The images presented here may include materials reflecting the attitudes, language, and stereotypes of an earlier time period. These materials are presented as historical resources in support of study and research. Inclusion of such materials does not constitute an endorsement of their content by the University of Chicago.

The University of Chicago Library appreciates hearing from anyone who may have information about any of the images in this collection.

Citation

When quoting material from this collection, the preferred citation is: Chanute, Octave, Letters, Crerar Ms 280, Special Collections Research Center, University of Chicago Library

Scope Note

The correspondence is from Amos S. Stetson of Brayton Petroleum Engine Company to Octave Chanute, ALS (carbon), April 3, 1880, 1p. Stetson briefly describes for Chanute the 2, 5, and 10 horsepower models of petroleum engines manufactured by Brayton. Also from George B. Brayton to Octave Chanute, ALS, March 20, 1880, 1p. Brayton describes in some detail the pros and cons of various models of petroleum engines, especially in comparison to steam engines of the day. And from John B. Parson of West Chicago Street Rail Road Company to Octave Chanute, ALS, January 1, 1891, 1p. Parsons informs Chanute that the Connelly Gas Motor is being utilized on the car running on Lake from 40th to State and invites Chanute to observe and investigate the engine. He appends a note to the engineer of the car giving Chanute permission to make the investigation.

And from E.D. Meier of the Diesel Motor Company of American to Octave Chanute, ALS, May 23, 1898, 1p. Meier informs Chanute that he is forwarding a copy of a lecture by Mr. Diesel and that it will probably be a while before they are ready to build a light motor. He also suggests that Chanute's work on "automatic equilibrium" is much more important.

Steam engines, two sepia photographs in stamped and addressed envelope, May 6, 1891. On the outside of the envelope, these photographs have been identified as steam engines, though there is no identification on the photographs themselves.
