Jan. 21, 1899.

Dear Sir:

The enclosed document from Prof. Klebs is hereby respectfully referred to you. His propositions and the arguments upon which they are based merit careful consideration. The relation of Prof. Klebs to the Department of Pathology has always been an anomalous one both before as well as after the affiliation. I can only say that the name of Klebs is scattered all over the pages of modern Pathology and that some kind of a plan whereby the services of an investigator of such renown could be put to good use for our students is certainly very desirable. I beg to remain

Yours very Respectfully,

Ludwig Heineken.

Dr. W. R. Harper,
President of the University of Chicago,
Chicago.
Dear Sir,

In accordance with your recent notice of retirement, I am writing to request a formal recommendation for my appointment as the Head of the Department of Economics. I am currently serving in the post of Assistant Professor and am well-regarded by my colleagues and students alike.

I have been associated with the institution for several years and have contributed significantly to the academic and research activities of the department. My expertise lies in the field of microeconomics, and I have published several research papers in reputable journals.

I am confident that I would be able to continue the good work started by my predecessor and would be an asset to the department.

I look forward to your favorable consideration.

Yours sincerely,

[Signature]

Manager of the Department of Economics

[Name]
Chicago, January 18 1899.

Professor Dr. L. Hektoen,
Head of the pathological Department of Rush Med. College.

Dear Sir:

Following your suggestion as to my position as professor of Rush Med. College I wish to inform you that:

I was well satisfied when Prof. EMM suggested to me to come to Chicago to accept a position in Rush Med. College, three years ago. I gave up my situation in the south for that purpose, which would have eventually developed in a satisfying manner, if I had stayed there.

I have never asked for any special favor, accepting with thankfulness the small indemnification voted to me by the faculty. As this was cut off the last year, of which I was notified without any explanation by the Secretary of the University of Chicago, I was very much disappointed. I did not resign, hoping that the financial circumstances of Rush Med. College might improve after the affiliation with the Chicago University; later I had often occasion to admire the work of our new president in reforming the college-education.

Having been connected with medical faculties in Europe for more than 25 years and wishing that the best development of medical education could be obtained for this country, which I love, I believe that I am in a position to give some advice on these questions, regarding my own department.

First, I will express as a general thesis, that Universities will not prosper, if the teachers are not investigators. Reproduction alone is not sufficient. The student must not be a hearer alone, but must also be a worker. For this purpose Professors and Students are considered as colleagues in Germany.

If I compare German and Swiss Universities and medical faculties with the corresponding American Institutions, I must say, that such medical colleges which are not connected with Universities are only schools. But where they are connected, they must really make use of such connection. The medical student must
Dear Professor [Name],

I am writing to express my interest in the position of Professor of [Subject] at [College].

I have been aware of the opportunity to join the faculty at [College] through [source]. I have reviewed the position description and believe that my qualifications and experience make me a strong candidate for this position.

I have a background in [field], which I believe will be valuable to the department. I have experience teaching [specific courses] at [previous institutions], and I am currently working on [current research project].

I am excited about the opportunity to be a part of the [College] community and contribute to the academic programs. I am confident that my skills and experience will complement the existing faculty and enhance the department's offerings.

I am available to discuss my qualifications further at your convenience. Thank you for considering my application.

Sincerely,

[Your Name]
connection. The medical student must be first a member of the other faculties and study there philosophy, history and the natural sciences.

Only after an examination in these branches they should be accepted as members of a medical faculty. This examination should not consist of written papers alone but completed by a free discussion with a board of examiners. In my opinion the same holds true not only for this first examination, but in the same way to the subsequent purely medical examinations which I would reduce to two only, after two and four years of study.

The second, accepted as I think by the faculty, would be the elimination of the usual book-learning. The students may study books at home, but a simple reiteration of text-books should not form the whole substance of nearly all lectures. Science changes every moment, as all human things, and medicine are now in an acute stage of development. The teacher should only bring the newest and the best, and discuss before his students the momentary changes in our science as well as the invariable eternal aims of all science.

Laboratory work alone will not help this, as it could become very dogmatic also and be more like the work in a factory than that in a liberal scientific laboratory. Students taught in the manner recommended by me, must become investigators in laboratory work. Surely not everyone of them will be apt to promote our general views and to detect new truths, but in repeating the investigations of prominent men, they will fix their own opinions for their whole life.

This is the way, in which I gave my lectures on general pathology at this college. But I find that only a small part will appreciate this method, totally different from the usual. So I think, that I could make only some impression on a small part of them, if not sustained by practical work in the laboratory.

If my views are appreciated, I would propose to connect with these lectures, which now only review the latest developments of general patho-
CHICAGO

The Medical student must develop a sense of the patient's interest and welfare, and the need for complete examination of the patient. Only after an examination in the presence of the patient, and a complete examination of all systems, can the diagnosis be made and the proper treatment planned.

In my opinion, the examination of the patient is the most important part of the student's work.

Examination of the patient is important, but in the same way as the complete examination of the patient is important.

I therefore wish to emphasize that I am not averse to an examination of the patient, but only after a thorough and complete examination of all systems.

The second reason as I think on the subject, seems to me to be the importance of the patient's interest and welfare. The examination of the patient is important, but in the same way as the complete examination of all systems is important.

I have not been in the habit of the student's examination of the patient, but only after a thorough and complete examination of all systems.

I would also like to emphasize the importance of the patient's interest and welfare.

I would also like to emphasize the importance of the patient's interest and welfare.

In my opinion, the examination of the patient is the most important part of the student's work.

Examination of the patient is important, but in the same way as the complete examination of all systems is important.

I therefore wish to emphasize that I am not averse to an examination of the patient, but only after a thorough and complete examination of all systems.
logy, free elective courses on experimental medicine. This way of teaching pathology was introduced by my much beloved teacher Rodolph VIRCHOW not only in Germany, but, as it is shown in his last HUXLEYAN LECTURE, also in England. Why should it not be introduced also in this English speaking country, where a much freer spirit is reigning, as in old England?

As the regular teaching wholly occupies the time of the students in the last two years, and as I have the opinion that these young people cannot see enough of the hospital work, I was very glad to hear the proposition of our president to introduce elective courses to be instituted in the summer-months. Such an institution reminds me somewhat of the institution of Private-Teachers (Privat-Dozenten) of the German and Swiss Universities. The only difference seems to be, that such courses cannot be paid here by the students, but must be included in the general fee, paid by the students for their full education. But upon this question I can say nothing, as I think it is possible to introduce an extra-fee for such courses.

I would make the following suggestions, if it seems that these views are acceptable with regard to the teaching of general Pathology:

I. I propose to give a review, historical and critical, the same as I have done until now, on general pathology in the two winter-quarters, of 30 lectures. For these lectures I must ask a remuneration of $500, as I am not in the position to spend my work gratuitously.

II. I propose to give two months courses on experimental medicine in my own laboratory, if the Chicago University cannot give me a place and opportunity to do so. There I would have all assistance needed for this work and I would accept from ten to twelve students for a fee, taken usually in the laboratory, of $25 a month. Animals, Microscopes and other instruments are at my disposal. The Laboratory is now my own property, not under the supervision of the Postgraduate Med. School, so that I can dispose over it wholly. My collaborator Dr. ZEIT and two
younger assistants would help me in the work. Every one of the students would have his own work, but could observe the work of the others. Before commencing practical works the different questions will be explained and discussed with the students, for which studies I dispose over a very large library of my own.

Naturally I could not undertake this work, if not a certain income would be guaranteed, say about $250 a month.

Hoping that you will sustain these propositions, I remain

Yours very respectfully

Dr. Edwin Klebs.
January 9th 1899

My dear Prof. Wyman:

Your kind note of the 18th is at hand and I am glad to respond as promptly as possible.

I have carefully considered, as you request, your plan to move my Clinic down stairs to the lower lecture room and have given due weight to the reasons given by you for taking such a step, viz., the surgical character of the work done in the ophthalmological Clinic, the need of its proximity to the Hospital, the desirability of devoting two hours to the work, and the need of a good light. I believe I have given due weight to all these considerations.

On the other side the following items are to be considered: First, the patients in the skin clinic considerably outnumber those of the eye clinic and there is scarcely room to adequately care for them in the rear of the upper amphitheatre. There is certainly not room below. Light especially natural light is essential to the recognition of the symptoms of an exanthem. Even the best artificial light is inferior, and the light of the upper amphitheater, better than that below is not always equal to our needs. We actually require both the light and the space afforded above. Our patients do not in large measure come from the Presbyterian Hospital, but there are a few almost constantly brought to us from there: and we desire to have the opportunity of bringing in others.

Further all the plates, colored drawings, and photographs employed in my clinical lectures are arranged on the upper floor. The damage to the Clinic by its removal below stairs in this matter will be very considerable indeed.
Your letter of the 10th at 10:30 and I am very glad to receive.

I have carefully considered as you requested your plan to move my office from the lower to the upper floors of the building. The offices are centrally located and the view from the upper floor is excellent. The need for space in the lower floor is minimal, and the view from the upper floor is even better.

