Grand Total,  -  273
Departments of Instruction.

The organization of the University embraces the following departments:

I.—PREPARATORY DEPARTMENT.

The defective preparation of students is an evil universally experienced by Colleges. The successful pursuit of the subsequent course is often rendered impossible by the want of adequate preparation.

The Trustees have therefore considered it both a prime necessity and a legitimate part of their grand design in the establishment of a University, to include among its fundamental and permanent arrangements a Preparatory Department. It will be their aim to make this department a first class school of preparation for College.

The Professors of the University give instruction in the studies belonging to their several chairs.

The requirements for admission are Reading, Writing, Spelling, Intellectual Arithmetic, Practical Arithmetic through Common Fractions, Elements of English Grammar and Geography.

The requisite studies have been arranged in a course of three years, as appears by the following schedule:

FIRST YEAR.

|----------------|----------------------------------|------------------|-------------------------------|

SECOND YEAR.

|----------------|----------------------------------|------------------|-------------------------------|-------------------------|

UNIVERSITY OF CHICAGO.

SECOND TERM.

|-------------------|---------------------------------|--------------------|-------------------------------|

THIRD YEAR.

</tr>
</tbody>
</table>

STUDENTS NOT IN COURSE.

Students not wishing to prepare for College will be admitted into the Preparatory Department to pursue such studies of the course as they may choose; and special classes will be formed for them when the Faculty shall find it expedient.

24
II.—COLLEGE.

In this department there are two distinct courses of instruction:

I.—CLASSICAL COURSE.

REQUIREMENTS FOR ADMISSION.

Candidates for admission to the Freshman Class in the Classical course are examined in the following studies:

- English Grammar and Analysis.
- Geography—Ancient and Modern.
- History of the United States.
- Arithmetic—Intellectual and Higher.
- Algebra—Robinson's Elementary, entire, and University to Quadratic Equations.
- Greek Grammar and Reader.
- Xenophon's Anabasis, three books.
- Latin Grammar and Reader.
- Four books of Cæsar's Commentaries.
- Six Orations of Cicero.
- Nine books of Virgil’s "Aeneid."

Candidates for advanced standing, whether from other Colleges or not, are examined in the studies previously pursued by the class which they propose to enter.

No person under fifteen years of age will be admitted to the Freshman Class, nor will any one be admitted to an advanced standing, without a proportionate increase of age.

Testimonials of good moral character are required in all cases: and every student from another College must produce a certificate of regular dismissal.

To prevent disappointment to the applicant, it should be distinctly understood that a thorough knowledge of the prescribed studies is more likely to insure admission, and enable the student to reap the full benefits of the Collegiate Course, than a superficial acquaintance with some higher branches of literature and science. A critical knowledge of Mental Arithmetic, Arithmetical Analysis, and the Grammars of the English, Latin and Greek languages, is indispensable.

FRESHMAN CLASS.

2. Livy. Lincoln's Selections.

FIRST TERM.

SECOND TERM.

2. Homer's Iliad, or Odyssey.

THIRD TERM.

1. Plane and Spherical Trigonometry and Mensuration. Eleven and one half weeks.

SOPHOMORE CLASS.

FIRST TERM.

3. Surveying, with Field Practice. Six weeks.
4. Greek, six weeks, or Civil Engineering, and Linear and Topographical Drawing.

SECOND TERM.

2. Greek—Select Tragedies.

THIRD TERM.

3. Tacitus—Germania and Agricola.
UNIVERSITY OF CHICAGO.

THIRD TERM. . .
1. Greek—Plato.
2. Natural Philosophy completed.
   Zoology.

SENIOR CLASS.

FIRST TERM...
   Evidences of Christianity.
2. Geology and Mineralogy. Dana.
1. Mineralogy and Geology completed.
   Moral Science.
   Greek—Plato or Aristotle.
3. Astronomy Completed.
   Guizot’s History of Civilization.

SECOND TERM...
1. Butler’s Analogy.
   English Language. Marsh.
2. Political Economy.
   Constitutional Law.
3. Anatomy and Physiology.

Compositions and Declamations throughout the course.

2.—SCIENTIFIC COURSE.

With all the admitted excellence of the established curriculum of studies in American Colleges, it is not adapted to all the differences of intellectual constitution and of practical aims. While, therefore, fully recognizing the paramount claims of the Classical Course, the Trustees have deemed it expedient to provide another, which, with some important variations, is believed adequate to a preparation for many of the practical callings of life.

