than need with intent what the papers have said about the need to try Lord Rother's schemes would seem a loss to the University. The science of the middle west. I have also observed the suggestion that for a rather modest amount an aquarium might be established at the University which would keep him. Then I don't ask for information in detail at your convenience as to the following:

1st. Will it be possible to maintain an aquarium on this basis? The aquarium will be furnished.

2. Is it practicable to maintain steadily a salt water one, so far
away from the same supply as this inland city. Yes.

30. Would the figures named in the Times Herald & Tribune of this date be supposed to act it.

10. What would be the cost of maintenance (outside the props.
y of corn)?

As I wrote Mr. Harper is out of the city I direct this to the dept. I wish to plead to reissue ten when we

an in the summer.

Sam Squire

Frank F. Logan

July 9, 1902.
Aug. 2nd, 1902.

Mr. Frank Logan,

Lake Forest, Ill.

My dear Mr. Logan:

I am writing to inform you that Mr. Loeb has returned and that we have been engaged very assiduously in planning the proposed marine laboratory. Fortune has smiled upon us in the suggestion of a splendid location, and I think that within a week we shall be able to lay before you a very definite plan for the whole undertaking. Mr. Loeb will be very glad to meet Mrs. Logan and yourself just as soon as we are able to get the matter into shape.

With pleasant recollections of our luncheon at the Union League and begging to be remembered to Mrs. Logan, I remain

Yours very truly,
Mr. George H. Logan:

I am writing to inform you that Mr. Logan and I have been working very systematically in planning the proposed merger of the two companies. I am writing to you in this manner and I think that within a week we shall be able to let you know whether or not this plan is feasible.

I regret to inform you that Mr. Logan will be very busy to meet me, Logan and myself just as soon as we are able to get the matter into shape.

With pleasant recollections of our friendship at the Union League.

Very truly,

[Signature]
Dear Doctor,

I was reading some newspaper notices about Dr. Long and noticing your advice that he shall not be enticed away from you. I thought of suggesting that when in communication with him you might mention our continued interest in the matter we discussed together with him.

Although no decision will be reached before his return when it is our desire that he may visit us for a day that we may discuss some phases that appear in looking it up. I hope however we will look up while in California.
The location at San Pedro or elsewhere. Then he thinks the desirable location for such a plant, ascertaining such details as size, cost, and nearness to R.R. to living accommodations, also seeing what the two stations already on the Coast are like (I believe them an idea but one is away up at Vancouver or U. W. 31818 St. 188). When will Prof. Samson return? If not soon perhaps his judgment on the details of plan might be obtained by correspondence. When we get to that point, for I doubt not there will be...
fuller than I started out to write, while desirable as all endorsement for any body would be would not be the same as with most other of your letters which the builder did not endorse as I understand except that in this case you will have available about a million dollars in a few years for endorsement the amount of which has shown a remarkable interest in this biological research question.

Last of all the new aquarium does not seem to convey adequately all that it will

This year I think Ian temporary place I'm next year for deep water dredging in the lake. demonstration if that in 1903 might possibly include a boat in order that the matter might be a comprehensive one. unpalpable anywhere perhaps. Because both fresh and sea water were included. The another thing I would suggest is located at San Pedro would it be possible to an object to ally in a working way with the other station there for working purposes a would that be considered undesirable? When talking with you I said
I seemd to me desirble in some senses to start the California plan to probably the car out the bldg then let it work itself out with care for next spring or summer after study.

If you are already these months delayed as the gymnasmum for want of funds it would probably be well anyway. Though I hew yours anxiety to get this moving without delay for I see the importance it would attach to the University and I will tell you that I was probably somewhat influenced in it by the fact that as we occasionally do...
Thank you for a friendly note.

A May placca than a scientific one - artel names is most symmetrical. A new plan can hardly not be seen.

- J. Smith

Sept. 11th, 1902.

Provision for sea water as well as fresh water, in order that the very highest results may be accomplished in investigation. If you could write him a letter along this line, it would have much effect. The letter should go at once. You may express that you are very truly, very truly, 

Will you kindly address a letter to Mr. writing at my request. Frank G. Logan, Road's End, Lake Forest, Ill., in which, if you think best, you will develop this point, namely, the importance of an aquarium building and the aquarium itself for the purpose of investigation in our work at Chicago. Mr. Logan, as perhaps you know, has expressed a desire to do something for the University in a line which will provide larger facilities for the biological work in its various departments. He was first prompted to do this by the desire to keep Loeb from going to California. We have proposed to him an aquarium building 120x50 feet, to be placed at the present location of the south gate of Hull Court, between Botany and Physiology, the building to be half inside and half outside of the court. He and his wife are thinking favorably of this. The cost of the building is to be about $60,000. He has been down to see the University and he has the feeling, as expressed to me to-day, that we already have so much space and so many buildings for Biology, that there is hardly need for this additional work, and in any case it would be so small a matter as hardly to be worthy of consideration.