The proposed move to the upper floor will provide ample space for our current needs and future expansion. The view from the upper floor is breathtaking, and the location is ideal for our operations.

Please let me know when you would like to proceed with the move. I will make the necessary arrangements.

Sincerely,
[Signature]
I recognize as we all do, that we must put up as best we may with some inconveniences during the interval that must elapse before we are provided with a new Clinical Building, but I am firmly of opinion that at present it is not a wise move to displace to inferior quarters where it is extremely doubtful whether, on account of the lack of light and space, its work can be properly conducted, a Clinic sustained by me for nearly a quarter of a century in Rush Medical College carried on summer and winter at considerable personal sacrifice and labor during years for most of which I was wholly unpaid by any financial returns. If a temporary move is to be made in anticipation of the erection of a new building, I should think it wise not to move away and move back my clinic, but provide temporary quarters for the Clinic which is aiming at the long established hour and room of the senior professor. I have consulted with a few members of the Faculty on this point, and they have seemed to agree with me.

The whole matter, I think, can be settled by asking Prof. Hotz to begin his Ophthalmological Clinic at 1 p.m. and conducting it for two hours, that is until my hour at 3 p.m. If he claims that this will interfere with his office work, I think that is not quite sufficient in the way of explanation to justify a serious dislocation and damage to my Clinic.

In this, however, as in all matters I am quite willing to abide by the decision of the Faculty. I will therefore ask you first to show this letter to Presdt. Harper. It is unnecessary to say that his opinion in this matter will have great weight with me.

With assurances of great esteem for both yourself and Prof. Hotz,

I am as ever, yours sincerely,

[Signature]
I recognize as well that we must work to improve our work with some incisiveness getting our initiative and wise pace.

In the present we are dealing with a new criterion of efficiency. To see this move to improve or to not see this move to stagnate is important. The present and the future can be properly coupled and aligned.

It is important to walk for we have a criterion of a community in each locality and city. We cannot survive the winter and winter is a considerable barrier to survival.

I am writing to express my wish to be notified of major moves and my hope to continue to be a member of the organization.

I hope to be notified of important moves. I am writing to request that questions or comments be directed to our office. I aim to take action on the prompt return of any communication.

The whole matter I wish to be scientifically and accurately defined. I am not content with a superficial understanding of the subject. I aim to capture the full implications of the matter.

I aim to pursue a clear understanding of the matter and to capture the full implications of the matter. I aim to capture the full implications of the matter.
Dr. William R. Harper,
City.
My Dear Mr. President:

Yours of the 9th is at hand with the capital suggestion. Dr. Billings called on me a few days ago and told me he was going to look over the ground once more. I will angle for him a little more.

Yours very truly,
April 11, 1928

Mr. William R. Harper,
City

My Dear Mr. President:

Yours of the 8th is at hand with the draft of the suggestion. Dr. Ellingson called on me a few days ago and told me we were going to look over the drafting once more. I will make a few changes for him a little more.

Yours very truly,

Chicago.

Nov. 19, 1904

My dear Dr. Harper:-

Your note duly received. Yesterday, after consultation with my colleagues on the Committee, I belled the cat!

He will come, unpledged. At the same time, I fancied that after a vigorous plunging, I detected at the last moment some very slight subsidence of the hair on the cat's back! I have asked my two colleagues to do nothing in the matter further. Do not forget to be present, Monday Nov. 28, probably at the Chicago Club.

On that occasion if there is no objection I will lead off. Keep out the rest (if this arrangement pleases you) until I have worked my little bell!

I am writing with my own hand: hence this wonderful type-writing. I hope to be a better doctor than type-writer!

Yours hastily

J. N. H.
Nov. 19, 1904

Mr. Geo. K. Herbert:

Your note of the 28th July, with my compliments on the Committee, I beg to say, "Where is he?"

I shall come in some days. After a victorious business, I prepared for the last moment some very strict instructions at the part of the car. So I have asked my two companions to get nothing in the market either. Do not let ever be present. Monday Nov. 30. Property at the office. Upright.

In each occasion if there is no objection I will keep all. Keep one the rest. If this arrangement please you, until I have arrived on this paper with my consent please this word in your letters.

I hope to go a better doctor than you. Write.

Yours respectfully,

H. H.
August 22nd, 1904.

Dr. James N. Hyde,
100 State Street, Chicago.

Dear Doctor:—

At a meeting of the members of the old executive faculty of Rush and the other Heads of Departments held at Rush Medical College last December, when the present status of Rush Medical College and the University of Chicago was discussed, the question was asked whether certain contemplated promotions in the instruction in the faculty, which had been postponed last year, could not now be made. It was thought that this could be done and, pursuant to this action, you received a letter from Dean Dodson not long thereafter asking you to make recommendations for promotion, reappointments or other changes in your department. These recommendations received from you were passed upon by the Deans and submitted to the Board of Trustees on May last. Realizing fully the propriety of these recommendations, the Trustees nevertheless were compelled to the conviction that, because of certain circumstances that have arisen and certain plans that are being entertained, any promotions or changes in the faculty at the present time, other than those absolutely imperative, would be unwise and might interfere with the success of these plans.
August 29th, 1934

Dr. James H. Hyde,

100 W. Franklin Street, Chicago.

Dear Doctor:

At a meeting of the members of the faculty of North and the other Heads of Departments held at Rush Medical College last December, when the present status of Rush Medical College and the University of Chicago was discussed, the question was raised whether certain contemplated promotions in the institution to the faculty, which had been postponed last year, could not now be made. It was thought that this could be done and pursuant to this belief, you received a letter from Dean Donlon not long thereafter asking you to make recommendations for promotion, reappointment or other changes in your department. These recommendations were favorable to you were passed upon by the Dean and submitted to the Board of Trustees on May last. Receiving fully the propriety of these recommendations, the Trustees have determined that, because of certain circumstances that have arisen and certain plans that are pending, it was necessary to postpone the promotions or transfers in the faculty of the present time, with the assurance of these plans.

Sincerely yours,

[Signature]
The Trustees appreciate very highly indeed the spirit which has been shown by the members of the faculty and the acceptance of the action of the Trustees in deferring such promotions a year ago. They are fully alive to the fact that some of the members of the faculty have earned the right to promotion and regret very much the necessity of again deferring action on the recommendations of the Heads of the Departments. They trust however, as I do, that the members of the faculty will accept their assurance that only the conviction that such changes would be unwise at the present time has caused them to defer action.

May I ask you to convey to the members of your Department, who may have anticipated promotion, the facts in regard to the matter and the regret of the Trustees that this action seemed necessary at the present time. No changes have been made in the faculty except the appointment of new members and a few clinical assistants. These additions to the faculty seemed imperatively necessary.

Very sincerely yours,
100 State Street.

June 1, 1909.

Mr. Harry Pratt Judson,

President, University of Chicago.

Chicago, Ill.

My dear Mr. President:

Your enclosure is just at hand and I beg leave to write to you quite unofficially that I appreciate your sense of humor, that I acknowledge your criticisms, and that I am in no way responsible for the sheet which has gone out from the College office to which my name has been appended by the mimeographer.

As soon as I saw the thing, I called up the office and found that the sheet with the hog Latin had been distributed and that the other stuff had gone off with it. It is the penalty of holding office!

At a recent clinic in the College before practitioners, I explained to them that I was not responsible for something which occurred in the way of an error and one of the gentlemen present called out from the benches "that's right; that's the way we do where we live, put it on the other fellow!"

Truth to say, however, the brother of our late honored president, Mr. James Harper, is responsible for this thing and has been in the depths since it occurred. I saw him yesterday and started to excori ate him slightly when I took pity on him, seeing how abject he was.

I do not remember much Latin but a little. I hope you will never suffer in the same way yourself, or better, have not; and I wish I could superintend everything that goes out from the office to which my name is attached.

Yours very sincerely,

[Signature]
June 1, 1940

Mr. H. H. Pratt, Jr.

100 State Street

Chapel University of Chicago

Chicago, Ill.

Mr. H. H. Pratt,

I received your letter of June 1, 1940, and I am very pleased to reply to your query:

Your question regarding the proper name of the present is not an uncommon one, since I believe that I have met with a similar problem before. It seems that the proper name of the present is quite difficult to determine, but I am glad to hear that you have taken the time to write to me about it.

I am most interested in the question of how often a present should be changed. I believe that it is best to change the present every four years, as this will ensure a steady supply of new presents for the future.

I am also interested in the question of how often a present should be given. I believe that it is best to give a present every two years, as this will ensure a steady supply of new presents for the future.

I hope that my answers have been helpful to you. I am always interested in hearing from my correspondents, and I look forward to hearing from you again soon.

Yours very truly,

[Signature]
APRIL 6TH 1896

My dear Mr. President:

I wish to congratulate you with the others on the brilliant prospects of Rush Medical College with its debt out of the way.

I understand that there is to be a meeting of the Trustees soon: and send you with this an enclosure which you wished to have on that occasion.

