Departments of Instruction.

The organization of the University embraces the following Departments:

I. — Academy.

A serious evil, experienced by all Colleges, is the defective preparation of students—an evil which in the West has been aggravated by the want of preparatory Schools of a high character. To meet this want, the Trustees have connected with the University a Grammar School or Academy, intended to be a first-class school of preparation for this or other Colleges, and also for general education.

For those whose object is to fit for College, the requisite studies have been arranged in a course of three years, as appears by the following schedule. Intelligent boys of twelve years and upwards will be admitted to the first class, on showing a fair knowledge of the primary studies, including, in all cases, Intellectual Arithmetic, and Practical Arithmetic as far as Common Fractions; and to the more advanced classes, when found prepared. Those whose aim is general or business education, without reference to preparation for College, may pursue any studies which they may choose in the regular course; and also special classes will be formed, as occasion shall arise, in all the branches taught in the best Academies, such as Natural Philosophy, Astronomy, Physiology and History.

The Professors of the University have charge of the academic studies belonging to their several departments,—an arrangement, which, it is believed, will give to the Academy a degree of efficiency that cannot fail to be appreciated by the public.

FIRST YEAR.

Winter Term.

Practical Arithmetic.
English Grammar. Sanders' Analysis of Words.
Andrews' First Latin Book.

Spring Term.

Practical Arithmetic finished.
English Grammar. Quackenbos' First Lessons.
Andrews' Latin Reader.

SECOND YEAR.

Fall Term.

Robinson's Elementary Algebra.
Latin Reader and Caesar.
Analysis of English Sentences and Words.
First Lessons in Composition.

Winter Term.

Elementary Algebra.
Cesar.
Greek Lessons.
Physical Geography.

Spring Term.

Cicero.
Greek Lessons.
Elements of Physiology.

THIRD YEAR.

Fall Term.

Robinson's Higher Arithmetic.
Cicero.
Kendrick's Greek Ollendorf.
Greek Reader.
Quackenbos' Rhetoric.

Winter Term.

Higher Arithmetic.
Virgil.
Rhetoric.
Greek Ollendorf.
Anabasis.

Spring Term.

Higher Arithmetic and Elementary Algebra finished.
Virgil.
Anabasis.

Reading, Spelling and Penmanship during the first two years; Book Keeping and Linear Drawing the third year; Compositions and Declamations through the entire course.

II.—COLLEGE.

In this Department there are two distinct courses of Instruction:

L.—CLASSICAL COURSE.

REQUIREMENTS FOR ADMISSION.

Candidates for admission to the Freshman Class in the Classical Course are examined in the following books, viz.:

English Grammar.
Geography—Common and Physical.
History of the United States.
Elements of Natural Philosophy.
Arithmetic—Intellectual, Practical and Higher.
Algebra—Robinson’s Elementary, entire.
Greek—Grammar, Reader, Kendrick’s Greek Ollendorf, and three books of Xenophon’s Anabasis.
Latin—Grammar; Reader; four books of Caesar’s Commentaries, or Cornelius Nepos; six books of Virgil’s Aeneid; six orations of Cicero.

Candidates for advanced standing, whether from other Colleges or not, are examined in the studies previously pursued by the class which they propose to enter.

No person under fifteen years of age will be admitted to the Freshman Class, nor will any one be admitted to an advanced standing, without a proportionate increase of age.

Testimonials of good moral character are required in all cases; and every student from another College must produce a certificate of regular discharge.

To prevent disappointment to the applicant, it should be distinctly understood that a thorough knowledge of the prescribed studies is more likely to insure admission, and enable the student to reap the full benefits of the Collegiate Course, than a superficial acquaintance with some higher branches of literature and science. A critical knowledge of English, Latin, and Greek Grammar, Mental Arithmetic, and Arithmetical Analysis, is indispensable.

FRESHMAN CLASS.

1. Xenophon’s Anabasis.
2. Greek Prose Composition.
3. Smith’s History of Greece.
4. Lincoln’s Livy.
5. Latin Prosody and Higher Syntax.
6. Robinson’s New University Algebra.

WINTER TERM...

1. Geometry completed.
2. Original Demonstrations, and Practical Exercises.
3. Application of Algebra to Geometry.

SPRING TERM...

1. Homer’s Iliad. (Owen.)
3. Latin Versification.

Weekly exercises in composition, or Quackenbo’s Rhetoric, throughout the year.

SOPHOMORE CLASS.

1. Plane and Analytical Trigonometry.
2. Cicero’s Philosophical Works. (Loomis.)
3. German.

FALL TERM...