What I want him to see is that we need this aquarium and
Mr. Great Mr. Gentleman:

Will you kindly address a letter to Mr. Frank C. Shamy and Mrs. Hartman III in which I, if you think pertinent, will mention the point, namely, the importance of an immediate publication and the urgency of an immediate appeal for the purpose of raising-

funds in our work of Chicago. Mr. Hogan as parsonage you know, is now in Chicago and if you can be of some service to him in pressing a gesture to do something for the University in a time which will perhaps render facilities for the philanthropic work in the various departments. We have been plugging to him on this and keep him from going to California. We have plugging to him on the present location of the south end of Hull Court, between Board and Prebendaries, the building to be built there and the outline of the court. The cost of the building is 150,000,000. We have been plugging this to the University and he has been very effective in expressing to us to-day that he is willing to pay as much money as it would cost to build a building and in my case I would be willing to pay as much money as it would cost to build a building.

What I want him to do is that we need this university and need
provision for sea water as well as fresh water, in order that the very highest results may be accomplished in investigation. If you could write him a letter along this line, it would have much effect. The letter should go at once. You may say that you are writing at my request.

September 19th, 1902.

Mr. Frank G. Logan,

Lake Forest, Illinois.

Dear Mr. Logan:

I received your letter of the fourteenth instant on the morning of the fifteenth. Inasmuch as Mr. Loeb was already on his way back and was expected on the sixteenth, I have waited until his return before writing you. I have had an interview with him, and think that we shall be able to hold him in case we are able to carry out the plans. Mr. Loeb is so modest that he will not allow his name to be connected with these plans, and he is very anxious to have the whole matter settled without reference to himself. As a matter of fact, unless we do these things, he is certain, sooner or later, to go to California, and we cannot blame him. He came back with a very bad cold, but within a day or two will be ready to meet you at any place and time that you may indicate. In other words, he will be ready to meet you Saturday, Sunday or Monday, and he will take great pleasure in suit[ing] his
December 16th, 1903

Dear Mr. Logan,

I read your letter of the 16th instant. The following is a summary of the important points you raised:

1. You expressed concern about the materials used in my project. I assure you that I have taken every precaution to ensure their quality and durability. I will provide you with a detailed report on the materials and their specifications.

2. You mentioned that the budget is tight. I understand your financial constraints and will do my best to complete the project within the budget constraints. I will keep you updated on the progress and any adjustments that need to be made.

3. You asked about the timeline. I assure you that I am working diligently to meet the deadline. I will provide you with a revised schedule that includes milestones and deadlines.

4. You requested additional resources. I will provide you with an updated list of required resources and their availability.

I look forward to working with you on this project.

Yours sincerely,

[Signature]

P.S. I am sorry for any inconvenience caused by the delay in providing you with the necessary information. I assure you that we will do our best to meet your needs.

[Additional notes and signatures]
convenience to yours.

I have read with great interest your letter and the details which it contains. I am sure that the suggestions which you make are most excellent and that they can be incorporated in the proposed building. Professor Davenport, I think, does not return until January first, but we can get his help. It would be my idea to make the plans for the building between now and January first and to get the plans and specifications prepared and placed in our hands so that we can get bids about March first. In this case, we could begin the foundation the last of March or the first of April and have the building ready for the Autumn.

Mr. Loeb is now of the opinion that he has placed too much emphasis upon a Pacific Coast station. He will talk with you about these matters. He knows more about the stations already on the Coast now that he has made his visit. Without doubt, we can communicate with Professor Davenport by correspondence.
Dear Mr. President,

I have just received your letter of January 20th. I am very pleased to hear from you and I am confident that we will be able to work together towards the common goal of peace in the Middle East. Your letter has reaffirmed my commitment to the cause of peace and I am confident that we can achieve our objectives.

In your letter, you mentioned the importance of stakeholder engagement and the need for a comprehensive approach to the situation. I agree wholeheartedly with your views and I believe that a combination of diplomatic efforts and economic incentives would be the best way to achieve our objectives.