Who will deliver the Commencement address on the 25th of next month?

As all your path is now smoothed, can we count on you?

Yours very truly,

[Signature]
Feb. 13th, 1899.

Dr. William R. Harper,
University of Chicago.

My Dear Mr. President:—

On the part of many members of the Faculty I wish to express our personal sense of appreciation of your kindness in attending the services yesterday, when so recently a convalescent from illness. I trust you will be no worse for the slight exposure during the march to and from the church.

Dr. Ingalls once informed me that you would like to have me serve as secretary of the College, and in view of the decease of our late secretary, I will do this work provided it is the desire of yourself and the faculty. In that event I write to ask, seeing that I understand that the budget has not yet been presented to the Board of Trustees, whether it will not be wise to make a reasonable appropriation for the expenses of the secretary in the way of a scrivener, postage, and the other miscellaneous expenses which I find amount to quite a little sum as the months go by. If agreeable to you, I will order a return postal card addressed to myself to be mailed with all the notices of faculty meetings providing for: First, a cover at 6 for each member who returns the card; second, for a calling of the business meeting
Dear Mr. Smith,

I am writing to extend my appreciation for the efforts you and your team have made in handling the claim for damages caused by the recent storm. The promptness and professionalism of your service have been truly commendable. Your team's dedication to ensuring that our losses are accurately assessed and compensated is highly valued.

Thank you for your hard work. It is a pleasure to do business with a company that truly cares about its clients.

Sincerely,

[Your Name]
at 7 for any who feel themselves unable to meet the modest charges
for the cover and who wish to dine at home. I am told that there
are a few men in this last category. To save you the trouble, I
will ask Mr. Harper to have return postal cards printed by the
last of this week, provided you do not notify him that you disap-
prove of the plan.

In view further of the forthcoming meeting of the Board
of Trustees which I have been told is to be called, I will say to
you personally that as soon as the faculty are again placed on a
paying basis, however small, I propose to employ a part (if nec-
essary the whole) of my salary to the sustenance of a Fellow in my
department.

It is my desire to have this Fellow (I selected an ex-
cellent man who is ready to do the work) begin his labors with the
1st of July next, and I write to you on the point in order that if
the faculty list is to be passed upon and my action with respect

President Wm. R. Harper,
University of Chicago.

My Dear Sir:—

I have to thank you very much for your note of the 29th, and am pleased that you are satisfied with the exercises at the opening of the College.

I found in one of the papers on my breakfast table on the following morning a couple of paragraphs describing the occasion, but have always found these notices unsatisfactory.

I agree with you that Dr. Billings' address should have been distributed to the press. We shall never permit ourselves to be neglected in like manner again. I will have the representatives of the press personally invited to our further exercises so long as I have any responsibility in connection with them.

Very sincerely yours,

Dear President Mr. Harper,

University of Chicago

My dear Sir:

I have just had the privilege of reading your note of the 22nd, and am pleased to learn of the satisfactory results of the opening of the College.

I have, in one of the courses on my present faculty, the following sentence: "A couple of paragraphs have gone to heaven; one of them personally injured to one further extension of the College."

I believe, with you, that Dr. Hildreth, through his own influence, has been instrumental in the success we have never before experienced.

Please to send me your final approval of the course of study as printed in connection with them.

Very sincerely yours,

[Signature]

President Wm. R. Harper,

University of Chicago.

My Dear Mr. President:-

I have to thank you for your line of the 30th ult. at hand with enclosure, and to say in response that at a meeting of the committee held in my office on Wednesday last, it was agreed to hold the introductory exercises and informal reception at the college buildings on the 27th.

There will be an orchestra, flowers, rugs, but no refreshments and no printed program. We shall ask you to say something when we are ready to be dismissed, and there will be a reception by yourself and members of the faculty in various rooms of the building after the exercises.

Trusting this will meet your approval, I am,

Yours very faithfully,
Sept. 8th, 1939

President W. R. Harper
University of Chicago

My Dear Mr. President:

I have to thank you for your kind letter

It was a pleasure to have the introduction of the second... and I hope to see more

There will be a committee on the committee on the committee... and I hope to see more

I shall try to have the committee on the committee... and I hope to see more

I shall try to have the committee on the committee... and I hope to see more

November 19th, 1902.

Dr. William R. Harper,

University of Chicago, Chicago.

My dear Mr. President:—

A meeting of the Committee on Public Exercises was held in my office yesterday and as the question of the dedication of Senn Hall seemed a matter of importance I requested Dean Dodson to be with us; and he was.

It was understood that as Sir William will be with us on the 17th, the dedication exercises should be appointed for two P. M. at the College, in the upper amphitheatre of the old building, where we have the largest seating capacity; and that after Sir William's address we would have a reception, to be attended by yourself, Sir William, and other guests, and the senior members of the Faculty, in the new Senn Hall.

The arrangements provide for, first, an engraved invitation, which I am now busy upon; second, floral and other decorations; third, good music; and, fourth, no refreshments.

It was regarded as desirable that Dr. Webster should be requested to make the presentation address, though he be not one of the original donors of the building, thus saving us the selection of one of the latter; second, thus providing for the naming of the donors in his address. It is understood that in this address (which he has consented to deliver and which will be very short) he is to bring out in clear relief the other needs of the College with respect to

Dear Mr. William H. Harbert,

University of Chicago, Chicago

My dear Mr. President,

A meeting of the committee on Albright next door was held in my office yesterday and in the absence of the Governor of Senegal I had the privilege of sending a letter to the President of the Senate of Senegal which has been received by him.

I have the honor to be with you and to say that I am happy to hear that the President of Senegal is considering the matter of the independence of Senegal.

With respect,

Yours faithfully,

Dean Doctor, President.

I am happy to hear that Mr. William will be with us on the 15th.

I wish the President of Senegal to be present at the meeting of the committee on Albright next door. I am sure that he will be interested in what we have to say.

I am also happy to hear that Mr. William will be with us on the 15th.

In the new year shall

The arrangements provide for the President to attend the meeting.

Which I am now about to give the President to attend the meeting.

With respect,

Dean Doctor, President.

If I am right, as I believe that Mr. William will be present, it is necessary that I should state the reason for the change in the date.

To make the arrangements with the President of Senegal, extraordinary means were necessary, and the President of Senegal was not able to attend the meeting on the date originally chosen.

I am happy to hear that Mr. William will be present on this occasion.
benefactions, etc.

The acceptance, it occurs to me, should be made by some member of the Board of Trustees rather than of the Faculty. We should be glad to have your views on all points here suggested, including this last. How about Mr. Frederick A. Smith? Could you get Mr. Sprague to do it? Have you others in mind?

The upper amphitheatre will hold, say, 500 persons. Shall we exclude our students, or shall we take the upper classes and leave out those now in attendance at the University? To whom shall we mail our engraved invitations? Have you persons to whom you would like to extend these invitations with your own card? When they are engraved, how many would you like to have me send you personally?

Dean Dodson was made a committee of one on the arrangement of dates. I have written Sir William that you would be gratified to have him on the stage at the Convocation? If President Gilman is to come on here, at what time will he deliver the address which we hope he can make? Do you have a Convocation Dinner on the evening of the 16th? If not, can we have a dinner on the 16th at the Chicago Club (by reason of its propinquity to the Fine Arts Building), where we can entertain both President Gilman and Sir William Hingston, and where we can have also present any persons whom you think can be made interested in the special fund which we are trying to arrange for the College? If there is a Convocation Dinner on the 16th, and if President Gilman is to be present, can we ask for another dinner on the evening of the 17th, where the scheme above suggested can be carried out?
TheIRO

The situation in some of our schools is making for some serious problems. It seems to have been a problem on all fronts from the faculty to the student body. Everyone agrees that we need to address these issues and find a solution.

I feel your point of view is important. A student's course count for an elective

To go to what you are to make in mind

The upper administration will have 10% of their core course offerings. Still we

exchange our expertise or select the upper classes. We have

one whose you in attendance of the university? To whom apall we

meet our everyday interaction. Have you become to aware you may

like to extend these interactions with your own self. When they see

enough you may wonder you take the easy way back.

New hope you are here a committee of one to the arrangement of

Gates I have written SIT WILLIAM that you may be writing to

have him on the stage of the conversation. It interests neither to

setting out
In any event, it is clear that we must give a dinner to Sir William, and he should be asked, it seems to me, at least by the 1st prox. The funds for his entertainment at a dinner where other persons interested in the college might be asked I think can be easily raised by private subscription; certainly half a dozen of us in the college will give $25. apiece to meet the necessary expenses.

I am planning to have 500 engraved invitations. Should we have more? I beg leave to assure you that any hints or advice you can give me in this important enterprise will be most carefully considered.

Very faithfully yours,

[Signature]
In this regard, it is clear that we must give a figure to the
Wittliff's and the amount to be paid. It seems to me of least py the
first factor. The figure for the experiment at a higher were other
costs involved in the college might be made. I think can be
possible to arrange a private subscription. Certainly part of a
source of support for the necessary expenses to meet the necessary
expenditures in the college will give the space to meet the necessary
expenses. See

I am planning to have 500 subscribers interested. Sorry we have
more. I beg thee to see how your plan might change you can
give me in the important categories will be most satisfactorily care-

Aug. 29th, 1898.