1. Select Orations of Isocrates.

WINTER TERM...

1. Tacitus. Germania and Agricola, or Histories.
2. Rhetoric. (Day and Whately.)
3. Conic Sections. Analytical Geometry. (Optional.)

SPRING TERM...

1. Tacitus. Germania and Agricola, or Histories.
2. Rhetoric. (Day and Whately.)
3. Conic Sections. Analytical Geometry. (Optional.)
4. Demosthenes on the Crown. (Champlin.)
5. Greek Antiquities.
2—SCIENTIFIC COURSE.

With all the admitted excellence of the established curriculum of studies in American Colleges, it was too much to expect that it would be adapted to all the differences of intellectual constitution, and of practical aims. While, therefore, fully recognizing the paramount claims of the Classical Course, the Trustees have deemed it expedient to provide another, which, with some important variations, is believed adequate to a preparation for many of the practical callings of life.

REQUIREMENTS FOR ADMISSION.

For the Scientific Course students will be examined in the same studies as for the Classical, with the omission of Greek altogether, and of Latin, excepting the Latin Grammar and Reader.

FRESHMAN CLASS.

1. Algebra.
2. Cesar.

FALL Term.

1. Algebra and Geometry.

WINTER Term.

   Application of Algebra to Geometry.
2. Cicero’s Orations.

Weekly exercises in Composition, or Quackenbos’s Rhetoric, throughout the year.

JUNIOR CLASS.

1. Metaphysics.
2. Trigonometry, Mensuration and Surveying.
3. English Literature. Synonyms.

FALL Term.

   Algebra completed.
3. French.

WINTER Term.

1. Natural Philosophy completed.
2. Conic Sections.

SPRING Term.

1. Analytical Geometry.
2. Conic Sections.

SENIOR CLASS.

Same studies as the Senior Class in the Classical Course, and in the same order.
III.—AGRICULTURAL DEPARTMENT.

It is a common objection to the American College System, that, copying to a great extent the European, it is adjusted to a condition of society almost wholly unlike that prevalent in this country, and is consequently ill adapted to meet American wants.

Without accepting this view in its whole extent, and while, on the contrary, they would allow nothing to supersede or interfere with a liberal provision for classical and scientific culture, the managers of the University have still felt that they ought not to overlook the almost universal demand for what is known as "a practical education." They have sought, therefore, to meet that demand, in part, by the organization of a Scientific Course; still farther by liberal arrangements for the election by students, or their proper advisers, of the studies which they will pursue. In pursuance of the same views, and with due reference to the fact that the University is located in the centre of the greatest agricultural district in the world, where many young men will till the soil, the Board has organized this department. It has not been deemed best to limit the range of studies to such only as illustrate or aid agricultural processes, but to establish an independent course, adequate of itself to meet that claim to liberal culture which the sons of farmers, not less than other young men, are asserting for themselves.

The course will require two years.

CONDITIONS OF ADMISSION.

An acquaintance with the leading branches of a good English education will be required.

FIRST YEAR.

Elementary Algebra. (Robinson.)
Higher Arithmetic. (Robinson.)
English Language. Wollen's Grammar. Quackenbos.
Chemistry.
Taking and Preserving Selons.
Structural Botany. Growth of Plants. Lectures.

Agricultural Chemistry.
Arithmetic completed.
Geometry. (Davies's Legendre.)
English Language.
Physical Geography. (Warren.)
Root and Stock Grafting.

FALL TERM......

SPRING TERM....

Botany. (Gray.)
English Language and Literature.
Elements of Natural Philosophy.
Modern History.
Setting Trees and Shrubs.
Training, Pruning, Grafting and Budding.

SECOND YEAR.

Astronomy.
Trigonometry.
Agricultural Chemistry continued.
Agricultural Botany.
Surveying, Construction of Topographical Maps with reference to Roads, Drainage, Irrigation, Landscape Gardening, etc.
Architectural Drawing.
Book-Keeping applied to the Farm.

Astronomy.
Mineralogy.
Geology.
Algebra finished.
Outline of Comparative Anatomy.
History of Literature, general and agricultural.
Principles of Veterinary Practice.
Architectural Drawing.

Zoology.
Entomology.
Meteorology.
Collecting and Examining Botanical, Mineralogical, Zoological, Anatomical and Entomological Specimens.
IV.—LAW DEPARTMENT.

The superior facilities furnished by Law Schools, for instruction in the science and practice of Law, are now fully appreciated by the Profession and the public.