I look forward to working with you and your team to address the challenges that we face and to find solutions that will benefit all parties involved. I am confident that we can achieve our objectives and bring about a lasting peace in the region.

Yours sincerely,

[Your Name]
It is proposed to give up half of the aquarium space to fresh water and half to sea water. I think your suggestion with reference to the plant for fresh water at some place on the Lake is most excellent. I hope that you will take up all these details with Mr. Loeb, and I am venturing to hope further that we may reach a general conclusion before October third, in order that I may have the privilege of making an announcement at the special convocation to be held for President Roosevelt, a meeting which we hope that you yourself will be able to attend.

Very truly yours,
It is proposed to have up to the situation
space to play water and until some water. I think
your suggestion with reference to the plant you
tried with at some place on the lake is most excellent.

I hope that you will care up to the same extent
that I hope you and I am continuous to have
continued with me may benefit a concretor connection do-
for October String. It is clear that I may produce
principle of many in improvement of the project
connection to do work for perpetual recovery of
a meeting which we hope that you agree will be
very grand enough.

Very grand, then.

Very grand, then.
Syracuse, December 3, 1807

Mrs. Henry Bell Fulton

My dear sir,

I regret that I cannot be in your company tonight; this is the second time.

Believe me, most sincerely,

Frank Hogan
344 EAST ERIE STREET
CHICAGO

30 December 1907.

Dear President Judson,

I hope the fact that I have not answered your letter of December 7th before now has not inconvenienced you, and I am deeply sorry that I feel I ought not, at the moment, to add to the matters that I have in hand. If my delay has made it difficult for you to supply this place, please let me know and I will cut it off of some other spot. But, if not, I am afraid I must not be one of your "thirty-two" - which gives me very much more regret than it could possibly give you.

The meeting will undoubtedly
be a vastly interesting one.

I am

Yours sincerely

Mark Deane

President Harry Pratt Judson,
University of Chicago,
Chicago.

264 East Erie Street
Chicago

30 December 1907

I hope the test that

President 4th before you

has not incursions on you,

and I am deeply sorry that I

feel I ought not to the

moment to say so to the measure

that I have in hand. If it
May 6, 1919.

Mr. J. S. Dickerson,
Secretary, University of Chicago,
Chicago.

Dear Mr. Dickerson:

Thanks again for your letter of April tenth, informing me that Mr. Hall has the appointment for 1919-20 to the LOGAN FELLOWSHIP.

The war of course disrupted things with you, as with others, or there would have been three appointments probably, as that is what the gift assures.

Because of war conditions, the income instead of being dispensed, must have accumulated.

What does that accumulation of income amount to now, after the lapse of a little more than two years, since January 29, 1917?

Will you also add dates and particulars of the Convocation Announcements made, as per the letter of gift, as they were intended to stimulate interest in research and I have not learned just how this is followed.

By this you will much oblige

Yours most sincerely,

[Signature]

FGL:S
May 6, 1939

Mr. J. D. Dickinson
Secretary, University of Chicago

Chicago

Dear Mr. Dickinson:

Thank you for your letter of April 17th, informing us that we are in line for the appointment for 1939-40 to the Fogg Foundation.

The war has of course affected times with your university, and we understand that, as far as science and research, the income of the Foundation has been affected more than average.

I am sure that the Foundation's income has not been affected as much as the University's income, and I hope that you will be able to continue your generous support of the Foundation.

I have been informed that the Foundation's income is not affected as much as the University's income, and I hope that you will be able to continue your generous support of the Foundation.

The announcement made in the letter of Dr. B. J. T. Connolly, explaining the Foundation's support of the University, and I have not learned that you have cut back on the Foundation's support.

If you have any further questions, please do not hesitate to write.

Yours sincerely,

[Signature]
March, 14, 1917.

Dear Mr. Judson:

The enclosed notice is cut from the Maroon. Is it substantially correct, and if so, do you want a paragraph inserted in the Circulars on the page devoted to Fellowships?

Very truly yours,

"Logan Donates Fellowship (James R. Angell)

Income of $3,000 is Given for Medical Students.

A fund producing an annual income of $3,000 for the endowment of three research fellowships has been given to the University by Frank G. Logan. The fellowships will be in medicine, surgery, and one in pathology and bacteriology. They will be known as the "Mr. and Mrs. Frank G. Logan Fellowships."

While the gift cannot be included in the endowment fund for the new medical schools it marks a valuable addition to the resources of the new institution. The fellowships will be awarded annually, and the formal public announcement will be made at the June Convocation exercises.

