Archæology

by Takeishi Kenji

Opinion

At very old time what kind people were
living in Japan? or none of people or some one
were lived. If so what people were lived and
were lived. If we study these
what was the they life? If we study these
things we want depend upon Archæology.

At Shiouchi Mura of Shirakawa province there
there is a place which call Kaigata (Shell field).

About that Murata find many shell from ground and
people of that place say, at long time ago have been
long hand God who take much good deal of shell
and sent from sea and lot so that shell Murata
tell. People of Murata call that God Tanaga Naça-
Jiin. This Naza Jiin shrine is not only this place
some other place call same thing. Such story
say in Shiouchi fude Ki'. Such story of
thousand ago, now if anyone know Archæology
Can understand some.

In picture where it tell in which way tolle in tell
made by many people call this 3go ana (hell) says old

time lived 3go, but this is a old Japanese tomb

tell soon understand

Girls head (Shimada) which tells says, Shimada

1st motion of Tokaido girls did at first Was look

like real, but if we see Harima, Harima Harima

doll tell doing that Shimada .

1. Pre-historic age

2. Proto-historic age

3. Historic age

These are Archaeology. Pre-historic age is

not sure to make stone thing, this age did not

know make metals things

Before note

Pre-historic age.

Chaps. 1

Shell field. In pre-historic age most

chief thing is shell field. When we discovered

from shell field something stone thing it is

very interesting for us. Before I told about

long land shine of Imari, all those are shell

field. We can not measure how deep

shell field come one is very thin and find

out very long distance like snow. This one only

one foot. This picture is Shimada area.

Japanese shell field. Study by Ms. Morris from
Meiji 12 years at Omori. The book call Omori kai hikai is this. Now this is nothing by house wife changed.

Chapter 2. Stone Things

Stone arrow-head. This arrow head is every one inch form like picture stone is change in seashore country. Old time some one think if form is nature, but now soon understand made by men. Notice of South America still using this arrow-head by glass of tool. so we soon know old people use those things.

Earth-wares. Earth-wares is most important thing of stone thing and country, is many can find out. I will say here how to use. At this one using as dish or something that kind. This were not much good thing, but brown one find out very many in shell field or small place. Size one big one is more than two feet and little one only some one inch. Each ware has paint in it sometime some of patent. Also size one different one many. Also many kind of different size. 1 picture call Singata (like bottle) this one find out at Mutsu province. 13 picture - call Tantogata-wear (mouth is big than bottle kind) this one find out at Akita.

Earth-wars doll. This doll fifteen of Omura. Our old people made it, but very different to real men. I think this made for something came from.
Religion. This shall size big me. I one fact at most is no Ind answer, earth some one other looks like man or woman, or was kimono or no. If I asked this by hand.

1. Common thing
2. Like Mountain
3. Like, wind
4. Like to have looking glass. Now are pictures some one like real or some one is very different from man. Mr. Yagi says these storages one is may be worn something cloth on hand. Dr. Tomori may wear black side also body is very cotton. Women's me with is big, some men wear under cloth like European cloth. Some thing we can study how were our old people are from those balls.

Garn. The pictures are scene of stone. All thing this one worn little ball and other storages, and use for decoration of wall. Still Formans and South port people use this. Teeth of animals. Our old people didn't think that teeth which come discover. 38 picture one little turn us those can say in fifty part.

Chapter 3. Civilization

I will say here about civilization and kind here of before part. clothes when I see balls of stone time come one have something clothes. May be make by animal hides or fish. Teeth, decoration, Some those glue mostly ear.
Kajen

This book made for not real man, only amature, so very easy thing containing. This stone age things study in real thing not in the sentence and practical study is very hard thing. I make a book which call Japanese stone age things photograph last year, but it is only notice size of things and place only so it is little different to understand in amature. So I make this book for amature and explaining some photograph for these people.

The picture of this book piecet from Japanese stone age things photograph. Object took from Imperial Museum and Archaeology of Imperial University. If not satisfied at this book better to go to Museum and see them.

Written by
Amurer

Taido 2 year month

content.

1. Before note
   Pre-historic age
   - Place shell hill field
   - Stone age things, arrow, stone spoon, stone knife
   - Stone dish, stone hammers
   - Earth things, ball, kind of bowl

2. After note
   Pre-historic age
   - Old tomb
   - Milly
   - Sword
   - Spear
   - Arrow
   - Arrow
   - Haniwa dolls
   - Stone man
   - Stone horse

Chapter 3
1. Decoration of dress dress
2. Food
3. Place of living
4. Product and Art
My head may be the use for ear. Truth or you can use for work decoration. Dr. Tabori says Native of Peru still use this kind of thing for ear.

Footnote:

In Stone Age there is no distinction between different kinds of work. Man made stone dishes, knives, spears, axes, etc. He also used stone for the making of tools, weapons, and other objects. The use of stone tools was widespread in prehistoric times and continued to be used even after the advent of metal tools.

The People of Stone Age Times lived in huts or caves and made simple tools out of stone. They used these tools to hunt, fish, and gather food. The people of the Stone Age lived in small groups and their settlements were scattered.

A Note by Me:

Proto-historic

Proto-historic is not only true, most thing is true of old Imperial, Tomb; place is very
long. Tomb has two kind one is made on field and put of stone others are made both of hills.

Tomb of stone wall, most of these tomb build toward north, inside is very large. Those tomb are real nice one and some one has character. 4 / picture is at Yamato province build like house.

Were tomb both. This one has some logs and cover put picture on find at Nine pro.

Stone tomb and were tomb is most chief men use this and keep died body long time but some one use wood. Some time more discounts to wood with hard which come very thick wood. As old time use wood.

Old time made wall in mountain wood. Old time made wall in mountain wood.

Old time wall in mountain wood.

Old time made wall in mountain wood. Old time made wall in mountain wood.

Old time made wall in mountain wood.

Old time made wall in mountain wood.