Pres't W. R. Harper,
University of Chicago.

My Dear Mr. President:

I have called a meeting of the committee on entertainment at this office at 2:30 on Wednesday next. Dr. Ingals has mailed me a letter, a copy of which has been sent you, and I have seen him personally since, he suggesting that we definitely hear from you as to whether the Board of Trustees is rightly to take charge of the reception and its expense, before we undertake to make a definite arrangement as to what we shall do.

If the trustees do not shoulder this reception, I am inclined to favor the reception by the college, and down town in the manner suggested by you. I like Dr. Franklin's old saws, which our friend, Dr. Ingals, so aptly quotes, and which, as comptroller, it is his duty to remind us of at intervals, but I have to remind you that if every one had followed strictly this maxim throughout life, this great North-west would not be to-day what it is!

Faithfully yours,

[Signature]
AMERICAN ACAD. ARTS;
100 STATE ST.
CHICAGO.

Arthur 1800

Dear Mr. President,

I have called a meeting of the committee on entertainment of the College next Friday at 8:30 a.m. in the office. I have written a letter to the chairman of the committee to which I am enclosing a copy. I would be glad if you would see it and suggest some changes I have seen. I would be glad to take charge of the reception and the expense, but if you prefer, I would be glad to make a gelignite arrangement as to what we shall do.

If the trustees go not sooner than the reception, I am going to leave the reception at the college and return in time to catch the train. My suggestion is that you take the train at 8:30 and leave at 9:30. I have written to Dr. Franklin's office, asking that the Flowers' Hall be used. The following is the statement of the maxim, I am enclosing:

If it is not true, the Great North-West won't be for you.
President William R. Harper,
University of Chicago.

My dear Mr. President:

At a meeting of the Faculty of Rush Medical College, held on the 19th inst., action was taken on the following matters which were respectfully referred to the Board of Trustees of the college:

1st.- The Faculty approves of the action of the Board of Affiliation of the University of Chicago, with reference to the acceptance of certificates of high schools which do not give courses in the Latin language, such acceptance to hold until the conclusion of the current scholastic year.

2d.- The Faculty approves of the plan of college visitation recommended by the Council of Administration, and recommends that a sum not to exceed $1000 be appropriated by the Trustees of the college to defray the actual expenses of the members of the Faculty making such visits.

3d.- The two reports made to the Faculty by the Committee on Library, Museum and Journal are herewith submitted to the Board of Trustees with the approval of the Faculty, including the approval of the recommendations therein contained.

4th.- The Faculty have recommended its Committee on Curriculum and Lecture Schedule to recommend to the Trustees of the University that as soon as the work of the first two years in the college can be satisfactorily conducted in the University, and in any event, by the year 1903, the course of instruction at Rush Medical College shall be lengthened to five years.

5th.- The Faculty recommends the Board of Trustees to proceed at the earliest moment to erect a building to be devoted to clinical purposes on the ground at present owned by the college and adjoining the college building.

Yours very truly,

Dictated.

Secretary.
President Arthur M. Hartman
University of Chicago

My dear Mr. President:

As a matter of the utmost urgency and importance, I wish to bring the following matters to your notice:

1. The recent statement of the Board of Trustees of the University regarding the financial condition of the institution has caused great concern and anxiety among the faculty and students. It is imperative that we take immediate action to ensure the continuation of our educational programs.

2. The current economic crisis has severely impacted our ability to raise funds for scholarships and other financial assistance for our students. I urge you to consider further measures to alleviate this situation.

3. With the exception of the graduate schools, the faculty remain divided on the question of increased salaries. I request that we address this matter urgently to maintain the quality of education we offer.

4. The recent decision by the state to reduce funding for higher education has placed an undue burden on our institution. I strongly recommend that we explore alternative sources of revenue.

Please take these matters into careful consideration and let me know of any actions you propose to take.

Yours sincerely,

[Signature]

Director
My dear Mr. President:—

Will you kindly correct and return to me the enclosed memorandum relating to the next Convocation of the University.

The following resolution was adopted by the Council of Administration of Rush Medical College on the 15th ult.

"Resolved, That the University of Chicago be asked to consent to accept for entrance to Rush Medical College, the certificates of such four-year High Schools as include courses in the Latin language which are on the accepted list of approved Universities;"

On October 6th the Council agreed to recommend an extra appropriation to the Board of Trustees, of an amount not to exceed $800.00 for the Department of Medicine; and later, an appropriation not to exceed $700.00 for the Department of Pathology; and an appropriation not to exceed $200.00 for the Department of Skin etc. the need of these extra amounts being based on the large number of students in attendance upon the College and the failure of the appropriations already made to meet the requirements of these Departments to the close of the fiscal year.

Yours sincerely,

[Signature]
Chicago. December 24th, 1900.

President William R. Harper,
University of Chicago, Chicago.

My Dear Mr. President:

Yours of the 22d inst. is at hand, and the committee you name will be duly notified.

I have been unfortunate in my attempt this year to secure Dr. Weir Mitchell for our orator this coming spring; in fact, his response to me as the result of a third letter written him was so little like the man that I shall never write him again. I should, however, explain that I signed the letter to him very hastily, that he could not make out the signature, and that he thought he was writing to a clerk instead of to one of his professional brethren, who is personally acquainted with him. Sic transit.

I shall be pleased to have any suggestions from you relative to any other person for the same position. What do you think of either Grover Cleveland or ex-President Harrison? Possibly, with your name supporting me I might get one of the two.

Yours sincerely,

[Signature]

Secretary.
Prest. William R. Harper,
University of Chicago, Chicago.

My Dear Doctor Harper:—

At a meeting of the faculty of Rush Medical College held on the evening of the 20th inst., it was resolved that the Board of Trustees be requested to purchase the holdings of the Presbyterian Hospital of that portion of the block now occupied by the clinical building of the college, facing on Harrison Street. May I ask you to see that this resolution is presented to the Board at its next meeting?

I have to-day taken pains to look over the records of the faculty covering the period from 1871 to 1896. I find these to be in a fragmentary and rather unsatisfactory condition. The only early records of the relation between the faculty and the Presbyterian Hospital are, first: In 1882, a proposition to establish a Board of Trustees for a college hospital; and, second, a proposition to aid the same when constituted by the gift outright of either ten or fifteen thousand dollars; or, second, a deed to the lot owned by the college, with a mortgage of fifteen thousand dollars upon it. This record suggests that the beginnings of the Presbyterian Hospital were practically in the councils of the college. On the 30th of June, 1883, there is a record showing that the architect's plans were
Dear Mr. President:

I have decided to resign my position as Head of the College. I have been in this position since 1930 and I feel that it is time for me to take on a new challenge.

The College has grown significantly during my tenure, and I believe that it is time for someone new to lead it into the future. I have enjoyed my time here and I am grateful for the opportunity to have served as Head of the College.

I would like to express my gratitude to the Board of Trustees and the faculty for their support and guidance during my time here. I will always be proud to have been a part of the College’s history.

Sincerely,

[Signature]
presented for inspection at a faculty meeting. On the 12th of June, 1834, the record shows the names of men appointed to serve on the hospital staff. Twenty-two names were recommended, of which at the present time but ten are those of living men, and of the ten who are alive, namely, Drs. Lyman, Bridge, Graham, Merriman, De Laskie Miller, Hyde, McArthur, Lyman Ware, Robison and E. P. Davis, but eight are at present connected with the hospital staff.

A careful survey of the records of this and the following years gives no further clue to the relations between the two bodies, and one would never know from these records that a contract between them (a copy of which is in your hands) had ever been signed by the representatives of the respective bodies.

Yours very truly,

[Signature]
PRESENTATION OF A RESIGNATION OF THE TREATY

The term of the treaty has expired at the end of June 1939. The Royal Government has informed the Ministry of Foreign Affairs that it will not renew the treaty for the term of ten years. The treaty has been in force since 1939, and the present term of ten years has expired.

The reasons for this decision are the following:

1. The treaty has been in force since 1939 and has not been renewed.
2. The present term of ten years has expired.
3. The treaty has been in force since 1939 and has not been renewed.

The present term of ten years has expired, and the treaty will not be renewed for the same period. The treaty has been in force since 1939, and the present term of ten years has expired.

The reasons for this decision are the following:

1. The treaty has been in force since 1939 and has not been renewed.
2. The present term of ten years has expired.
3. The treaty has been in force since 1939 and has not been renewed.

July 20th, 1901.

My dear Dr. Hyde:

After studying very carefully the first column of the Rush Medical "Record", which you were kind enough to prepare, and after making a vigorous effort to do something which would be an improvement, I have decided that there is nothing better to be said than what you have said; and so, the matter has gone to the printer as you left it. I am sure that you will not think me very negligent when I tell you that I have found it literally impossible to comply with the demands made upon me in these last days, and that a good deal of the time I have been a fit subject for the hospital, rather than for the office.

