with regard to our plans.

Mr. Armour's recent gift to the Institute has somewhat increased his desire to remain separate from any institution whatsoever, and I feel that my hope that he would see how almost necessary it is for us to associate our work with the work of the University, has not received any encouragement in recent days. He has been very kind and very considerate of our plans, and has asked me to defer the matter of his considering it seriously until he is out of the woods with some very important business affairs which are pretty heavy just now. If you are willing still to allow the matter to be under discussion, I will be glad; and you may be sure that I will lose no time in getting a decision from him, and will spare no strength that the decision may be favorable to what I believe to be the cause of learning in these parts.

Faithfully yours,
I write you with very great improvement with regard to our plans.

It appears to me that the Institute and especially the problem of lore to remain separate from the research department, very. I fear that the work for which we

have written monograph No. 1 to be to contain and work upon the work of the Institute.

with free read and kind and with the inference of your kind, may be required to follow the matter of the work.

It is absolutely necessary to put on the work with some very important matters attaining

when the Institute passed that once if we are willing still to allow the matter to go

under notification I shall be glad and you may do some that I will have to come to

garantee a certain percentage of our own share in the addition that this situation may.

I am now at the Institute to do the same of teaching I should have.

My dear Friend:

Enclosed I return the letter which I have greatly enjoyed, and without quoting from it, or referring to it, I find that our Deans and Mr. Smith are unanimous in the opinion that this is a thing which ought to be accomplished. Of course there are very grave personal considerations just now with our people, which would have to be taken into consideration as I have told you. One thing is clear, I must not accept anything at the University that will in any way weaken the cause, and I must be absolutely free when the time comes to speak my word and to be above any suspicion of having an axe to grind. I do not think it at all wise that I should accept the place in the Divinity School under the circumstances. I will work with the Chicago Theological Seminary on that line, and have a year at least to get my bearings.

Enclosed I return the letter which I have

desperately sought, as it contains information that proves to be of great importance in the opinion that I have formed of the subject to be considered. Of course, these are very

drawn to some consideration that you will see at once,

which would have to be taken into consideration as I

went. You know that I have been in frequent contact with the University, and I will, no doubt, hear from it in the near future. I am also in close touch with many friends at the University and I will, no doubt, hear from it at any time.

I am fully aware of the importance of the problem and to do what may be possible for the solution of the problem to which I am now addressed.

Dear Mr. Grunebaum:

Your letter of the 16th inst.

with enclosure is at hand. I very much appreciate your courtesy and concern in the matter, and am very much pleased with it that I have heard of the service on the 16th. It was a most gratifying service to me in every way and an inspiration to our great fortune.

I thank you from the bottom of my heart for your generous offer of assistance which I very greatly appreciate. I am glad to note your offer for next season, my small care—finely makes a record of it if any small care on your part.

At that time again,

Sincerely yours,

My dear friend:-

I respectfully return the check which was handed to me by your Secretary on Sunday morning. It would destroy my pleasure in the really wonderful service we had on that occasion, if I were to accept anything for it. Moreover, I owe to the University of Chicago a recognition of many favors which you have kindly granted to me through my children in times past. I would like very much to be your preacher next summer again, remaining over a Sunday after my own services have closed, before going on my annual trip.

My quartette were delighted at being able to partake in the service on last Sunday. I cannot tell you what blessing I have received from the letters and visits from your students who seem to have received great help from the singing and the prayerful atmosphere of that service.

Faithfully yours,

My dear Professor:

I was very much pleased to hear from you by your Secretary on Saturday morning. I am very glad to say that the weather has been so favorable to the ceremonies that we have arranged for the occasion. If I have to accept any position at Armour, I shall be very glad to do so. The Armour Institute was always a model to me, and I have always admired the faculty and the students who have been there.

I am looking forward to the service on Sunday. I cannot tell you what pleasure I find in receiving your letter and your expressions of interest in the service. I am very much interested in the arrangements for the service.

Yours sincerely,

My dear Dr. Gunasculus:

You will be greatly pleased I think when you see how well the new picture looks in Hutchinson Commons. From almost every point in the hall the painting is impressive and adds a brilliancy to the room which is in every way pleasing. Yesterday when I took luncheon there, I found the men more than usually interested in the picture and its source.

President Judson has asked me to see you about the facts which are to appear on the brass plate to be attached to the picture. Of course, the name of the donor will appear. I wish to know, however, what else you would like to have appear. I assume that the title of the picture and the name of the painter should appear. It seems to me that there should be some mention also of the relationship of Christ Church to Hutchinson Hall. Should there not be a word also concerning the relationship of the painting to Dr. Liddell?

The University of Chicago Magazine probably will desire to reproduce the picture and print some account of it. If you can let me have some points in regard to our gift, I shall be glad to send them.
My dear Dr. [Name]

You will, I am sure, be greatly pleased to hear from you.

You see you will find the new building, erected at the expense of the late Mrs. Blackett, in a most beautiful spot in the park of the estate, and makes a most beautiful approach to the house. I have been much interested in every way by the visit.

When I took possession here, I found the men more than usually interested in the picture and the source.