Mr. Angell:

President Judson says that the statement is correct, but the announcement will go out in connection with the new medical work and not with the general announcements.

-Inez Lapham, Secretary

March 14, 1917.
Chicago, January 30, 1919

Dear Mr. Judson:

Mr. Frank G. Logan has given some indication of restlessness because of the lack of publicity given to his gift of two years ago for research fellowships in medicine. I am not aware of the reasons which have led you to hold the matter in abeyance, but I think you will perhaps feel it wise to communicate with Mr. Logan in such a manner as to prevent his feeling hurt because of any seeming lack of appreciation of his gift.

Yours very truly,

J.R.A. - L.

President Harry Pratt Judson
The University of Chicago
OFFICE OF THE PRESIDENT

Dear Mr. Jackson:

I am writing to inform you of the recent decision to place marketable securities in the hands of our investment banker, Mr. John Smith. This action is in accordance with the recent meeting held with the committee to discuss our financial strategy for the upcoming fiscal year.

The decision was made after careful consideration of the current market conditions and the recommendations of our financial advisors. I believe this move will not only secure our financial stability but also enhance our overall investment portfolio.

Please find attached the list of securities to be purchased and the terms of the transaction. If you have any questions or concerns, please do not hesitate to contact me directly.

Thank you for your attention to this matter.

Sincerely,

[Signature]

[Stamp]
December 18, 1924

My dear Mr. Plimpton:

President Burton has been considering the sort of reply that you might make to Mr. Logan. He suggests something of this sort:

That the University has been carefully considering Mr. Logan's suggestion. It would very much like to count Mr. Logan's gift towards the first six million dollars to be raised in our present campaign but that that is prevented because all that six million dollars is to go toward the endowment of salaries. Then it was thought that the gift might go towards the eleven million dollars also to be raised in the present campaign. After some study it was decided that inasmuch as that money was to be expended for buildings exclusively the gift could not be included unless it was found desirable to shift the whole basis of needs for which funds are being asked.

Apparently the University will have to consider it like many other gifts that are coming to the University at the present time, as outside the figures set for the present campaign. The University thoroughly appreciates Mr. Logan's point of view and wishes to repeat its expression of appreciation of his generosity.

Very truly yours,

Mr. W. C. Plimpton,
Faculty Exchange.
December 18, 1932

May your New Year be

Merry.

Presents for God have been circulating. The fact that you might make to Mr. Lott's

His absence is something of the sort.

That the University have been astoundingly con- 

tact neither for, nor a suggestion. It would

attract Mr. Lott's suggestion. It might

very much like to count Mr. Lott's gift

to towards the three million dollars to be

presented in one present campaign but that the

latter is to be presented in two instalments.

That was surely if we could arrive at the

eight million dollars to be towards the seven million

dollars with the present campaign. After some such if we could

arrive at that amount as she spent it or even

far more as I have never seen it. We may

begin to put the whole of those advertised to

Write, please, under the present seven.

Applications for the University will have to

continue to increase as many other things that might

come to the University at the present time

as a result of the lecture set for the present campaign.

The University is moving in rapid progress

despite Mr. Lott's recent death and whisper

to report the expression of appreciation of

the Centennial.

Very truly yours,

Mr. C. G. Timpson

Secretary Harvard
December 15, 1924.

President Ernest D. Burton,
The University of Chicago,
Chicago, Illinois.

Dear Mr. Burton:

Answering yours of December 8 reference approach to
Mr. Logan on basis of the facts contained in letters of Mr. Plimpton,
copies of which were enclosed:

As I see the situation, I presume that whatever of the
amount is required for endowment of the fellowships which Mr. Logan
established, could be set aside as the endowment for those fellow-
ships and that the surplus over such necessary endowment might be
considered a contribution to the present campaign, and it may be
that is what Mr. Logan had in mind. However, I would of course
much prefer to take Mr. Plimpton's interpretation because by so
doing it would leave the path clear for us to approach Mr. Logan
again in our present project.

Under the circumstances, I suggest that Mr. Plimpton
write him a tactful letter expressing this second point of view
in the hope that it will clear the way for a further approach,
because I feel that we are barred from going to Mr. Logan again
until his point of view has been refuted. Since you meet Mr. Logan
frequently, you perhaps will want to see the letter before Mr.
Plimpton sends it out, both so as to have the matter fully in
mind in case Mr. Logan mentions it to you and also to be sure
that you think it is phrased in an appealing fashion.

Yours cordially, 

Harold H. Swift