Very truly yours,
We hear from Hague.

After submitting very carefully,

"the last courses of the Royal Medical Record," which you were kind enough to forward, may after making a thorough effort to do something with it, I have already sent it there. You may be an improvement if you do not return it, but you have to notify better to be received, and we have no written to the matter for care to the principal; and so the matter for care to the principal, as you feel it. I am sure that you will not think me very regretful when I tell you that I have come to thoroughly understand to comply with the gentleman who knew me in these matters, and that a good part of the time I have been a bit upset.

To the hospital? Letter than for the office.

Very sincerely yours,
July 22nd, 1901.

President William R. Harper,
University of Chicago.

My dear Mr. President:—

Yours of the 20th inst. is at hand and in response I have to say that in my judgment a man who has gone through what you have this spring and summer and who has come out of it all with such a creditable record, ought to be excused from almost anything where he makes his appeal.

I am pleased if you are satisfied with what you have read of the "Record" and hope that others will be.

I am off for the sea-shore in two or three days and hope to see you again in the autumn.

I hope you yourself will go off for a much needed rest at an early date.

Sincerely yours,
July 22nd, 1907

President William R. Harper,
University of Chicago,

My dear President:

Yours of the 20th read to me and in response.

I have to say that I understand a man who has done
what you have done by my own and assume that you have come
out of it all with much advantage to your experience.

I am happy to hear from you and assure you that you
have used the "Success" and hope that others will do
so also for the success in two or three cases.

I am satisfied that you are in the midst of the
hope you expressed at the end of the week.

I hope you will return with all of us on Monday.

Sincerely yours,

[Signature]
November 1st, 1900.

Dr. William R. Harper,
University of Chicago.

My Dear Mr. President:

Thanks for yours of the 31st ult., just at hand, to which I respond by saying that I shall be more than delighted to have you nominate the preacher for the next baccalaureate sermon.

I think you have had experience enough of me to know that I generally say what I mean, and if I had strenuous objections to any nomination you might wish to make I should certainly name them to you.

I do not believe I shall be "absolutely and utterly surprised and astounded" by your nomination. I was about to write "by anything you could do," but such an Irish bull as that I think would make you both surprised and astounded!

I commit myself irrevocably, with a single reservation, which is that you do not nominate for the sermon either of such lay preachers as Dr. Senn or myself!

Please do not forget (as you must by this have received the list of subjects for the discussion on the 20th) to give me the names of the University men whom you have selected for the discussion.

Yours very faithfully,

[Signature]

CHICAGO

100 STATE STREET

Mr. William H. Nathan.

President University of Chicago

My dear Mr. President:

Thank you for the start on the letter. I am at a loss to say what I shall do with this thing. I have been meaning to write for some time to ask you to nominate me for the next presidency. I think you have the experience needed, and if I had to choose a successor to myself I should choose you. Should you not be a candidate, I should like to have you accept a nomination from the board as a token of our regard.

I am not going to write you personally, but I am sure you will think more of this than I do. If you wish to let me know of your intention, please write to me at this address.

With best wishes,

Yours very truly,

[Signature]
Chicago, Ill. No. 100 State Street,
March 15th 1898

My dear Mr. President:

On the occasion of our dinner last Thursday, you referred to
the proposed Circular of Information (proposed to be issued by Rush
Medical College) and as I am somewhat at a loss to know what to do, I
naturally turn to you for instruction.

I fully agree with you respecting the importance of removing
the College debt, even as to its paramount importance, but with or
without a debt, and whether we go on in the old lines or the new,
we must let students know that we shall be ready to receive them and
on what terms for the coming session. More than this, we must do it
soon if we purpose meeting them at the portals of the educational in-
stitutions from which they will before many weeks be graduated.

Having all this in view I purchased for the College 15000 envelopes
to contain either the Circular or the Announcement; and these have been
gradually addressed by the clerks at the College so that we are nearly
in position to issue something—what?

Taking the opinions of the gentlemen whom I have met in the
Faculty, they are in agreement that without your name as President
on the proposed Circular, it will be idle to issue it: and I think that
this is the correct position. If we are not to have the benefit of
your name until after the termination of the contract between Rush and
Lake Forest, I am strongly in favor of issuing no Circular, but only our
regular Announcement; and that in the form which is most acceptable to
you. Even with this latter arrangement, it seems to me that we must
be about the work (I believe that it was farther advanced last year at
this time) and I believe that the 15000 envelopes can be utilized as
Mr. Head Teacher:

On the occasion of our annual farewell function, I am writing to propose the formation of a new committee to be known as the Woodstock College Committee. I believe this is of utmost importance, and I urge you to support this proposal.

I fully agree with you regarding the importance of maintaining our college's reputation as a center of learning. With the current state of affairs, we must take proactive measures to ensure the continued excellence of the college.

I propose that we set up a committee to oversee the formulation and implementation of the new committee's agenda. The committee will be composed of representatives from various departments of the college and will be chaired by the head of the department.

Dear colleagues, I urge you to support this proposal and contribute your valuable insights. Let us work together to ensure the success of this initiative.

Sincerely,

[Signature]
well for the Announcement as for the Circular.

I shall be under great obligations if you will kindly give me
definite instructions on these points: and also if you will send me,
with any suggestions that may occur to you, the type-written scheme
for the Circular sent you by me, as in either of the two events con-
templated in this letter, your suggestions may be adopted. I sup-
pose the scheme of preliminary examinations prepared by the Committee
appointed for that purpose by the Council of Administration has been
presented to you. It commends itself to me.

Let me add that I greatly object to troubling you unneces-
sarily about these details, as you are busy enough, I am sure: and
I have communicated with some of my colleagues touching this point.
We desire to request the Board of Trustees to provide for you a salary
from the College funds which will be to you at least something in
the way of an equivalent for the time, trouble, correspondence, etc.
etc. which the work laid upon you as President of the College re-
quires. It is neither right nor acceptable that we should have the
aid of an expert whose remuneration comes from other sources and those
sources not originally contemplating the expenditure of labor and
skilled experience on our institution. The proposed action, in no
way suggested nor asked for by yourself, will be placed on a proper
footing before the Board of Trustees when coming as a request from the
cooperating members of the Council and the Faculty.

Yours very sincerely,

[Signature]

P. S. Do not forget to name the speaker for the Commencement, now
only about sixty days away. He must have some time to prepare.
Well for the information to the Council.

I have no doubt greater assistance if you will kindly give the

matter further consideration on these points: and also if you will kindly

notify me of any suggestions that may occur to you. The Tyne-Wear Expe-

rience for the Council's benefit you may see as in gentleman of the two services will

commit himself to a notice to the Tyne-Wear, your suggestion may be accepted. I end

by expressing for your benefit on the Council's of all kind I have been

presenting to you. If there are points that I may apply to your mind.

I would point these matters as you may wish yourself, I am sure and

I have communicated my sense of the College to the Council's consideration. I have

attacked to reduce our number of allowances to provide for an extra

year of an entrance on the time, college, correspondence, to the

which I am sure will do to you at least something in

the College, college which will do to you of the least concern in

the third. It is necessary that you make your will known as to the position of the College, to

make you less your responsibilities and how short time the

assistance of an expert whose recommendation comes from other sources and whose

advice experience on our identification. The proposition of the Board of

Tyne West Point in a letter from the post of the Board of Trustees when coming as a request from the

cooperating members of the Council, and the faculty.

Yours very sincerely,

[Signature]
During the examination please preserve as much quiet in the room as is possible, so that others may not be disturbed. Two hours are allotted for the examination. There is no need to reproduce the questions, which may be referred to by number. Legibility and exactness are essential. Those unfamiliar with English have permission to write in German, French, Spanish, or Italian.

I

The subject of the photograph shown you is a young, married woman about twenty-five years of age. The lesions began to appear on her face one year ago, since which time they have gradually increased to their present size and number. The lesions are solid, fairly firm in consistency, but not indurated. Their color is a dull, brownish red. There is no history of syphilis in either husband or wife. She is of foreign parentage, but was born in this country and has never been outside of it. Give three possible diagnoses in order of probability.

II

Describe urticaria.

III

Distinguish between lichen planus and papular eczema.

IV

Describe briefly the symptoms, prognosis and treatment of herpes genitalis.

V

Give differential diagnosis between the bubo of syphilis and that of chancroid.

VI

In what strength and in what quantities will you use mercurial ointment in the treatment of syphilis of adults?

VII

A man, 5 feet 10 inches in height, married, leading a sedentary life, weighing 122 pounds, presents a severe acute eczema of both lower limbs, with a few eczematous patches upon the dorsum of the hands and wrists. Patient uses neither tobacco nor alcohol, and the functions of his various organs are in general well performed. How undertake his treatment?

VIII

A gentleman, aged 54, married, and the father of four healthy children, exhibits an indolent lesion involving the right ala of the nose, extending outward upon the cheek. The growth began one year ago, after a slight injury to the part, and now covers an irregular area about the size of a silver twenty-five-cent piece. It is reddish yellow in color, slightly indurated and sparsely covered with tenacious crusts, some of which cover ulcerating points, while others are attached more or less firmly to the reddened epidermis. Throughout the area affected islets of cicatricial tissue can be demonstrated. A few papilliform excrescences can be seen near one border. Pain in the part is limited to a slight degree of burning and to occasional pricking sensations. The area of involvement is slowly enlarging. The patient's general health is perfect. What is the probable diagnosis?
EXAMINATION DISCIPLINE

Discipline in the examination halls is a matter of honor. It is essential for the proper conduct of the examination and for the maintenance of the integrity of the University. Therefore, strict adherence to the rules of examination is required.

1. All candidates must be present on time.

2. No books, notes, or other materials are allowed into the examination room.

3. Candidates must not communicate in any way with other candidates or anyone else during the examination.

4. Any candidate who is found to be in violation of the rules of examination will be immediately dismissed from the examination.

5. The supervisor of the examination will maintain strict discipline during the examination.

Failure to observe these rules will result in serious consequences.

[Date]

Supervisor of Examinations
May, 7th 1898

My dear Mr. President:

I hope that you will not think I am trespassing too much on your time.

I ordered my examination papers printed at the University press and received the enclosed last night late, with one word misspelled which can be readily corrected.

The point, however, is that I as usual, purposely omitted the heading "Rush Medical College: Examination questions" which have been added in the printing office. This is an advertisement to every man setting type that by only a little dishonesty he might make money and corrupt my examination.

I write to ask if you are certain that I can rely on the printing-office. It is a matter of some importance.

Sincerely yours,
My dear Mr. President:

I hope that you will not think I am trespassing too much on your time.

I agree with the recommendation that the University Press
and receive the enclosed first night paper with one word upon the
which can be readily corrected.

The point, however, to which I am nextly referring
the heading "Mendel's College Examination Board" which you
have been again to the printing office. This is the beginning of every
year taking the chair of only a little paragraph in which may
the committee on examination.

I write to ask if you are familiar with I can rely on the

President William R. Harper,

City.

My Dear Mr. President:--Thanks for yours of the 11th at hand.

An appeal through you can scarcely be denied. I will, with your permission, therefore, compromise by putting your name on the program as President of the University only in the Processional, and will hope that you will say something in public even though your name be not on the program. If you think well to change your mind I am confident you will let me know in time.

I have blocked out the program roughly and will ask you to request Mr. Walker, when it is in his hands, to submit it to you for any suggestions you may have to make, for which I shall be very thankful.

Coolidge has just left me with draft of a line to be sent to the Trustees with reference to providing seats for their families. I shall place a box at your disposal, and if any guests are to be provided for, please notify me at an early moment.

President William E. Harper
Chicago

My dear Mr. President--I am very glad to have the opportunity of presenting this letter to you. I have had the privilege of knowing your name and work for many years, and I am sure that you will find it a pleasure to hear from me.

In my capacity as Secretary of the University, I am writing to express my opinion regarding the situation at the present time. I believe that the University should take a leading role in the promotion of world peace and understanding. I would like to suggest that the University could play a significant role in this endeavor.

I have been in touch with a number of prominent individuals who are interested in this matter, and I believe that they would be willing to contribute their expertise and resources to further the cause of peace and understanding.

I am writing to ask if you would be willing to meet with me to discuss this matter further. I am sure that you will find it a pleasure to hear from me.

Sincerely yours,

[Signature]

PS: Please let me know if you are available to meet at your earliest convenience.
Oct. 22d, 1898.

President Wm. R. Harper,
University of Chicago.

My Dear Mr. President:

I have just telephoned you to the effect that at any time between the hours of nine A.M. and two P.M. of week days you should be able to communicate with me rapidly by calling me up by telephone, Ex. 592, and adding that Dr. Harper wishes to see Dr. Hyde. This last is necessary because I send my office maid, or one of my assistants to all telephone calls which do not expressly concern me. If I know you are at the instrument I will leave any work on which I am engaged for the purpose of communicating with you.

I write this because in a note just received from Dr. Ingals, he says "I wish you had a telephone so that Dr. Harper could get you whenever he had a message that needed quick transmission".

We will arrange for the faculty meeting on Wednesday evening, November 2nd, and if you desire to have a meeting of the Council before that time kindly notify me.

I desire to congratulate you most heartily on the fine showing made by the College on the 17th. Our Registrar informs
OCT. 29, 1936

Mr. President:

I have just telephoned you to the effect that at any time between five o'clock A.M. and two o'clock P.M. of each day you should be able to communicate with me regularly by telephone at my office. My telephone number is 232. Any time I am at the Institute I will leave my work on which I am engaged for the purpose of communication with you.

I will write this message in a note just received from Dr. Harper.

I also wish you had a telephone at 232. Dr. Harper

We will arrange for the faculty meeting on Wednesday evening, November 14th, and I hope to have a meeting of the committee before that time kindly notify me.

I am glad to cooperate with you most heartily on the line mentioned by the College on the V.I.R., our registrar, informing
me that we had 720 men in line. It would be difficult to praise too highly the fine address of Prof. Small.

Yours very respectfully,

Chicago, Sept. 15th, 1899.

President Wm. R. Harper,

University of Chicago,

Chicago, Illinois.

My Dear Mr. President:—

I have to thank you for yours of the 13th at hand, in which you have detected a discrepancy between my records of the last faculty meeting and both your and my recollection of what happened. I should like to lay this to the charge of the stenographer, but I am afraid I shall have to bear the burden myself. I have a distinct recollection now of the fact that the opening lecture of the college on account of the Convocation of the University, was deferred for several days, and there was some discussion of the propriety of having the "beginning" after we had "begun," which was satisfactorily settled. In view of all the facts, I trust you will approve of the date, which my memory seems to suggest as that originally settled upon, viz: Wednesday evening October the 4th. I will ask you to do me the kindness to approve of this if satisfactory; and if not, to fix upon the Thursday following. Fortunately up to this date no notices have gone out.

Of course we shall greatly miss you at the faculty dinner, and I would like to know, if on account of your absence the same cannot be postponed for especial reasons. As this is
Chicago, Sept. 15th, 1899.

the first meeting of the year I regard it as a matter of considerable importance. Have the goodness to tell me when you can meet with us and I will arrange to have the meeting legally postponed to that date.

It will never do for you to be absent at the inauguration of the President of Yale!

A proof of the new Announcement was sent to you by my order. Do you think it desirable to have a good part of this stereotyped in order that the edition which has been promised for issue in a few months to come, can utilize the same?

Sincerely yours,

[Signature]

I will ask Dr. Miller to
say a few words
the first meeting of the year and I regret it as a matter of policy.

I have the honor to request that you attend the meeting.

I will be happy to have the meeting.

Yours sincerely,

[Signature]
October 24th, 1902.

I am very much obliged to you for your long and interesting letter of October 22nd. I was sorry to miss the faculty meeting, but I had the other engagement on hand. I agree with you that we must fix the date for the Senn Hall dedication. This is very important. As soon as I return from New York (I am starting within an hour), I will take up the matter with you.

I note what you say concerning the dinner with the entire teaching force and the new lectureship. These are all interesting questions and we must get them arranged. I have little doubt that the Rush Medical faculty is the first faculty to wear cap and gown. This is certainly something of which we ought to be proud, in view of recent tendencies in these matters.

Thanking you for your letter, I remain

Yours very truly,

N.B. It was a source of great satisfaction to me last Wednesday night to get a little better acquainted with your son.

Dr. James Novins Hyde,

100 State St., Chicago
September 25th, 1937

Mr. President:

I am very much obliged to you for your letter and interesting letter of October 25th. I am sorry to hear the recent meeting, and I have the utmost sympathy, on hand, in your situation.

We have met with him recently for the same situation.

There is very important. As soon as I return from New York (I expect to return by the 1st of October) I shall take up the matter with you. I note what you say concerning the Chinese, with the Chinese.

Furthermore, both the new, local, and the new, local, Chinese, are not guilty of any wrongdoing, I have little doubt that the new, local, faculty is the fairest faculty to wear cap and gown. There is certainty that we hold no to be found in view of the recent suggestions of these matters.

Thanking you for your letter, I remain

Yours very truly,

James W. Jones

110 State St., Chicago
President William R. Harper,

University of Chicago, Chicago.

My dear Mr. President:—

We missed you last night at the Faculty meeting, but seeing that you represented us so well, as I learn, at the installation of the President of a rival institution, we shall forgive you for your absence and congratulate you on your representation of us elsewhere.

I trust I may secure your aid, first, in deciding upon the date this quarter (settled upon by the Faculty last night) for the dedication of the Senn Hall. It is hoped to make this dedication an affair of some consequence, and I shall soon write Sir William Hingston, of Montreal, to discover whether he is edgewise because he was shunted off from the presentation of the address provided for last spring, and whether we can secure him for the notable ceremony in November or December.