REQUIREMENTS FOR ADMISSION.

For the Scientific Course students will be examined in the same studies as for the Classical, with the omission of Greek altogether, and of Latin, excepting the Latin Grammar and Reader, and four books of Cesar’s Commentaries or Sallust’s Catilina. In College they will use the same text-books, and recite in the same classes, as those in the Classical Course, except in Latin, which study they will pursue with the Third Year Preparatory Class.

FRESHMAN CLASS.

FIRST TERM...
1. Geometry.
2. Cicero.
3. German.
1. Geometry completed.
   University Algebra.

SECOND TERM...
2. Virgil.
3. Fowler’s English Grammar.
1. Algebra completed.
   Application of Algebra to Geometry.

THIRD TERM...
2. Virgil.
3. History.

JUNIOR CLASS.

FIRST TERM...
1. Metaphysics.
2. Trigonometry and Mensuration.
3. Chemistry.
1. Metaphysics, completed.
   Constitution of the United States.

SECOND TERM...

29
3.—DEPARTMENT OF CIVIL ENGINEERING.

It has been determined to organize this Department on a thorough basis, and to confer upon students who complete the course of study, the degree of Civil Engineer.

The instruction will combine both theory and practice. To those students who aim at excellence in the higher branches of the profession, opportunities will be given to pursue a thorough course of study; while all the regular classes, both Classical and Scientific, will have the benefit of a Practical Course, combining lectures on important topics, such as Strength of Materials, Foundations, Mechanical Structures, etc., and the modes of conducting Surveys.

At the same time, Linear and Topographical Drawing will be taught to students who may have time to devote to those pursuits.

The Course of Study for the Engineering Department will embrace the Scientific Studies of the first two years; while to the studies of the third year of the Senior Scientific Course will be added the following: Geometrical Drawing—Warren. Topographical Drawing—Smith. Linear Perspective Drawing—Warren.

To the present Scientific Course is added another year of Civil Engineering.

COURSE OF STUDY.

FIRST TERM.

1. Practical Astronomy.
2. Differential and Integral Calculus.
3. Descriptive Geometry Davies.
   French.

SECOND TERM.

1. Practical Astronomy, completed.
2. Theory of Field Engineering and Typographical Drawing.
   Bridge Construction Drawing.
   Plans, Bills of Tender and Estimates Haupt.

THIRD TERM.

1. Practical Chemistry Regnaut.
2. Theory of Machinery Weisbach.
   Plans; Profiles; Sections of Canal and Railroad Surveys, and the mode of making the same.
INSTRUMENTS.

A full set of engineering instruments is provided for the use of students, viz.: Railroad Compass. Transit Instrument. Level. Rod, Chains, etc.

4.—AGRICULTURAL DEPARTMENT.

It is a common objection to the American College System, that, copying to a great extent the European, it is adjusted to a condition of society almost wholly unlike that prevalent in this country, and is consequently ill adapted to meet American wants. While not accepting this view in its whole extent, and while, on the contrary, they would allow nothing to supersede or interfere with a liberal provision for classical and scientific culture, the managers of the University have felt that they ought not to overlook the almost universal demand for what is known as "a practical education." They have sought, therefore, to meet that demand by the organization of a Scientific Course, and by liberal arrangements for the election by students, or their proper advisers, of the studies which they will pursue. In pursuance of the same views, and with due reference to the fact that the University is located in the centre of the greatest agricultural district in the world, where many young men will till the soil, the Board has organized this department. It has not been deemed best to limit the range of studies to such only as illustrate or aid agricultural processes, but to establish an independent course, adequate of itself to meet that claim to liberal culture which the sons of farmers, not less than other young men, are asserting for themselves.

The course will require two years.

CONDITIONS OF ADMISSION.

An acquaintance with the leading branches of a good English education will be required.

FIRST YEAR.

FIRST TERM...

SECOND TERM...

THIRD TERM...

SECOND YEAR...

Zoology.
Entomology.
Meteorology.
Constitutions of the United States and of Illinois, and Laws relating to Contracts, Collections, Highways, and Fences.
Collecting and examining Botanical, Mineralogical, Zoological, Anatomical and Entomological Specimens.

5.—LAW DEPARTMENT.

