A METHOD OF MAKING A SOCIAL SURVEY OF A RURAL COMMUNITY. C. J. Galpin, Univ. of Wisc., Bull. 29, 1912. A brief outline of schedules, maps and technique required in making social surveys.
Poor rural communities may be aware of these issues but do not have access to information or resources to address them. A lack of community resources and support services can exacerbate social and economic challenges.

To address these challenges, the need for community-driven solutions becomes apparent. Community leaders and members can work together to identify and prioritize local needs. This can lead to the development of programs and initiatives that are tailored to the specific needs of the community.

In conclusion, while rural communities may face unique challenges, community engagement and collaboration can help address these issues and improve overall quality of life. By working together, communities can become more resilient and better equipped to face the challenges they face.