Dear President Judson:—

In addition to the information obtained in the letter which I now send you with regard to the picture in Hutchinson Hall, I desire to say the painting was owned by the great scholar, Liddell. The author's friend, Scott, joint author of a lexicon of the Greek language, so well known to us in other years, owned it at a later date. It seems that Benjamin Jowett and the late J. Churton Collins, whom I knew quite well, purposed to keep it among other memorials at Oxford. I have recently received letters since the death of Collins, asking me about its return to England, in order that it might be placed in the Picture Gallery at Oxford, but I am sure it is where it ought to be and I am delighted that it seems to be worthy of a place so distinguished.

Thanking you for your kindness in receiving this picture so graciously, I remain

Faithfully yours,
In addition to the information obtained in the focus group,

I have been able to gather some key points from various sources and discussions. Initially, the plan was to split the project into smaller, manageable parts, focusing on a solution for the specific issue at hand - the existing problem of limited access to educational resources for young learners in rural areas.

I believe that implementing a pilot project in the town of Octoraro, using the innovative approach of a community-based learning model, would be beneficial. I have recently received feedback from the local college, expressing interest in exploring ways to expand educational opportunities in the area.

I would like to propose a pilot program, where the college would partner with local schools to provide after-school tutoring and workshops. This initiative could serve as a model for other communities to adopt and replicate.

I am confident that this approach will not only address the immediate needs of the students but also lay the foundation for long-term educational development.

I request your support in securing funds for the implementation of this pilot program. I look forward to discussing this further at your earliest convenience.

Sincerely,

Read the notice and agreement on back.
ALL MESSAGES TAKEN BY THIS COMPANY ARE SUBJECT TO THE FOLLOWING TERMS:

To guard against mistakes or delays, the sender of a message should order it REPEATED; that is, telegraphed back to the originating office for comparison. For this, one-half the regular rate is charged in addition. It is agreed between the sender of the following message and this Company, that said Company shall not be liable for mistakes or delays in the transmission or delivery, or for non-delivery of any UNREPEATED message, beyond the amount received for sending the same; nor for mistakes or delays in the transmission or delivery, or for non-delivery of any REPEATED message, beyond fifty times the sum received for sending the same, unless specially insured, nor in any case for delays arising from unavoidable interruption in the working of its lines, or for errors in cipher or obscure messages. And this Company is hereby made the agent of the sender, without liability, to forward any message over the lines of any other Company when necessary to reach its destination.

Correctness in the transmission of a message to any point on the lines of this Company can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon, at the following rates, in addition to the usual charge for repeated messages, viz, one per cent. for any distance not exceeding 1,000 miles, and two per cent. for any greater distance. No employee of the Company is authorized to vary the foregoing.

No responsibility regarding messages attaches to this Company until the same are presented and accepted at one of its transmitting offices; and if a message is sent to such office by one of the Company's messengers, he acts for that purpose as the agent of the sender.

Messages will be delivered free within the established free delivery limits of the terminal office. For delivery at a greater distance, a special charge will be made to cover the cost of such delivery.

The Company will not be liable for damages or statutory penalties in any case where the claim is not presented in writing within sixty days after the message is filed with the Company for transmission.

President H. P. Judson,
University of Chicago,
Chicago, Illinois,

Dear President Judson:

I ventured to speak to you with regard to Miss Langley the other evening, asking your idea of her, because I have been greatly impressed with the fact that she knows so much of the battle of life and where its squadrons are moving, as they all relate themselves to the education of the young.

Some time ago, I tried, in Greenwood Hall, to give the initiative for some work in music, and I found her most helpful toward the end desired. I have been associated with her a little in some Industrial Art work, which has led me to think she was quite competent to carry forward certain schemes which I have seen work out successfully in the Museum fur Kunst und Gewerbe at Hamburg, and at our Art Institute here.

I have told my friend, who has the matter in hand, and he is so disappointed with Mr. Zugg's way, and does not understand the fine scholarship of Mr. Tarbell, that what he desires to do in art by founding a professorship might be more successfully accomplished in the School of Education. I am not altogether certain from the visit of Mr. Leavitt here and the opinions of Mr. Sargeant and Mr. Judd that they understand the great opportunity in this Mississippi Valley for training, in a University atmosphere and along with University aims and methods, a large body of teachers, to bring the principles of aesthetics into association with our social dynamics. The University of Chicago must do this, or it will not be done at all, here.

My friend who means to make a donation of this sort is very much pleased with Miss Langley's work, and before we go further in exhorting him, I would like to know, confidentially, if you think it wise for me to let her cultivate these people socially and outline something of what may be done in the teaching of Industrial Art. A person who does not understand what Chicago is doing and who has not gone about, as she has, from place to place, factory to factory, and from school to school, can hardly grip this supreme occasion. Our problem is not the problem of the New England States, nor is it the problem of either New York or Philadelphia, especially New York.

I hope I have not overburdened you with this matter, but I do not want to encourage anybody in a direction in which I may fall down, as I did on the College Chape...
Chicago, April 4, 1918

Dear Dr. Gunsaulus:

I hear through the public press that you have withdrawn your resignation. I didn’t know you had ever put in your resignation. Don’t ever do it again. By the way, this last sentence relates to the resignation, and not to the withdrawal.