The superior facilities furnished by Law Schools, for instruction in the science and practice of Law, are now fully appreciated by the Profession and the public.

A regular, systematic course of study, under experienced teaching, is admitted to be as indispensable to the attorney as to the medical or theological student. Experience has shown that a better preparation for the Bar may be had in the Law School in one year, than is ordinarily obtained in an office in two or three. In an office the student usually receives but little attention. The distinguished professor is too exclusively and too profitably employed with his clients to afford the necessary time, even if he have the necessary patience or skill, to solve the doubts of the student, who, amid ceaseless embarrassments and interruptions, blindly gropes his way through the pages of Coke and Blackstone.

The force of these considerations has been keenly felt in the West, where, till lately, there has been no school of preparation for the Bar; and, therefore, to fill this chasm in our educational institutions, and furnish an opportunity for a thorough training, without the expense of traveling abroad for the purpose, this school has been established.

PLAN OF INSTRUCTION.

The training of a lawyer, in order to secure complete success, should be of a three-fold character. First: he should have a critical acquaintance with the principles of Law, as a science; secondly: the power to make a ready application of those principles in practice, as an art; and lastly: a graceful elocution—a fluent, easy, and forcible style of extemporaneous speech—without which, however solid his acquirements, it is scarcely possible for him to attain eminence at the Bar.

The plan of the School contemplates the attainment of the several objects in the mode best adapted to each. For the mastery of the science, reliance is placed upon the reading of the best legal works, under proper instructions, together with daily examinations in the classes upon the subjects studied. For the sake of variety, lectures, also, are given in certain departments of jurisprudence, but not to such an extent as to form a prominent feature of the plan.

There are, at all times, in the school, three regular classes, according to the different degrees of proficiency; and each student is at liberty to attend in any one or all of the classes. The professors meet each of these classes in the lecture room, daily, for an examination or lecture, devoting from four to five hours to the various exercises.

In order that the student may be versed in the practice of the Law, Moot Courts are held. In these he is familiarized with the application of legal remedies and the different forms of actions, the bringing of suits, the drawing of papers and pleadings, and with all the various steps and stages in the preparation of a cause for trial; then with the trial, involving the application of the rules of evidence; with the argument of counsel, the charge, the verdict, motion in arrest of judgment, writ of error, etc. In all these various stages, the forms of a real case are preserved; and as the trial takes place in the presence of the class, who act in the capacity of counsel, juries, witnesses, or officers of the court, and before the professor, who sits as judge, with the double object of illustrating important legal principles as well as explaining the rules of practice, it is easy to see that the exercises become in a high degree interesting and profitable.

Besides this, the student is also instructed from time to time in the drawing of contracts, deeds, wills, and all the legal forms usual in an attorney's office.

Lastly, to impart the grace of a finished elocution, and an easy, forcible style of extemporaneous delivery, declamations, drill speeches, and debates, under the instruction of a professor, will form a part of the exercises of the School.

A Congress, comprising a Senate and House of Representatives, with speakers, committees, etc., has been organized by the students, which holds its sessions once a week for the discussion of subjects of governmental policy, thus affording additional opportunities for practice in speaking, as well as for becoming acquainted with parliamentary rules and tactics.
TERMS, DIPLOMAS, ADMISSION TO THE BAR, Etc.

There are three terms in the year, of thirteen weeks each. The first term begins on the third Wednesday in September; the second on the first Wednesday in January; and the third on the second Wednesday in April. A full course of study occupies two years, or six terms, embracing the various branches of the common law, equity, admiralty, commercial, international and constitutional law, and the jurisprudence of the United States. There is also a less extensive course of commercial jurisprudence for those intending to devote themselves to mercantile pursuits. At the close of the collegiate year there is a public examination in the presence of the Faculty and Trustees of the University, when each student who has attended the exercises of the School for three full terms, and is qualified to practice, receives the degree of Bachelor of Laws.

The following order, made by the Supreme Court of the State of Illinois, was entered upon the record, under date of May 12, 1883:

"On motion, That a Diploma from the Law School of the University of Chicago shall be deemed satisfactory evidence that the graduate is sufficiently learned in the law to entitle him to admission to the Bar of this Court."

TUITION FEES.