Formerly, the student, for want of better opportunities, was compelled to avail himself of such as could be had in the office of a practitioner. Amid the constant interruptions and distractions of business, by the unaided perusal of such books as chance or accident might cast in his way, he was expected to obtain a complete knowledge of the most complex and comprehensive of the sciences, and to acquire a mastery of the most difficult of arts.

But a regular, systematic course of study, under experienced teaching, is admitted to be as indispensable to the attorney as to the medical or theological student. Experience has shown that a better preparation for the Bar may be had in the Law School in one year, than is ordinarily obtained in an office in two or three. In an office the student usually receives but little attention. If he studies under an eminent lawyer, his chances of proficiency are frequently less favorable than under some humbler practitioner. The distinguished counsellor is too exclusively and too profitably occupied with his clients to afford the necessary time, even if he have the necessary patience or skill, to solve the doubts of the student who, amid ceaseless embarrassments and interruptions, blindly gropes his way through the pages of Coke and Blackstone. Every lawyer knows this; and the practical difference between such surroundings, and those of a well conducted Law School, where it is the sole business of experienced professors to direct and facilitate the student's progress, is too obvious to require comment.

The force of these considerations has been keenly felt in the West, where, till lately, there has been no school of preparation for the Bar.

To fill this chasm in the educational institutions of this part of our country, and furnish an opportunity for a thorough training, without the expense of traveling abroad for the purpose, was the object designed in the establishment of the school.

PLAN OF INSTRUCTION.

The training of a lawyer, in order to secure complete success, should be of a three-fold character. First: he should have a critical acquaintance with the principles of Law, as a Science; Secondly: the power to make a ready application of those principles in practice as an Art; and lastly, a graceful elocution—a fluent, easy, and forcible style of extemporaneous speech—without which, however solid his acquirements, it is scarcely possible for him to attain eminence at the Bar.

The plan of the School contemplates the attainment of the several objects in the mode best adapted to each. For the mastery of the science, reliance is placed upon the reading of the best legal works, under proper instructions, together with daily examinations in the classes upon the subjects studied. For the sake of variety, lectures, also, are given in certain departments of jurisprudence, but not to such an extent as to form a prominent feature of the plan. Experience has shown that the recitation system, by which each student is examined daily, or oftener, in the presence of his class, with the advantage of mutual criticism and free inquiry by his associates, and of explanations and corrections by the professor, is a more effectual method of imparting a thorough knowledge of legal principles, than any system of mere oral instruction by lectures.

There are at all times, in the school, three regular classes, according to the different degrees of proficiency; and each student is at liberty to attend in any one or all of the classes. The professors meet each of these classes in the lecture room, daily, for an examination or lecture, devoting from four to five hours to the various exercises.

In order that the student may be versed in the practice of the Law, Moot Courts are held. In these he is familiarized with the application of legal remedies and the different forms of actions, the bringing of suits, the drawing of papers and pleadings, and with all the various steps and stages in the preparation of a cause for trial; then with the trial, involving the application of the rules of evidence; with the argument of counsel, the charge, the verdict, motion in arrest of judgment, writ of error, etc. In all these various stages, the forms of a real case are preserved, and as the trial takes place in the presence of the class, who act in the capacity of counsel, jurors, witnesses or officers of the court, and before the professor who sits as judge, with the double object of illustrating important legal principles as well as explaining the rules of practice, it is easy to see that the exercises become in a high degree interesting and profitable.

Besides this, the student is also instructed from time to time in the drawing of contracts, deeds, wills, and all the legal forms usual in an attorney's office.

Lastly, to impart the grace of a finished elocution, and an easy, forcible style of extemporaneous delivery, declamations, drill speeches and debates, under the instructions of a professor, will form a part of the exercises of the School. These debates are chiefly upon subjects of an historical nature, connected with the growth of our own institutions or those of the country from which ours are so largely derived.

A Congress, comprising a Senate and House of Representatives, with speakers, committees, etc., has been organized by the students, which holds its sessions once a week for the discussion of subjects of governmental policy, thus affording additional opportunities for practice in speaking, as well as for becoming acquainted with parliamentary rules and tactics.

TERMS, DIPLOMAS, ADMISSION AT THE BAR, Etc.

There are three terms in the year, of thirteen weeks each. The first term begins on the third Wednesday in September; the second on the first Wednes-
day in January; and the third on the second Wednesday in April. A full course of study occupies two years, or six terms; embracing the various branches of the common law, equity, admiralty, commercial, international and constitutional law, and the jurisprudence of the United States. There is also a less extensive course of commercial jurisprudence, for those intending to devote themselves to mercantile pursuits. At the close of the collegiate year, there is a public examination in the presence of the Faculty and Trustees of the University, when each student who has attended the exercises of the School for three full terms, and is qualified to practise, receives the degree of Bachelor of Laws.

