Descriptive Summary

Identifier	ICU.SPCL.BULLETIN
Title	Bulletin of the Atomic Scientists. Records
Date	1945-1984, bulk 1945-1952
Size	19 linear ft. (38 boxes)
Repository	Hanna Holborn Gray Special Collections Research Center University of Chicago Library 1100 East 57th Street Chicago, Illinois 60637 U.S.A.
Abstract	Bulletin of the Atomic Scientists, journal of nuclear energy and security news. The Bulletin of the Atomic Scientists Records consist of material relating to the organization's two purposes of exploring, clarifying, and formulating the opinion and responsibilities of scientists in regard to the problems brought about by the release of nuclear energy as well as educating the public to a full understanding of the scientific, technological and social problems arising from the release of nuclear energy. The collection includes newspaper clippings, press releases, periodicals, correspondence, editorial materials, manuscripts, and other related materials.

Information on Use

Access

The collection is open for research.

Citation

When quoting material from this collection, the preferred citation is: Bulletin of the Atomic Scientists. Records, [Box #, Folder #], Hanna Holborn Gray Special Collections Research Center, University of Chicago Library

Historical Note

The Manhattan Project's Metallurgical Laboratory (Met Lab) was located at the University of Chicago. It was here that scientists were recruited to work on the theoretical aspects of building the atomic bomb. In 1945, months after the bombing of Hiroshima, about 90% (approximately 200) of Met Lab's scientists reorganized as the Atomic Scientists of Chicago, Inc. and began to publish the Bulletin of the Atomic Scientists in an effort to influence government policy and to educate the general public regarding atomic energy and the atomic bomb.

The Bulletin of Atomic Scientists initiated publication December 10, 1945, with the purpose as defined in their constitution:

1. to explore, clarify, and formulate the opinion and responsibilities of scientists in regard to the problems brought about by the release of nuclear energy, and 2. to educate the public to a full understanding of the scientific, technological and social problems arising from the release of nuclear energy.

Scope Note

The amount of administrative and editorial material contained in these files is small in comparison with the size of the general information files compiled by the Bulletin editorial committee and staff. Rather than a history of the Bulletin, these files provide a good background and source of information for an inquiry into the social and political implications that the atom bomb had in the United States and other parts of the world between the years 1945-1952.

The files of the Bulletin for the period 1945-1952 were deposited in the University Library in the fall of 1952. Originally consisting of seven file cases, the files have now been arranged in thirty-two boxes under the various headings of newspaper clippings, Atomic Energy Commission Press releases, Periodicals, civil defense material, general information files of the Bulletin, and editorial material and correspondence. A complete index to the material is attached.

Series I consists of newspaper clippings that are arranged in chronological order.

Series II consists of newspaper clippings that are arranged by subject.

Series III consists of press releases from the Atomic Energy Commission Press Releases, arranged in chronological order.

Series IV consists of materials from hearings before the Joint Committee on Atomic Energy: Congress of the U.S. from May to July 1949.

Series V consists of periodicals and is divided into subseries by type of periodical.

Series VI consists of speeches, publications, correspondence and editorial comments, and other general materials used by the Bulletin staff. These materials are filed by subject heading.

Series VII consists of editorial material and correspondence, arranged by subject.

Series VIII consists of papers relating to the special issue of the Bulletin of Atomic Scientists in 1955. They were given to the Department of Special Collections by Edward A. Shils, Professor in the Committee on Social Thought and in the Department of Sociology at the University of Chicago.

Series IX consists of manuscript submissions to the journal between 1980 and 1984. Most of these drafts are photocopies that have been annotated by the journal's editors. These articles are arranged alphabetically according to the last name of the author or the primary issuing body. The Addenda also include a small amount of business correspondence, 1980-1984, which have been placed in chronological order, and some miscellaneous paperwork regarding conferences and budgets. Finally, in 1986 three items were transferred from the Papers of Sol Tax in the University of Chicago Archives; these are two published articles and one unpublished typescript report that deal with the work of the Bulletin of the Atomic Scientists.