In order to place the benefits of the institution within the reach of as many young men as possible, it has been determined to reduce the tuition to the lowest rates at which it can be afforded. Hereafter the student will be charged for a single term, $30; for two terms, $55, and for the three terms, or a school year, $75; in each case payable in advance. The graduating fee will be $10. In special cases, time will be given for the payment of tuition, upon satisfactory security. Students who enter for part of a term will pay in proportion to the time spent in school. Those who wish to pursue a partial course of study, will be received on reasonable terms. No other preparation is required than a good common English education.

COURSE OF READING.

A well-selected course of reading has been adopted, comprising the best elementary works and digests, in the several departments of Law and Equity. Students will find their own books, and arrangements have been made by which they may be supplied at the lowest trade prices. Many of the students obtain the use of books from the numerous law offices in the city, on favorable terms. Those who buy their books usually prefer to retain them, and thus begin a library; but, if they choose, they can sell them at the close of each term, at slightly reduced prices, in which case the net expense for books will be small.

BOARDING.

Good board may be had, in ordinary times, in boarding houses and private families, at fair prices, varying from $3.50 to $4 per week. Students who desire to economize can club together, hire a room, and board themselves at less expense.

ADVANTAGES OF LOCATION.

The location of the School, in the heart of the great Metropolis of the Northwest, within a few rods of the Court House, and in the immediate vicinity of the Courts, State and Federal, which are almost constantly in session, affords to the student who wishes to become acquainted with every phase and variety of business, advantages unsurpassed by those of any similar institution in the United States. The School Rooms are in the Larnon Block, N. E. corner of Clark and Washington Streets, in immediate connection with the well-known Commercial College of Massa, Bryant, Bell & Stratton.

CONNECTION WITH THE UNIVERSITY.

This School is a branch of the University of Chicago, and the students are admitted free to the Libraries of the University, and to all Public Lectures delivered to the undergraduates in the Literary Department. The terms in the two departments commence simultaneously.

Students in the Law Department can also unite with any of the regular classes at the University, and pursue any of the studies taught there, without additional charge.

A good Law Library, belonging to one of the Professors, is kept in the Lecture Room, to which the students at all times have access.

Communications should be addressed to Prof. H. Booth, Chicago, Ill., Post Office box, 1965.
General Information.

COMMERCIAL INSTRUCTION.
To meet the practical wants of the different classes of students, the Trustees have made arrangements for regular instruction throughout the year in Penmanship, Bookkeeping, and other branches essential to a good Commercial Education.

ELECTIVE STUDIES.
Students may reside at the University and pursue studies for a longer or shorter time, in any of the classes, at their own election; subject, however, to the regulations of the University.

LECTURES.
In connection with the regular recitations, lectures are delivered on the following subjects: Chemistry, Natural Philosophy, Geology, Astronomy, Anatomy and Physiology, Zoology, Mental and Moral Philosophy, Greek History and Literature, Roman History and Literature, Verbal Criticisms, and History of the English Language.

RHETORICAL EXERCISES.
The College Classes have exercises in Composition once in three weeks. The Senior Class deliver original orations once in three weeks. Instruction in Eloquence is given to all the students, and declamations in the chapel are required of all, except the Senior Class, once in four weeks.

EXAMINATIONS.
At the close of every term there are public examinations of all the classes, in the studies of the term, in both the Collegiate and Preparatory Departments. The Senior examination takes place four weeks before Commencement.

RECORD OF STANDING.
Each member of the Faculty records, in numbers ranging from 100 to 0, the attendance, deportment, and character of the recitations, of each student in his class. This record is made the basis of discipline, and determines the standing of each student in his class and in college. At the close of each term, an average of these marks is taken, and, after it has been transferred to a permanent record, is sent to all parents or guardians of students, who request it.

DEGREES.
The Degree of Bachelor of Arts is conferred upon all students who have completed the prescribed "Classical Course" of study, and passed satisfactory examination, therein; and the Degree of Bachelor of Science upon all who have completed the "Scientific Course," and passed similar examinations.

Bachelor of Arts of three years' standing may receive the Degree of Master of Arts, provided that since graduation they have sustained a good moral character, and pursued some literary or scientific calling.

SOCIETIES.
There are three Societies in the University, conducted by the students; two Literary, and one Religious.

RELIGIOUS EXERCISES.
The duties of each day are opened with religious services in the Chapel of the University, at which all students are required to be present.