The following Order, made by the Supreme Court of the State of Illinois, was entered upon the record under date of May 12, 1863:

Ordered: That a Diploma from the Law School of the University of Chicago shall be deemed satisfactory evidence that the graduate is sufficiently learned in the law to entitle him to admission to the Bar of this Court.

TUITION FEES.

In order to make the benefits of the institution within the reach of as many young men as possible, it has been determined to reduce the tuition to the lowest rates at which it can be afforded. Hereafter the student will be charged, for a single term, $30; for two terms, $55; and for the three terms, or a school year, $75; in each case payable in advance. The graduating fee will be $10. In special cases, time will be given for the payment of tuition, upon satisfactory security. Students who enter for part of a term will pay in proportion to the time spent in the school. Those who wish to pursue a partial course of study, will be received on reasonable terms. No other preparation is required than a good common English Education.

COURSE OF READING.

A well selected Course of Reading has been adopted, comprising the best elementary works and digests, in the several departments of Law and Equity. Students will find their own books, and arrangements have been made by which they may be supplied at the lowest trade prices. Many of the students obtain the use of books from the numerous Law offices in the city, on favorable terms. Those who buy their books usually prefer to retain them, and thus begin a library; but, if they choose, they can sell them at the close of each term, at slightly reduced prices, in which case the net expense for books will be small.

BOARDING.

Good board may be had, in ordinary times, in boarding houses and private families at prices varying from $2.50 to $4 per week. Students who desire to economize can club together, hire a room, and board themselves at less expense.
General Information.

COMMERCIAL INSTRUCTION.

To meet the practical wants of the different classes of Students, the Trustees have made arrangements for regular instruction throughout the year in Penmanship, Book-Keeping, and other branches essential to a good Commercial Education.

Messrs. Bryant & Stratton, proprietors of the well known Commercial Colleges in many of the leading cities of the country, have charge of this department, and Prof. J. J. Delan, of the Chicago College, gives instruction to classes in the University. Every student in the preparatory department, or in the University proper, may have the benefit of this course without extra charge for tuition.

Those who wish to pursue Commercial studies more fully, may take the very thorough course of the Chicago College of Messrs. BRYANT & STRATTON, at thirty dollars for the course, or little more than half their regular charge.

ELECTIVE STUDIES.

Students may reside at the University and pursue studies for a longer or shorter time, in any of the classes, at their own election; subject, however, to the regulations of the University.

LECTURES.

In connection with the regular recitations, lectures are delivered on the following subjects: Chemistry, Natural Philosophy, Geology, Astronomy, Anatomy and Physiology, Zoology, Mental and Moral Philosophy, Greek History and Literature, Roman History and Literature, Verbal Criticism, and History of the English Language.

RHETORICAL EXERCISES.

The Senior, Junior, and Sophomore Classes have exercises in Composition once in three weeks. The Senior Class, in addition, deliver original orations once in three weeks. Instruction in Elocution is given to all the students, and declamations in the chapel are required of all, except the Senior Class, once in four weeks.

An annual premium is awarded for the best declamation by a member of the Freshman class, and for the best essay by a member of the Sophomore class.

EXAMINATIONS.

At the close of every Term, there are public examinations of all the classes, in the studies of the Term, in both the Collegiate and Academic Departments. The Senior examination takes place four weeks before Commencement.

RECORD OF STANDING.

Each member of the Faculty records, in numbers ranging from 100 to 0, the attendance, deportment, and character of the recitations, of each student in his class. The record is made the basis of discipline, and determines the standing of each student in his class and in college. At the close of each term, an average of these marks is taken, and after it has been transferred to a permanent record, is sent to the parents or guardians of the students.

DEGREES.

The Degree of Bachelor of Arts is conferred on all students who have completed the prescribed "Classical Course" of study, and passed satisfactory examinations therein; and the Degree of Bachelor of Science upon all who have completed the "Scientific Course," and passed similar examinations.

Bachelors of Arts of three years' standing, may receive the Degree of Master of Arts, provided that subsequent to graduation they shall have sustained a good moral character, and pursued some literary or scientific calling.

RELIGIOUS EXERCISES.

The duties of each day are opened and closed with religious services in the Chapel of the University, conducted by some member of the Faculty, at which all the students are required to be present.