You once made some suggestions to me regarding the Fellowship and Prize matter. At the time the suggestions seemed to me very enticing and I am anxious to get some hints from you respecting what is best to be recommended in this connection.

The annual dinner of the entire teaching force of the College was set last night for the Winter Quarter of 1903, and the Committee is open to suggestions for a topic of discussion at that time. We
hope this year that you and all the trustees can be present with us. Suggestions for the date of this dinner at your convenience will be appreciated.

You will probably be pleased to know that a committee, consisting of Dean Billings, Dr. Bevan, and myself, was appointed to raise a fund of $200 each year to be devoted to a lectureship on some scientific subject which will be of attractive interest to the entire medical profession, and possibly to others. Each of the members of the committee having subscribed $25, we have an assured $75 to start with, of the $200 to be appropriated annually; and any suggestions with reference to this will be very acceptable. I have nominated Simon Flexner, of the University of Pennsylvania, for the lectureship in 1903, and acceded to it, I think the other members of the committee were very favorably impressed with it. Of course, you understand that we should soon select our man, as his winter's work will probably include that required in the preparation of an address of this character, announcement of which we should wish to make some time in advance.

Any suggestions that you may have to make respecting these or other subjects for the coming year will be highly appreciated by all of us.

On looking over some musty records of the Faculty of Rush Medical College when searching for the "Agreement" between the College
and the Presbyterian Hospital, I found a minute which leads me to believe that the Faculty of Rush Medical College adopted cap and gown as academic dress for public use among the very first, if not the first, of our educational institutions in this country. The recommendation was passed in 1882.

Yours very faithfully,

[Signature]

secretary.

The Palmyra Altar

Gentlemen,

I have a further notice to communicate to you. I am in receipt of information that the family of Dr. Miller has been moved to the present premises for temporary accommodation. They have been residing at the house in York for some time. The description of the house is as follows:

32 York Street
York, PA

August 1, 1866

[Signature]

Secretary
Dear Doctor:—

It is planned to give a dinner to Sir William Hingston, and a few other invited guests, at the Chicago Club, on the evening of "dedication" day, Wednesday, Dec. 17th. The cost of the dinner will be $5.00 per plate and it will be given by such members of the faculty of professorial rank, as desire to attend. Will you kindly notify me at once, on the enclosed postal, whether or not you will attend the dinner?

Very truly yours,

James Nevins Hyde,
for the Committee.
Dear Professor,

I am pleased to invite you to a dinner to get acquainted with the Chicago Group on the evening and a few selected invited guests at the Chicago Hotel. ICF. The cost of the dinner will be $5.00 per plate and it will be given on Thanksgiving at the Hotel. It will be of interest to you as you will be coming on the next day. I am sure you will be interested in the dinner.

Very truly yours,

[Signature]

For the Committee
April 8th, 1902.

Dr. James N. Hyde,
100 State street, Chicago.

My dear Dr. Hyde:

I am delighted to get your letter of the seventh instant and to know the secret. It is certainly important that it should be kept a secret. I think that you deserve great credit for getting the matter into shape. This is splendid.

I will do what I can to be of service in the matter of the convocation.

Very truly yours,
April 6th, 1900

Dr. James M. Clyne,
100 State Street, Chicago

My dear Dr. Clyne:

I am delighted to get your letter.of the seventh instant and to know the secret. It is certainly important that it should be kept a secret. I think that you deserve great credit for getting the matter into shape. This is splendid. I will do what I can to be of service.

In the matter of the connection.

Very truly yours,

April 7th, 1902.

President William R. Harper,
University of Chicago, Chicago.

My dear Mr. President:—

Time is slipping by, and I must appeal to you for your active co-operation in the matter of the orator for the Rush Medical College Commencement, which it is generally understood by agreement will be held in accordance with your suggestion on Wednesday, the 18th of June next, in a tent to be erected upon the campus of the University grounds.

All the men thus far asked have failed us, and I fear it is now too late to secure an Eastern man. Who is there near us who will fill our needs? What of President Harlan of Lake Forest University, whom I met the other night at the Military Order of the Loyal Legion, and who seemed to be a very delightful gentleman? How about President Angell? I think he has served you once very well. How about others?

Please regard the following as a great secret. I have been endeavoring to secure the very handsome portrait of Professor Senn, in full regimentals, which you perhaps have seen displayed in a window on Michigan Avenue, painted by a Russian, I believe. I found that Dr. Senn did not own the portrait. It had been painted at the request of a friend of his, to whom the artist was indebted in a certain sum of money; in fact, Dr. Senn has exhibited very little
Mr. President:

Thank you for your interest in the matter of the offer to the University of Chicago of the Oil Company's property.

The initial meeting of the University's Board of Trustees was held on December 15, 1935, in the presence of the President of the University and the representatives of the Oil Company.

The meeting was convened at 10:00 A.M. in the main building of the University.

The President of the University welcomed the representatives of the Oil Company and expressed his appreciation for their interest in the University's welfare.

The representatives of the Oil Company presented their offer to the University, which was to convey to the University the property known as the University Park, located near the center of the University's campus.

The offer was made contingent upon the University's acceptance of the terms and conditions set forth in the offer.

After a thorough discussion of the offer, the Board of Trustees voted unanimously to accept the offer.

The offer was accepted with the understanding that the University will use the property for educational and research purposes.

The representatives of the Oil Company were thanked for their generosity and the President of the University expressed his appreciation for their interest in the University's welfare.

The meeting adjourned at 12:00 noon.

Yours sincerely,

[Signature]

President of the University of Chicago
Mr. Hempstead Washburne has written me stating that he would like to present this portrait to the Senn Hall, and I have asked him to keep the matter secret, as also Professor Senn, until the dedication, at which time it will be put under glass, properly secured for the future, and presented to the College. Yours very sincerely,

[Signature]

Secretary.
Chicago. May 29th, 1901.

President William R. Harper,

University of Chicago, Chicago.

My Dear Mr. President:—

Will you at as early a date as possible send to me a few paragraphs for publication in the medical number of the University Record on the subject of "The new relations between the University and the College," as arranged by the Faculty at its last meeting?

Sincerely yours,

[Signature]

Secretary.

My dear Dr. Harper:— With the pressure of two Conventions at hand and the need of absencing myself from my office, as a consequence for eight days I am getting off all the work possible in my study at home before leaving; and without my notes before me of the last meeting. Should there be meantime a Trustees meeting, kindly remember that Mr. Nathan Porter Colwell has been nominated by the Faculty as Assistant to the Deans; and that the Faculty have also recommended the Trustees to admit women to the freshman and sophomore years of Rush Medical College, on precisely the same terms and conditions as men, for medical study. Hastily yours,

J. N. H.
May 12th, 1914

With the pleasure of the Convocation of 1914 and the need of appreciating the importance of an accurate address, I am writing to inform you that the work done here at the School of Medicine has been acknowledged by the President of the University of Michigan. The College of Medicine has been nominated by the faculty and is now being considered for a new York medical school.

Yours sincerely,

[Signature]
May 29th, 1902.

President W. R. Harper,

University of Chicago, Chicago.

My dear Mr. President:--

Your letter of the 28th inst. is at hand, and in response I beg leave to say that we are pleased to have a letter from you in these dark hours preceding our commencement season, when all the world seems to have been frowning on Rush Medical College! Sir William Kingston writes me that his address was written exclusively with a view to the dedication of the new Clinical Building, and is wholly unfit for a Commencement address; further, that he is so pressed for time that it is impossible for him to make alterations in it. I have responded by telling him that I trust we shall have the pleasure of hearing from him when the building is dedicated, and that he will reserve his address for the purpose.

In the pressure, I at once communicated with Dodson, and we agreed that we would have to come nearer home in our selection, and so I have written Professor Albion Small (no answer as yet received), begging him to help us in our difficulty, or, in the "rare and impossible event" of his failing us, to nominate another for the place. Dodson seemed to think that our last hope, if Professor Small failed us, lay in Barker.

You will thus perceive that it is not a question of "singing the songs of Zion in a strange land," but of singing any kind of a song
in the tent which I trust will not be a strange land to the most
of our students, to whom I made a hortative address last Monday,
when I found on the blackboard a call of the class to protest against
going down there!

My dear Mr. President, I am of those who believe that every-
thing will come out right, and I am sure you will be pleased to
read that sentence. I am asking Rhodes to send you his printed pro-
gramme of the exercises at once, which will give you all the infor-
mation you require, but I regret to add you will find Sir William's
name set down in black and white on the paper.

Yours very truly,

[Signature]

Secretary.

102 State St.
In the event that I should not be able to attend fall to the front
of our students, to whom I must a posteriori address this
when I return on the preceding a call at the House to present

Pater et subheres.

Mr. President, I am of those who believe that your
find will come out right and I am sure you will be pleased to
read that sentence. I am writing because to many you the
president, of the excellence of one, which will fame you of the
mention you desire, and I believe to you will find it all the
new set you to think and write on the paper.

Yours very truly,

[Signature]
President William R. Harper,
University of Chicago, Chicago.

My dear Mr. President:

Thanks for yours of the 21st, and in accordance with its suggestions I am sending you a rough draft of a letter such as you desire me to prepare. I am much pleased that you like the suggestions for the two addresses we have in mind.

You note the special meeting of the Faculty called for to-night, where, if it is not an intrusion upon your rest, I trust we may meet you, and from which, should it be such an intrusion, I trust you will be absent. I think your noncommittal action in regard to the woman question, which always stirs my admiration, may be needed to-night for the balance-wheel of an opinion likely to be pushed to one side or the other by an unexpected impulse.

Many thanks for the kindness of your wishes with respect to my short vacation with my wife, and accept my assurances that it is a very great pleasure to me to learn that you are well.

Very faithfully yours,

[Signature]
Dear Mr. President:

Thank you for the letter and for the suggestion you have made. I am much pleased that you have taken the suggestion for the improvement of the University of Chicago Office. I am glad to hear that you have made the suggestion that you desire to adopt.

I believe that the suggestion will be accepted. I think that your recommendation is well-timed, and that it will be followed by action. I hope that it will be successful.

Very truly yours,

[Signature]
Jan. 21st, 1902.

My dear Dr. Hyde:-

I am in receipt of your letter of January eighteenth. I thank you for your kind response.

I note what you say in reference to the President of the University of Tokio, and I suggest that before you go away you prepare such a letter as from the discussion you know the faculty would like to have me send. I am sure that you can prepare the letter much better than myself.

I think you have done an admirable thing in inviting Sir William Kingston to deliver the address. This is splendid.

Professor Wilson's full name and address is, Professor Edmund B. Wilson, Columbia University, New York.

I trust that you will have a very pleasant trip to California and that your wife will be greatly benefited by it. You will be glad to know that I myself seem to be in perfect health in every respect. We shall, of course, ask Dr. Montgomery to be secretary at the next faculty meeting.

Yours very truly,
My dear Dr. Hagar:

I am in receipt of your letter of

January 8th. Thank you for your kind correspondence.

I note with pleasure your mention of the

University of Tokyo, and I suggest that if possible you may want

Professor Badeau to forward a letter as from the Government, you know the

students' money line to have me send it to you. If you can

perhaps the letter more directly, please write

I think you have gone an extra mile in inviting the

William Hinton to deliver the address. Please note the

Professor Badeau's letter in the name and address of Professor Badeau

at Wisconsin University, New York.

I trust that you will have a very pleasant trip to

California and that you will be greatly gratified by it.

You will do well to know that I myself seem to go in

heart and body. We will, of course, keep your

requests in mind, and we expect to be secretary at the next faculty meeting.

Yours very truly,

[Signature]
President W. R. Harper,

University of Chicago, Chicago.

My dear Mr. President:—

Your response to my last, dated the 17th, is in my hands, and in return I have to say that I shall observe your recommendation and retain for the time being the presentation to the Faculty of the action of the Council. I hope the time will come when you can notify me that I have your permission to present it.

At the last meeting of the Council, in addition to the item already presented to you, the request was made that you present to the President of the University of Tokio, Japan, in such terms as you deem most fitting, the assurances of cordial esteem of the Trustees and Faculty of the College and request them to place Rush Medical College upon the list of schools accredited by them, thus enabling our graduates to practice in the Empire. It was suggested also that you forward at the same time such printed matter as might throw light upon the curriculum, present standing, and prospects of the college.

You will be pleased to have me report that action also was taken, in view of Professor Senn's unwillingness to make an address at the dedication of the new Clinical Building, to invite Sir William Hingston, of Montreal, to deliver the address upon that occasion,
at the Commencement season next spring, and also to invite Professor Wilson, of Columbia University, to make the Doctorate address at the Commencement exercises. I should be very much pleased if you will be so good as to send me the full name and address of Professor Wilson, which I do not have.

I am expecting, on account of her health, to take my wife to California on the 10th prox., to be gone for three weeks only, and as I shall probably not be present at the next Faculty meeting I hope that my colleague, Dr. Montgomery, will be made Secretary pro tem on that occasion, as he will have access to all my minutes, and can not only report to me for the next meeting after, but also can be posted by me respecting the matters which are officially to be brought before the meeting. I trust you will be there.

Yours very faithfully,

Chicago, Feb. 21, 1907.

My dear Doctor:

An informal meeting of the members of the Faculty of Rush Medical College having professional rank, was held in the office of Dean Billings on February 16th, 1907. The object of the meeting was to furnish an opportunity for conference respecting the recent action of the Council of Administration in asking for funds to enable the College, in the face of a deficit, to continue its work to the end of the present fiscal year.

The Secretary explained that the Council recognized the fact that it was not a legislative body, but served merely as the Executive Committee of the Faculty, to whom it reported all action and from whom it received all authority. In the matter of the issuance of the late letter of appeal for funds, it was shown that, lacking better authority for the moment and before it was practicable to secure such from the Faculty, the acuteness of the crisis had influenced the Council to solicit at once funds from members of the Faculty. It was also shown that the immediate result of the appeal thus made was the placing in the hands of the Comptroller, a sum sufficient to meet the emergencies of the moment.

At the date of the Conference, on the 16th, the Secretary was requested to issue a second letter explaining the facts to the interested members of the Faculty.

The Secretary is pleased to have the opportunity and permission to call your attention now to the fact that it was not the
To great Teachers

An important matter of the President of the University of
Exeter College of Education, needs to be mentioned and
your assistance in forwarding thereof is requested. The matter
relates to the consideration of the proposal for the revision and
reorganization of the Faculty of Education. The main aim is to
continue the work of the

College. As the year 1947 is over we are,
according to the Act of Parliament the 26th

We are therefore required to inform the authorities of the

College of the necessity of the revision of the

Curricula. We feel it is important to

be aware of the needs of the students and to

prepare accordingly. The College is at present in a state of

transition and it is necessary to have a clear

understanding of the future. The main aim is to

continue the work of the College. The

recommendation to revise the Faculty is supported by the

latter to the extent that it needs to be

considered.

We would like to draw your attention to the

important matter and to ask for your

cooperation in this matter.
intention to levy an assessment upon the members of the Faculty; that in the emergency occasioned by the lack of funds, voluntary contributions only were solicited; that it is understood subscriptions may be made, if not for the whole, for any part of the sum originally asked for; that no obligation has been laid upon any member of the Faculty to contribute; that no one is asked to contribute who is not only willing but also abundantly able to do so; and that failure to contribute will in no case be construed to the disadvantage or embarrassment of any member.

Dean Billings felt so strongly the need of making the assurances set forth above that, before sailing from New York City, he dispatched a special letter to the Secretary begging that these points might be made clear to all those to whom the original appeal for funds was made. All are working together for the good of the College. The self-sacrifice exhibited in the past by its teaching force is unquestionably beyond praise. It is better to win without lowering its standards than to recede from the front rank which the College has attained by virtue of its self denying labor. Those best qualified to know give assurance that with patience and courage the end in view will be attained.

Meantime, it is a pleasure to record the fact, vouched for by the best authority, that the medical instruction given by the Faculty of the College was never more effective, scientific, and praiseworthy than at present.

Yours truly,
Mr. Harry Pratt Judson,
City.

My dear Mr. President:

At the meeting of the faculty of the Rush Medical College I read an invitation extended to both the University of Chicago and Rush Medical College on the part of the President and trustees of the Western Reserve University and faculty of the Medical College, inviting both the medical department of the Chicago University and Rush Medical College to be represented by a delegate at the dedication of the H.K. Cushing Laboratory of Experimental Medicine to be held Friday, Nov. 20th. There is to be a luncheon at the medical at one P.M.; and the dedication exercises at two thirty P.M. on the same day in the same place with an address by William Henry Welch of the Johns Hopkins University.

At the meeting named above you are authorized with the Dean of Rush Medical College to name a delegate of the above university and college to be present at this dedication.

If you will kindly inform me of the person or persons whom you desire to designate for this purpose, it will be my pleasure to give them the necessary certificate.

Yours truly,
Mr. Heath Pasadena

Chicago.

Mr. President:

At the request of the faculty of the Rush Medical College I have the honor to submit the following statement of the position of the Rush Medical College in the University of Chicago and the Medical Department of the University and to make the following recommendations to the faculty of the Rush Medical College as a member of the University and the Medical Department of the University the faculty of the Rush Medical College to be represented by a delegate at the Board of the University and the Medical College and to be represented in the Board of the University.

The Board of the Rush Medical College is composed of five members, one of whom shall be the President of the College, one of whom shall be the Secretary of the College, and the remaining three shall be elected by the faculty of the College. The Board of the Rush Medical College shall meet at least once in every three months, and the Board of the University and the Medical Department of the University shall meet at least once in every six months. The Board of the University and the Medical Department of the University shall have the power to appoint a delegate to represent the faculty of the Rush Medical College in the Board of the University and the Medical Department of the University.

If you will kindly inform me at the earliest possible date when you propose to send scattering for this purpose, I will be pleased to expedite the necessary arrangements.

 Yours truly,