On the Sabbath they are required to attend public worship in the forenoon, with some congregation in the city, selected by themselves or by their parents. The students also sustain a weekly prayer meeting.

ASTRONOMICAL DEPARTMENT.
The Dearborn Observatory forms the Astronomical Department of the University. Its objects are to make original researches in Astronomical Science, to co-operate in the application of Astronomy to Geography and other useful purposes, and to furnish instruction in Astronomy to the students of the University.

The principal instrument of the Observatory, at present, is the great Equatorial Refractor, by Alvan Clark & Sons, of Cambridge, Mass., already celebrated by the discovery of the companion of Sirius, and known as the largest refractor now in existence, it having a considerably larger aperture than the similar instruments of Pulkowa, Cambridge and Lisbon. It is placed in the Dearborn Tower, built by the munificence of the Hon. J. Y. Scammell. The dimensions of this instrument are:

- Aperture of Object Glass, 184 inches.
- Focal Length of Object Glass, 23 feet.
- Diameter of Hour-Circle, 22 inches.
- Diameter of Declination-Circle, 39 inches.
The circles are read by two microscopes each, the hour-circle to seconds of time, and the declination-circle to tenths of seconds of space; in either case, the tenths of these quantities are estimated. The Observatory has also a Chronometer, (Win. Bond & Son, No. 278,) and the nucleus of an Astronomical Library.

A meridian-circle has been ordered of the eminent artist, Messrs. A. and G. Rossini, of Hamburg, of the dimensions best adapted to accurate work, and it is hoped that when completed it will be equal, if not superior, to any other instrument of its kind. The funds for its purchase are mostly the donation of the Hon. Walter S. Gurnee.

A Barometer and Thermometer are also in process of construction, and other instruments will be added as they are needed.

Regular instruction will be given to the members of the Senior Class in Cosmography, or Descriptive Astronomy, and the simpler portions of Spherical Astronomy. Recitations in Snell's edition of Olmstead's Astronomy will be combined with familiar lectures. Besides this, a course in Practical Astronomy, continuing for two years, will be open to such as choose to avail themselves of it. The preliminary conditions for entering on this course are, an acquaintance with Geometry, Algebra, Plane and Spherical Trigonometry, the elements of Analytical Geometry, and the Differential Calculus. The objects of this course will be to fit students to determine time and geographical positions by astronomical methods, and thus to conduct astronomical surveys; and also to calculate the orbits and perturbations of the heavenly bodies by the best modern methods.

Instruction in these branches will be given chiefly by lectures and practical exercises, with occasional references to the most approved American, French, and German monographs on such subjects. Instruction will also be given in the collateral higher mathematics, where needed. The text-books most frequently consulted will be the following: Loomis's Practical Astronomy, Chauvant's Manual of Spherical and Practical Astronomy, Brunn's Spherical Astronomy, Gauss's Theoria Motus Corporum Coelestium.

ILLUSTRATIVE APPARATUS.

The Lectures on Chemistry and Natural Philosophy are illustrated by the best modern apparatus. The Botanical collection of Prof. Scammell numbers over four thousand species. There are, also, moderate facilities for the illustration of Zoology, and other branches of Natural History.

The University has also secured the use of the fine collections of Prof. Mchenry, comprising more than 15,000 specimens. No other such collection exists in the West, and very few such in the United States.

The Library, to which the students have free access, contains about four thousand volumes, and will soon be enlarged by valuable additions.

LOCATION, BUILDINGS, ETC.

The location of the University is in the south part of Chicago, directly on the line of the State Street City Railway. The site was the gift of the late Senator Douglas, and is universally admired for its beauty and healthfulness. This building is unsurpassed for the completeness of its arrangements, especially of the students' rooms, which are in suites of a study and two best-rooms, of good size and height, and well-ventilated. During the past year the accommodations of the University have been greatly enlarged by the completion of the main building, 130 x 12 feet, a structure which has been erected at a cost exceeding $17,000, and which is believed to be second in convenience and elegance to no other educational edifice in the country. In this building there are a large Chapel, rooms for the various Scientific Departments, and also the Academic, spacious and airy recreation rooms, elegant suits for the Literary and Religious Societies, and additional dormitories for the students.

Through the liberality of the different railroads which centre at Chicago, classes have had the privilege of making frequent excursions into the country, in order to examine the rock strata, and to collect specimens in Natural History. These explorations have extended, during the past two years, to Dubuque and Burlington, Iowa, to Kewanee, LaSalle and Quincy, Ill., to the Wisconsin River, and along the Mississippi River from McGregor to St. Louis.

LOCAL ADVANTAGES.

As valuable accessories to the educational facilities of the University, students are encouraged to attend the able course of lectures furnished every winter by the Young Men's Association of Chicago, and also to hear distinguished speakers whom great public occasions draw to the city.

BOARD AND ROOMS.

Students are furnished with board in the University Hall, at cost, which, since January last, has been $4 per week. Several of the Professors and their families reside in the building, and board at the same table with the students. The advantages of such associations to the students are obvious. Something, at least, of the refinement and benevolent influence of the

The original policy of the University to board students at cost will be adhered to, and if at the end of any term it is found the price can be reduced, an allowance will be made in the next term bill.

J. H. WOODWORTH, Tres.

40
UNIVERSITY OF CHICAGO.

are carefully enjoined on occupants of rooms. Damage to rooms or furniture, other than the ordinary wear, will be charged in the term bill.

Students who prefer it may obtain board in families on reasonable terms, or they may form clubs and provide for themselves.

Students furnish their own wood and lights, the cost of which, in ordinary times, is about $15 per annum. Washing, sixty cents per dozen.

The rule of the Trustees requires all bills to be paid, one-half by the third day from the beginning, and one-half by the third day from the middle, of each term—and by a failure to comply with these terms, the student forfeits the privileges of the University.

Parents will take notice that the whole necessary expense for a year, including wood, lights, and washing, varies but little from $275. This has been proved by the actual experience of students who practice economy. Any material variation from this amount may at once be known as unnecessary.

TERMS AND VACATIONS.

The year is divided into three terms and three vacations. The first term consists of fifteen weeks, the second and third of twelve weeks each. The Christmas vacation is two weeks, the Spring vacation one week, and the Summer vacation ten weeks.

Prizes.

SOPHOMORE CLASS.

The Griggs Prizes, first and second, for excellence in English Composition, are open to competition by members of the Sophomore Class. Competitors for the prize must have their essays at the President's office on or before the first day of June. Each essay must be signed with an assumed name, and accompanied by a sealed letter containing the true name of the writer, and superscribed with his assumed name.

The following are the subjects for the next Academic Year:

- Is there a Science of History?
- The Study of Words; its Advantages and Disadvantages.

At the commencement of 1863 these prizes were awarded as follows:

- To Jabez T. Sunderland, of Strawberry Point, Iowa, a first prize.
- To Mulford C. Armstrong, of Deer Park, a second prize.

Committee of Award—James Sheahan, Esq., Rev. W. C. Ryder, D.D., Rev. J. A. Smith, D.D.

FRESHMAN CLASS.

The Kean Prizes, first and second, for excellence in Declamation, are open to competition by members of the Freshman Class. The competition for these prizes will take place on the Monday evening preceding Commencement.

At the commencement of 1863 these prizes were awarded as follows:

- To Lewis H. O'Connor, of Tivoli, a first prize.
- To Edward P. Savage, of Joliet, a second prize.

Calendar.

1866.
June 28, 29, 30, Examination of Law Class for Degrees, Thursday, Friday and Saturday.
" 29, Junior Exhibition and Sophomore Essays for Griggs Prizes, Friday Evening.
July 1, Anniversary of Religious and Missionary Societies, Sunday Evening.
" 2, Examination of Candidates for Admission, Monday.
" 2, Graduating Exercises of the Law Department, Monday Evening.
" 3, Commencement, Tuesday, at 11 o'clock, a.m.

SUMMER VACATION.
Sept. 10, First Term begins Monday.
" 10, Examination of Candidates for Admission, Monday.
Dec. 19, 20, 21, Term Examination, Wednesday, Thursday, Friday.
" 20, Junior Exhibition, Thursday Evening.
" 21, Close of First Term.

CHRISTMAS VACATION.
1867.
Jan. 3, Second Term begins Thursday.
April 1, 2, 3, Term Examination, Monday, Tuesday, Wednesday.
" 2, Anniversary of Literary Societies, Tuesday Evening.
April 3, Close of Second Term, Wednesday.
" 4, Third Term begins, Thursday.
June 26, Commencement, Thursday.

Degrees Conferred.

1865.