On the Sabbath, they are required to attend public worship; in the forenoon, with some congregation in the city, selected with the approval of their parents; in the afternoon, in the Chapel of the University, where the President usually officiates. A Sabbath School and a Bible class are also held in the Chapel on Sabbath afternoons. The students also sustain a weekly prayer meeting.

SACRED MUSIC.

Instruction in Sacred Music is furnished to the Students in all the Departments, attendance on which is obligatory, as on other recitations.

ILLUSTRATIVE APPARATUS.

The Lectures on Chemistry and Natural Philosophy are illustrated by the best modern apparatus. The Botanical collection of Prof. Scammon numbers
over four thousand species. There are, also, moderate facilities for the illustration of Zoology, and other branches of Natural History.

The University has also secured the use of the fine collections of Prof. McChesney, comprising more than 15,000 specimens. No other such collection exists in the West, and very few such in the United States.

The Library, to which the Students have free access, contains about four thousand volumes, and will soon be enlarged by valuable additions.

Within the past year the University has secured a most important addition to its illustrative apparatus. The great Refracting Telescope constructed by Mr. Alvan Clark, of Boston, has been purchased, and will be mounted within the next few months. The Astronomers and Learned Societies of Europe, as well as of this country, have already recognized it as the most powerful refractor in the world.

LOCATION, BUILDINGS, Etc.

The location of the University is in the south part of Chicago, directly on the line of the State Street City Railway. The site was the gift of the late Senator Douglas, and is universally admired for its beauty and healthfulness. The building, so far as completed, is unsurpassed for the completeness of its arrangements, especially of the students' rooms, which are in suites of a study and two bed rooms, of good size and height, well ventilated, carpeted, and furnished with everything necessary, except sheets, pillow-cases and towels.

The main Building, 136x172 feet, is now in process of erection, and will be completed within the next year.

The "Dearborn Tower," for the great Equatorial Telescope, erected entirely by the munificence of Hon. J. Y. Seaman, LL. D., is rapidly approaching completion.

SOCIETIES.

There are three Societies in the University, conducted by the students; two Literary, and one Religious.

LOCAL ADVANTAGES.

As valuable accessories to the educational facilities of the University, students are encouraged to attend the able course of lectures furnished every winter by the Young Men's Association of Chicago, and also to hear distinguished speakers, whom great public occasions draw to the city.

In answer to many inquiries by patrons of the University for reliable institutions for female education, in such proximity to the University that members of the same family may enjoy occasional society during their education, reference is made with confidence to the following schools:

The Young Ladies' Collegiate Institute is a Boarding School, located at 751 Wabash avenue. Prof. M. R. Forey, A. M., is the Principal, with competent assistant teachers.

Dearborn Seminary is a well established institution, highly appreciated by the citizens of Chicago, under the management of Z. Grover, Esq., and an able corps of teachers.

BOARD AND ROOMS.

Students are furnished with board in the University Hall at cost, which has been raised to $2 per week. Several of the Professors and their families reside in the building, and board at the same table with the students. The advantages of such associations to the students are obvious. Something, at least, of the refinements and benevolent influences of the family are thus secured, while the evils usually complained of as belonging to the system of boarding "in common" are done away.

The rooms are arranged in suites, consisting of a study and two single bedrooms. They are furnished with everything necessary, except sheets, pillow-cases and towels. Students may add to the furniture of their rooms, with the permission of the Rector. Bedsteads, bedding and furniture in uncleanly condition will be rigidly excluded. Habits of neatness and order are carefully enjoined on occupants of rooms. Damage to rooms or furniture, other than the ordinary wear, will be charged in the term bill.

Students who prefer it may obtain board in families on reasonable terms, and they may also form clubs and provide for themselves at a cost of about $1.25 per week.

Students furnish their own wood and lights, the cost of which, in ordinary terms, is about $15 per annum. Washing, forty cents per dozen.

The rule of the Trustees requires all bills to be paid, one-half by the third day from the beginning, and one-half by the third day from the middle, of each term—and by a failure to comply with these terms, the student forfeits the privileges of the University.

Students will take notice that the whole necessary expense for a year, including wood, lights and washing, does not exceed $175—$180. This has been proved by the actual experience of students who practise economy. Any material variation from this amount may at once be known as unnecessary.

TERMS AND VACATIONS.

The year is divided into three Terms and three Vacations. The first, or Fall Term, consists of fifteen weeks, the second Term of thirteen, and the third of twelve. The Christmas vacation is one week, the Spring vacation one week, and the Summer vacation ten weeks.
Premiums.

The Griggs Prizes, first and second, for excellence in English Composition, are open to competition by the members of the Sophomore Class.

At the Commencement of 1863, these prizes were awarded as follows:
